The key themes of the volume are the difference in approaches to the

explanation of the distribution of income and relative prices and therefore different approaches to all other economic problems in particular capital accumulation and economic growth The book discusses whether there is a classical approach to the theory of value and distribution at the core of economic theory that is fundamentally different from the later marginalist or neoclassical theory In the volume the late Pierangelo Garegnani argues for the validity of Piero Sraffa's position on this issue whilst the late noble laureate Paul Samuelson vehemently contests it At a time of economic crisis the future of the discipline is far from certain and so it is extremely important to bring these debates back into the light by reproducing them together for the first time A comprehensive introduction by Heinz Kurz sets the debate in this context and provides crucial background to the arguments
