The Mind's Affective Life Gemma Fiumara Corradi,2014-06-11 The Mind s Affective Life is a refreshing and innovative examination of the relationship between feeling and thinking Our thoughts and behaviour are shaped by both our emotions and reason yet until recently most of the literature analysing thought has concentrated largely on philosophical reasoning and neglected emotions This book is an original and provocative contribution to the rapidly growing literature on the neglected affective dimensions of modern thought The author draws on contemporary psychoanalysis philosophy feminist theory and recent innovations in neuroscience to argue that in order to to understand thought we need to consider not only both emotional and rational aspects of thought but also the complex interactions between these different aspects Only through such a rich and complicated understanding of modern thought can we hope to avoid what the author identifies as a significant contemporary problems for individuals and cultures that is suppression or denial of intolerable states of feeling The Mind s Affective Life will appeal to and inspire students and practitioners of philosophy psychoanalysis psychotherapy and women s studies It will also be of great interest to anyone interested in the interaction of feeling and thinking

ECKM 2019 20th European Conference on Knowledge Management 2 VOLS Dr. Eduardo Tomé, 2019-09-05 *The (Dis)Information Age: From Post-Truth to Post-Postmodernism* Jonathan Austad, 2025-01-07 There has yet to be a strong consensus regarding when and if postmodernism ended As such there is no agreement about the new age's name origins or tenets Nealson's Post Postmodernism or The Cultural Logic of Just in Time Capitalism leaves out the impact of the internet and social media Other books fail to explore post postmodernism within a larger social political framework and do not examine the cultural trends that have responded to such forces This book undertakes these complexities by examining the interplay between the sociohistorical events and visual culture of the last two decades and posits that postmodernism ended with the terror attacks on September 11 2001 Few events have such a tremendous impact on the collective consciousness that they cause immense social political and cultural changes but the terror attacks marked the beginning of a new era filled with greater anxiety and uncertainty The Bush Administration used news outlets to promote a false narrative and mislead the public manipulating information to further its agenda and altering the nature and efficacy of mass media and ultimately launching society into an age of disinformation The Dis Information Age is comprised of two main phenomena post truth and post postmodernism Truth and reality have become increasingly difficult to ascertain in this post truth world and created increased skepticism towards those in the government and media The rise of the internet and social media has exacerbated this trend by individualizing facts and data further fragmenting society along ideological lines The result is people share fewer common ideas than in previous eras and are no longer living in a shared reality Post postmodernism on the other hand is a cultural movement that has responded to post truth's weaponization misuse and individualization of information Artists of post postmodernism seek greater connectivity and common ground to combat individualized information and ideological warfare To them truth resides in the collective This study examines the intricate relationship between recent socio historic events and cultural manifestations that respond to them to better understand the world in which we live

Exploring the Frontiers of Regenerative Cardiovascular Medicine Joshua D. Hutcheson, Julie A. Phillippi, Elena Aikawa, 2019-05-15 This Research Topic celebrates the 50th anniversary of the first heart transplant performed in December of 1967 in Cape Town South Africa Cardiovascular researchers met in South Africa in December 2017 to commemorate this event presenting an opportune time

to reflect on the achievements of applied cardiovascular research and highlight forthcoming technology developments that will shape the future of cardiovascular medicine The clinical breakthrough in 1967 offered hope to many patients suffering with cardiac complications and these life saving surgeries continue to have a tremendous impact Tissue shortages surgical risks and complications due to improper host transplant tissue interactions however limit the utility of heart transplants to the most severe cases of cardiac morbidity Recent advances have yielded mechanistic insight into the factors that control cardiovascular tissue maintenance and remodeling The field of regenerative medicine seeks to control these factors to promote in situ tissue regeneration or engineered tissue replacement These exciting new technologies could lead to a renaissance in the treatment of many cardiovascular diseases just as the realization of heart transplantation 50 years ago In this Research Topic researchers and clinicians from regenerative medicine and applied cardiovascular biology provide literature reviews and original manuscripts to demonstrate the trajectory of cardiovascular medicine The contributions vertically integrate advances by clinicians engineers and basic scientists all researching similar topics from different angles and with complementary perspectives Taken together these contributions demonstrate the process of applied cardiovascular research from basic science discoveries to implementation in clinical practice [The Cambridge Handbook of the Sustainable Development Goals and International Law](#) Jonas Ebbesson, Ellen Hey, 2022-09-08 In 2015 the United Nations established seventeen Sustainable Development Goals SDG that aimed to achieve a better and more sustainable future for all by 2030 The chapters within this collection address each of these SDGs considering how they relate to one another and international law and what institutions could aid their implementation Development has been a contentious topic since the decolonization period after World War II and issues surrounding sustainable development are necessarily impacted by the multifaceted relationship between the Global South and Global North Confronting the context and challenge of sustainable development this collection outlines how the international economic system problematizes the attainment of the SDGs Introducing a novel cosmopolitan approach this book offers new ways of understanding sustainable development and suggests potential solutions so that we might finally achieve it **Modern Accelerator Technologies for Geographic Information Science** Xuan Shi, Volodymyr Kindratenko, Chaowei Yang, 2013-10-27 This book explores the impact of augmenting novel architectural designs with hardware based application accelerators The text covers comprehensive aspects of the applications in Geographic Information Science remote sensing and deploying Modern Accelerator Technologies MAT for geospatial simulations and spatiotemporal analytics MAT in GIS applications MAT in remotely sensed data processing and analysis heterogeneous processors many core and highly multi threaded processors and general purpose processors are also presented This book includes case studies and closes with a chapter on future trends Modern Accelerator Technologies for GIS is a reference book for practitioners and researchers working in geographical information systems and related fields Advanced level students in geography computational science computer science and engineering will also find this book useful
