China: Bioethics, Trust, and the Challenge of the Market J. Tao Lai Po-wah, 2008-07-08 to the Moral Challenges H Tristram Engelhardt Jr and Aaron E Hinkley 1 Taking Finitude Seriously in a Chinese Cultural Context Across the world health care policy is a moral and political challenge Few want to die young or to suffer yet not all the money in the world can deliver physical immortality or a life free of suffering In addition health care needs differ As a result unless a state coercively forbids those with the desire and means to buy better basic health care to do so access to medicine will be unequal No country can afford to provide all with the best of care In countries such as China there are in addition stark regional differences in the quality and availability of health care posing additional challenges to public policy making Further in China as elsewhere the desire to lower morbidity and mortality risks has led to ever more resources being invested in health care When such investment is supported primarily by funds derived from taxation an increasing burden is placed on a country's economy This is particularly the case as in China with its one child policy where the proportion of the elderly population consuming health care is rising

These policy challenges are compounded by moral diversity De facto humans do not share one morality Instead they rank cardinal

human goods and right making conditions in different orders often not sharing an affirmation of the same goods or views of the right
