

The background of the entire image is a dark, textured surface. It is populated with numerous circular, disk-like objects in shades of red and orange, some with bright yellow centers. These disks are arranged in a somewhat regular, grid-like pattern. Interspersed among these disks are several wavy, white lines that resemble stylized, handwritten cursive or perhaps representations of light waves or gravitational fields. The overall effect is a complex, abstract pattern that suggests a cosmic or scientific theme.

Solarities Cymene Howe, Jeff Diamanti, Amelia Moore, 2023 *Solarities* *Elemental Encounters and Refractions* is a transdisciplinary essay collection that explores the physical conceptual and political possibilities materialized by solarly a form of relation to the sun and its elemental force upon planetary life The authors propose that a different set of questions becomes possible when the material specificities of solar become the compass for thought prompting us to uncover our relationship to the sun How does solarly materialize in the bodies and lives of humans and non humans now and in the future What can we learn if we no longer take the sun for granted How do we continue to persist on a planet that is so intimately bound up in a state of love fear and dependence on this primary source of all living energy Each of the essays in *Solarities* take solar radiation as an interpretive lens that takes multiple forms often transforming as it does so *Solarities*

draws inspiration from Black ecologies Indigenous philosophy feminist science technology studies and more than human discussions in the human sciences recognizing the phenomenological and ontological openings they make available The authors understand solarly as an energy source channeled through photovoltaic cells for example but the essays gathered here focus on the lives that solarly creates or impedes The experimental task is to find how solarities work their way into materials and processes across our work seeking out the particular influences of solarly in making being s These relations are core to thinking the elemental conditions of solarly since it is through particular forms of focalizing the sun that life is sustained or made to wither across the planet In these ways the elemental condition of solarly is at once hyper particular and also shared across organic and inorganic bodies conditioned by physical form and material composition Throughout the collection the authors explore how solarly appears or recedes from view when we concentrate our attentions on it surfacing the existential omnipresence of the sun to open new thought possibilities inspire new actions and refract new dimensions of socionatural encounter

Situational Prison Control Richard K. Wortley,2002-03-25 This book examines the control of problem behaviour in prison from a situational crime prevention perspective Following the success of situational crime prevention in community settings Richard Wortley argues that the same principles can be used to help reduce the levels of assault rape self harm drug use escape and collective violence in our prison systems This pioneering new study proposes a two stage model of situational prevention that moves beyond traditional opportunity reduction it attempts to reconcile the contradictory urges to control prison disorder by tightening up and hardening the prison environment on the one hand and loosening off and normalising it on the other Combining a comprehensive synthesis and evaluation of existing research with original investigation and ground breaking conclusions Situational Prison Control will be of great interest to academics and practitioners both in the areas of correction and crime prevention more generally
