Regional Inequality And Structural Changes:

Regional Inequality and Structural Changes Eduardo A. Haddad, 2018-10-26 Published in 1999 The liberalization process in Latin America during the 1990s resulted in the increase and diversification of trade in the region Brazil as a major player strengthened its insertion into the world economy through the adoption of strategies for opening up markets and of new production technologies complemented more recently by the creation of a broadly based stabilization plan In this context issues related to structural changes in the economy such as those involving the complexity of new international trading agreements and their impact on the Brazilian economy warrant special attention The results of this study suggest that the interplay of market forces in the Brazilian economy favour the more developed region of the country **Regional Inequality and Structural Changes in the Brazilian Economy** Eduardo Amaral Haddad, 1998 Growth, Structural Change and Regional Inequality in Malaysia Asan Ali Golam Hassan, 2017-11-30 Economic development in the long run is seen as a process of structural change that is affected by economic growth Malaysia is one of the middle income economies that are going through rapid structural change Since the mid 1980s it has changed to an industrially based economy with large scale export of electrical and electronic components However thirty years after Malaysia's redistributive policies have been exercised regional inequality still exists This book examines the nature and impact of regional policies in relation to the patterns of demographic and economic structural change and in relation to growth distribution and income disparities across regions in Peninsular Malaysia The book also explores the degree to which differences in regional manufacturing distribution and concentration have contributed to regional inequality It concludes with a number of recommendations for regional policies that will reduce this inequality Regional Inequality and Development Takahiro Akita, Mitsuhiko Kataoka, 2022-07-14 This book addresses three main issues in regional income inequality and development meaning of regional inequality measurement of regional inequality and the relationship between national economic development and regional income inequality It provides analytical methods useful in exploring the determinants of regional inequality in income and productivity Some software commands in Stata statistical software package available for the measurement and analysis of income inequality are also introduced Some researchers have argued that spatial concentration of population in and around major cities and the concurrent increase in regional inequality do not hinder national economic development and may stimulate it Nevertheless many national governments seek to promote balanced regional economic development and reduce regional income inequality because unbalanced development and higher levels of regional inequality may cause political or ethnic conflicts between different regions of the country As the applications of the analytical methods introduced in the first part of the book the second part presents four independent empirical studies on regional inequality and development in Indonesia They offer very interesting case studies for the formulation of policies and programs to reduce regional inequalities because as the world's largest archipelagic country with more than 13 thousand islands and 300 ethnic

groups Indonesia is spatially diverse in terms of its ecology natural resource endowments economy ethnicity and culture This book can be used as a textbook for undergraduate and graduate students who are interested in national economic development and regional income inequality It is also beneficial for practitioners and policy makers who are in charge of the formulation implementation and evaluation of development policies and programs

Regional Disparities in Small Countries Daniel Felsenstein, Boris A. Portnov, 2005-12-28 1 2 Daniel Felsenstein and Boris A Portnov 1 Department of Geography Hebrew University of Jerusalem Israel 2 Department of Natural Resources and Environmental Management University of Haifa Israel During the Candiot War of 1645 1669 the Ottoman Sultan Ibrahim I ordered his chief admiral to attack Malta Fearing imminent defeat by the superior Venetian forces stationed on the island the admiral decided to trick the sultan out of the idea As the story goes he placed a candle on his naval map allowing the wax to drip on the tiny island until it was completely covered Then he exclaimed in false surprise Malta Yok There is no Malta and convinced the sultan to sail his fleet to the Island of Crete instead Although Malta is not featured in this volume most of the countries it covers are of wax drip size Intuitively it may be expected that everything in small countries is diminutive distances population economies and even regional inequalities Thus at a symposium on The Challenge of Development convened in Israel in 1957 to mark the inauguration of a new building for the Department of Economics at the Hebrew University of Jerusalem the eminent US economist Simon Kuznets stated that developed small states seem to have succeeded

in spreading the fruits of economic growth more widely among their populations than the larger states at comparable levels of income per capita **Structural Change and Income Distribution** Guanghai Wan, 2017 This study explores the relationship between inequality and structural transformation by constructing a theoretical model developing analytical frameworks and implementing a case study The general equilibrium model we develop demonstrates that inequality exhibits an inverted U shape as structural change proceeds from onset to completion Our analytical frameworks enable decomposition of total inequality into sector contributions and a change in total inequality into a component attributable to structural transformation and the other component to concentration or spatial agglomeration Applying the decomposition frameworks to data from the People's Republic of China yield various interesting findings and more importantly confirms the inverted U shape as predicted by our theoretical model **The Economic Development of Europe's Regions** Joan Ramón Rosés, Nikolaus Wolf, 2018-11-06 This book is the first quantitative description of Europe's economic development at a regional level over the entire twentieth century Based on a new and comprehensive set of data it brings together a group of leading economic historians in order to describe and analyze the development of European regions both for nation states and for Europe as a whole This provides a new transnational perspective on Europe's quantitative development offering for the first time a systematic long run analysis of national policies independent from the use of national statistical units The new transnational dimension of data allows for the analysis of national policies in a more thorough way than ever before The book provides a comprehensive database at the level of modern NUTS 2 regions for the period 1900-2010 in 10 year intervals and a panoramic view of economic development both below and above the national level It will be of great interest to economic historians economic geographers development economists and those with an interest in economic growth **How to Achieve Inclusive Growth** Valerie Cerra, Barry Eichengreen, Asmaa El-Ganainy, Martin Schindler, 2022 This authoritative book explains the sources and scale of current economic challenges and proposes solutions to craft a brighter future by building a sustainable green and inclusive society in the years ahead **Designing Integrated Industrial Policies Volume II** Shigeru Thomas Otsubo, Christian Samen Otchia, 2020-12-01 Very little has been written on industrialization and deindustrialization in Asia and Africa This reference work sheds illuminating light upon the industrial development in Asia and Africa It also provides an in depth look into China's engagement and migrant labour in Africa The book also addresses the roles of public private partnership PPP and international development cooperation and how they are fundamental to industrialization in Asia and Africa Designing Integrated Industrial Policies will be a very useful reference particularly as a how to guide on industrial promotion and designing integrated industrial policies not only for economic growth and job creation but also for inclusive development It comes with country cases and illustrates useful tools for industrial policy simulation and for evidence based policy making through these concrete examples *Impact Evaluation of Infrastructure Interventions* Henrik Hansen, Ole Winckler Andersen, Howard White, 2013-09-13 The focus on results in development agencies

has led to increased focus on impact evaluation to demonstrate the effectiveness of development programmes This book illustrates the broad range of methods available for counterfactual analysis of infrastructure programmes such as establishment rehabilitation and maintenance of roads water supply and electrical power plants and grids Understanding the impact of interventions requires understanding of the context in which the intervention takes place and the channels through which it is expected to occur For infrastructure interventions it is particularly important to identify the links between the input and the outcomes and impacts because the well being of people the ultimate impact does not change directly as a consequence of the intervention Therefore impact evaluation of infrastructure programmes typically requires mixing both quantitative and qualitative approaches as illustrated in many of the contribution to this edited volume This book was originally published as a special issue of the Journal of Development Effectiveness

Liberalization, Growth and Regional Disparities in India Madhusudan Ghosh, 2013-01-18 Upon the backdrop of impressive progress made by the Indian economy during the last two decades after the large scale economic reforms in the early 1990s this book evaluates the performance of the economy on some income and non income dimensions of development at the national state and sectoral levels It examines regional economic growth and inequality in income originating from agriculture industry and services In view of the importance of the agricultural sector despite its declining share in gross domestic product it evaluates the performance of agricultural production and the impact of agricultural reforms on spatial integration of food grain markets It studies rural poverty analyzing the trend in employment the trickle down process and the

inclusiveness of growth in rural India It also evaluates the impact of microfinance as an instrument of financial inclusion on the socio economic conditions of rural households Lastly it examines the relative performance of fifteen major states of India in terms of education health and human development An important feature of the book is that it approaches these issues applying rigorously advanced econometric methods and focusing primarily on their regional disparities during the post reform period vis vis the pre reform period It offers important results to guide policies for future development
