Hunt, 1999-04-29 The way in which wind blows over water and causes waves to be generated is still a very active area of research for applied mathematicians as well as for oceanographers and engineers These studies result in practical methods for forecasting waves and their effects on sediment pollution offshore structures etc and even lead to methods of controlling them These are the themes covered by papers in this book written by many of the leading authorities in the field

**Monitoring a Comprehensive Test Ban Treaty** Eystein S. Husebye, Anton M. Dainty, 2012-12-06 An international treaty banning the testing of any nuclear device in any environment a comprehensive test ban treaty CTBT has been on the political agenda for nearly 40 years Objections to a CTBT have been political technical or a combination of both However the

possibilities seem better after the end of the Cold War In the prevailing cooperative disarmament climate a CTBT appears likely to be approved by most countries in 1996 Hence the great current interest in monitoring technologies and capabilities Such issues are comprehensively addressed here a preamble being devoted to the political developments and setbacks over the past 40 years Since seismic means are considered the dominant monitoring element they are explored in detail Contributions cover network deployments advanced signal processing wave propagation in heterogeneous media and seismic source representations and a variety of techniques for source classification including neural networks Complementary monitoring techniques such as hydroacoustics radionuclides and infrasound are also summarised The IAEA operation for monitoring compliance with the Non Proliferation Treaty is also presented The book also includes eyewitness accounts of the Soviet 50 Mt megabomb development and test as well as the efforts made by the state to monitor the nuclear test programmes of the western powers Includes some 33 articles written by distinguished scientists active in CTBT monitoring research for decades
