Mathematical Foundation Of Parallel Computing:

Mathematical Foundations of Parallel Computing Valentin V. Voevodin, 1992 Parallel implementation of algorithms involves many difficult problems In particular among them are round off analysis the way to convert sequential programs and algorithms into the parallel mode the choice of appropriate or optimal computer architect and so on To solve these problems it is necessary to know very well the structure of algorithms This book deal with the mathematical mechanism that permits us to investigate structures of both sequential and parallel algorithms This mechanism allows us to recognize and explain the relations between different methods of constructing parallel algorithms the methods of analysing round off errors the methods of optimizing memory traffic the methods of working out the fastest implementation for a given parallel computer and other methods attending the joint investigation of algorithms and computers

Mathematical Foundations of Computer Science 1994 Igor Privara, Branislav Rovan, 1994-08-03 This volume constitutes the proceedings of the 19th International Symposium on

Mathematical Foundations of Theoretical Computer Science MFCS 94 held in Kosice Slovakia in August 1994 MFCS 94 brought together specialists in theoretical fields of computer science from various countries in order to stimulate

mathematical research in theoretical computer science Besides 12 papers based on invited talks by renowned experts the book contains 42 research contributions selected from a total of 112 submissions All areas of theoretical computer science are presented some from a particular mathematical point of view

Mathematical Foundations of Computer Science 1998 Lubos Brim, Jiri Zlatuska, Josef Gruska, 1998-08-12 This book constitutes the refereed proceedings of the 23rd International Symposium on the Mathematical Foundations of Computer Science MFCS 98 held in Brno Czech Republic in August 1998 The 71 revised full papers presented were carefully reviewed and selected from a total of 168 submissions Also included are 11 full invited surveys by prominent leaders in the area The papers are organized in topical sections on problem complexity logic semantics and automata rewriting automata and transducers typing concurrency semantics and logic circuit complexity programming

structural complexity formal languages graphs Turing complexity and logic binary decision diagrams etc **Mathematical Foundations of Computer Science 2004** Jirí Fiala, Václav Koubek, Jan Kratochvíl, 2004-08-09 This volume contains the papers presented at the 29th Symposium on Mathematical Foundations of Computer Science MFCS 2004 held in Prague Czech Republic August 22-27 2004. The conference was organized by the Institute for Theoretical Computer Science ITI and the Department of Theoretical Computer Science and Mathematical Logic KTIML of the Faculty of Mathematics and Physics of Charles University in Prague. It was supported in part by the European Association for Theoretical Computer Science EATCS and the European Research Consortium for Informatics and Mathematics ERCIM. Traditionally the MFCS symposia encourage high quality research in all branches of theoretical computer science. Ranging in scope from automata formal languages data structures algorithms and computational geometry to complexity theory models of computation and applications including computational biology cryptography security and artificial intelligence. The conference offers a unique opportunity to researchers from diverse areas to meet and present their results to a general audience. The scientific program of this year's MFCS took place in the lecture halls of the recently reconstructed building of the Faculty of Mathematics and Physics in the historical center of Prague with the famous Prague Castle and other celebrated historical monuments in sight.

The view from the windows was a challenging competition for the speakers in the fight for the attention of the audience. But we did not fear the result. Due to the unusually tough competition for this year's MFCS the admitted presentations certainly attracted considerable interest. The conference program and the proceedings consisted of 60 contributed papers selected by the Program Committee from a total of 167 submissions. **Mathematical Foundations of Computer Science 1988** Michal Chytil, Ladislav Janiga, Václav Koubek, 1988 This volume contains 11 invited lectures and 42 communications presented at the 13th Conference on Mathematical Foundations of Computer Science MFCS 88 held at Carlsbad Czechoslovakia August 29-September 2 1988. Most of the papers present material from the following four fields: complexity theory in particular structural complexity, concurrency and parallelism, formal language theory, semantics. Other areas treated in the proceedings include functional programming, inductive syntactical synthesis, unification algorithms, relational databases and incremental attribute evaluation.

Theoretical and Mathematical Foundations of Computer Science Qihai Zhou, 2011-10-29 This book constitutes the refereed post-proceedings of the Second International Conference on Theoretical and Mathematical Foundations of Computer Science ICTMF 2011 held in Singapore in May 2011.
