Sickness Why Healing How

John C. Kasza

Sickness Why Healing How:

Evolution of Sickness and Healing Horacio Fábrega Jr., 2023-11-10 Evolution of Sickness and Healing is a theoretical work on the grand scale an original synthesis of many disciplines in social studies of medicine Looking at human sickness and healing through the lens of evolutionary theory Horacio Fábrega Jr presents not only the vulnerability to disease and injury but also the need to show and communicate sickness and to seek and provide healing as innate biological traits grounded in evolution This linking of sickness and healing as inseparable facets of a unique human adaptation developed during the evolution of the hominid line offers a new vantage point from which to examine the institution of medicine To show how this complex integrated adaptation for sickness and healing lies at the root of medicine and how it is expressed culturally in relation to the changing historical contingencies of human societies Fábrega traces the characteristics of sickness and healing through the early and later stages of social evolution Besides offering a new conceptual structure and a methodology for analyzing medicine in evolutionary terms he shows the relevance of this approach and its implications for the social sciences and for medical policy Health scientists and medical practitioners along with medical historians economists anthropologists and sociologists now have the opportunity to consider every essential aspect of medicine within an integrated framework This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1997

Sickness and Healing Robert A. Hahn, 1995 The ways in which people respond to sickness differ greatly from society to society In this book anthropologist and epidemiologist Robert A Hahn examines how Western and non Western cultures influence the definition experience and treatment of sickness Hahn begins by developing a definition of sickness that is based on the patient's perception of suffering and disturbance rather than on the physician's assessment of biomedical signs After reviewing the principal theories that account for the forms of sickness and healing found in different historical and cultural situations he explores the relevance of both anthropological and epidemiological approaches to sickness focusing on the persistent gap between white and black infant mortality in the United States Hahn then describes contemporary Western medicine as it might be seen by a visiting foreign anthropologist He delineates the culture of Western medicine and portrays the world of one physician at work traces the evolution of obstetrics since 1903 by analyzing the principal textbook Williams Obstetrics through its first eighteen editions and explores the gulf between physicians and their patients by examining the accounts of physicians who have written about their own illnesses He concludes by proposing ways in which some of the ills of contemporary Western medicine might be remedied by applying anthropological principles to medical training and practice

Understanding Sacramental Healing John C. Kasza, 2007

Israel's Divine Healer Michael L. Brown, 1995 Israel's Divine Healer begins with a study of various Hebrew words on

healing It then explores within the larger context of the Ancient Near Eastern religions the roles of medicine magic and the physician priest together with their possible influences upon Israel's beliefs and practices regarding healing

The Natural Law of Mind Healing and Mind Creating of Sickness, Disease and Deformity A. F. Hoch, 1915 **Handbook of Health Behavior Research I** David S. Gochman, 1997-08-31 The primary objective of this Handbook is to provide statements about health behaviour research as a basic body of knowledge moving into the 21st century It is expected that the Handbook will remain in use and current through 2005 at least The Handbook presents a broad and representative selection of mid 1990s health behaviour findings and concepts in a single work While texts and books of readings are available in related areas such as health psychology medical anthropology medical sociology behavioural health behavioural risk factors and changing health behaviours none of these works was intended to address basic research generated knowledge of health behaviour and none was intended to transcend individual disciplines Accordingly none of these works presents a broad and representative spectrum of basic health behaviour research reflecting multidisciplinary activities One work with a title identical to this one but for one word the Handbook of Health Behaviour Change Shumaker et al 1990 deals almost exclusively with applications This Handbook thus presents the reader with the state of the art in health behaviour research something not found elsewhere

Practicing Theology Miroslav Volf, Dorothy C. Bass, 2001-10-26 In a time when academic theology often neglects the lived practices of the Christian community this volume seeks to bring balance to the situation by showing the dynamic link between the task of theology and the practices of the Christian life The work of thirteen first rate theologians from several cultural and Christian perspectives these informed and informative essays explore the relationship between Christian theology and practice in the daily lives of believers in the ministry of Christian communities and as a needed focus within Christian education Contributors Dorothy C Bass Nancy Bedford Gilbert Bond Sarah Coakley Craig Dykstra Reinhard Hutter L Gregory Jones Serene Jones Amy Plantinga Pauw Christine Pohl Kathryn Tanner Miroslav Volf Tammy Williams
