Lyric Poetry and Social Identity in Archaic Greece Jessica Romney,2020-04-22 Lyric Poetry and Social Identity in Archaic Greece examines how Greek men presented themselves and their social groups to one another The author examines identity rhetoric in sympotic lyric how Greek poets constructed images of self for their groups focusing in turn on the construction of identity in martial themed poetry the protection of group identities in the face of political exile and the negotiation between individual and group as seen in political lyric By conducting a close reading of six poems and then a broad survey of martial lyric exile poetry political lyric and sympotic lyric as a whole Jessica Romney demonstrates that sympotic lyric focuses on the same basic behaviors and values to construct social identities regardless of the content or subgenre of the poems in question The volume also argues that the performance of identity depends on the context as well as the material of performance Furthermore the book demonstrates that sympotic lyric overwhelmingly prefers to use identity rhetoric that insists on the inherent sameness of group members All non English text and quotes are translated with the original languages given alongside the translation or in the endnotes

Autonomy, Enactivism, and Mental Disorder Michelle Maiese,2022-06-30 This book brings together insights from the enactivist approach in philosophy of mind and existing work on autonomous agency from both philosophy of action and feminist philosophy It then utilizes this proposed account of autonomous agency to make sense of the impairments in agency that commonly occur in cases of dissociative identity disorder mood disorders and psychopathy While much of the existing philosophical work on autonomy focuses on threats that come from outside the agent this book addresses how inner conflict instability of character or motivational issues can disrupt agency In the first half of the book the author conceptualizes what it means to be self governing and to exercise autonomous agency In the second half she investigates the extent to which agents with various forms of mental disorder are capable of exercising autonomy In her view many forms of mental disorder involve disruptions to self governance so that

agents lack sufficient control over their intentional behavior or are unable to formulate and execute coherent action plans. However, this does not mean that they are utterly incapable of autonomous agency; rather, their ability to exercise this capacity is compromised in important respects. Understanding these agential impairments can help to deepen our understanding of what it means to exercise autonomy and also devise more effective treatments that restore subjects' agency. Autonomy, Enactivism, and Mental Disorder will be of interest to researchers and advanced students working in philosophy of mind, philosophy of action, philosophy of psychiatry, and feminist philosophy.

Conservation Psychology Susan Clayton, Gene Myers, 2011-09-19. This textbook introduces the reader to the new and emerging field of Conservation Psychology, which explores connections between the study of human behavior and the achievement of conservation goals. People are often cast as villains in the story of environmental degradation, seen primarily as a threat to healthy ecosystems and an obstacle to conservation. But humans are inseparable from natural ecosystems. Understanding how people think about experience and interact with nature is crucial for promoting environmental sustainability, as well as human well-being. The book first summarizes theory and research on human cognitive, emotional, and behavioral responses to nature and goes on to review research on people's experience of nature in wild, managed, and urban settings. Finally, it examines ways to encourage conservation-oriented behavior at both individual and societal levels. Throughout, the authors integrate a wide body of published literature to demonstrate how and why psychology is relevant to promoting a more sustainable relationship between humans and nature.
