Regionalization For Development And Accession To The European Union:

Regionalization for Development and Accession to the European Union Gérard Marcou, 2002 **Enlargement of the European Union** Allan F. Tatham, 2009-01-26

The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty. A significant upshot of these issues is that the concept of European identity defined in terms of such factors as culture, history and economics has supplanted the long dominant theme of widening and deepening, particularly since the Union's expansion has become primarily eastward. The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view, focusing on the concerns of stakeholders and the identity conflicts and uncertainties incurred by enlargement initiatives. In the course of its presentation, it details the actual pre-accession Europeanization process and its complex history. Among the key elements discussed are the following: the conflict between widening and deepening and the effect on EU institutional reform; institutional requirements on candidate countries; pre-accession criteria and negotiations; administrative capacity; judicial capacity and legal approximation in accession states; capacity of the EU to absorb new Member States and EC law as part of European identity. Also covered are specific historical details of particular pre-accession negotiations, e.g. Greece, Spain, Portugal, Malta and Cyprus; the still inconclusive negotiations with Turkey and the Western Balkan states; and political factors involved in the non-accession of Norway, Iceland and Switzerland. Assembling powerful evidence and applying incisive analysis, the author's conclusion shows that, absent further and major EU institutional reform, it will be difficult for an enlarging Union to continue to deliver the goods. A watershed in the continuing great debate on the fulfilment of the EC Treaty's determination to foster and promote an ever closer union of the peoples of Europe, this book will prove invaluable to anybody interested in the European integration project, particularly lawyers, academics, officials and policymakers in the EU Member States.

Europeanization and Regionalization in the EU's Enlargement to Central and Eastern Europe J. Hughes, G. Sasse, 2004-10-12

This book is a study of EU conditionality and compliance during the enlargement to the Central and Eastern European candidate countries. EU conditionality for membership is widely understood as having been a driving force for Europeanization, providing incentives and sanctions for compliance or non-compliance with EU norms such as the Copenhagen Criteria and the adoption of the *acquis communautaire*. By taking regional policy and regionalization as a case study, this book provides a comparative analysis of the effects of conditionality on the Central and East European countries and explores the many paradoxes and weaknesses in the use of EU conditionality over time.

EU Accession and Spanish Regional Development Carolyn Marie Dudek, 2005

Policymakers saw European Community membership as a way for Spain to secure democracy and promote economic development throughout the country. Nevertheless, regional economic disparities still persist in Spain almost twenty years after it entered the Community, despite significant European allocation of funds to remedy underdevelopment. How did the policies of the European Union impact Spain? What lessons can new EU members

learn from Spain's experience within the European Union Using rich empirical evidence and an innovative comparative analysis this book examines the regional experiences of Galicia and the Valencian Community in Spain The political dynamics and persistence of clientelism which affect policymaking and policy implementation within each region are particularly considered These cases provide new insight to explain why regional economic differences persist in Spain despite efforts to alleviate them Historically grounded and detailed this study analyzes the process of accession and the ignored long term ramifications of accession negotiations and treaties it focuses on the often overlooked contradiction between European regulations and regional development policies and questions whether EU membership has been as beneficial as policymakers thought it would be

Regionalism Contested Henrik Halkier, 2016-12-05 As we move further into the 21st century the prominence of regions can no longer be taken for granted A certain skepticism has developed with regard to the feasibility of marginal regions achieving self sustained growth and states have maintained their role as regulators of economic and social activities Thus the notion of the region and its significance is currently much debated and contested Illustrated with a wide range of European case studies this volume brings together the main strands of these contestations as economic political and social actors attempt to institutionalise their vision of their region as the dominant form of territorial governance It questions both the external delimitation and the internal constitution of regions and critically analyses the societal processes circumscribing ways in which regions are created maintained and undermined The volume provides a wide range of analytical perspectives to enable an understanding of the current mosaic of regionalism in Europe

Democratization and the European Union Leonardo Morlino, Wojciech Sadurski, 2010-05-31 This book examines in depth the impact of the EU on aspects of the quality of democracy in eight selected post communist countries Considering both the political and legal aspects of the dynamics among institutions and focussing on inter institutional accountability the book analyses how constitutional designs have been effectively implemented to achieve this and to what extent this was the result of EU action In order to make a comparative assessment of the EU on democracies the book features detailed case studies according to their different status vis vis the EU including older new member states Poland and Hungary newer new member states Romania and Bulgaria potential candidates Albania and Serbia and neighbour and remote neighbour states Ukraine and Armenia Each chapter addresses a range of dimensions and most relevant domains of inter institutional accountability that is executive legislative relationships constitutional justice decentralisation and regionalism and the role of ombudsman or other relevant authorities Seeking to assess how important the role of the EU has been in influencing the modes and characteristic of democracies and fundamental rights established in these regions this book will be of interest to students and scholars of comparative politics

Overcoming Fragmentation in Southeast Europe

Panayiotis Getimis, 2017-11-28 With the expansion of the European Union the countries of Southeast Europe have finally been brought together within one socio political entity The restructuring of these economies following globalization and neoliberalization has meant that this region has become much more open to geopolitical shifts and trends While the various countries have all entered into the slow process of European integration the historic fragmentation of this region has led to various conflicts and contradictions in the restructuring and transition of national economies This volume provides a theoretical and comparative overview which examines the prospects for spatial cohesion in this region With the need to handle persisting problems and conflicts from the past while coping with new economic and political structures Southeast Europe proves to be a challenging yet fruitful testing ground for how best to overcome fragmentation and establish a long term process of social and economic integration *The European Union's 2007 Enlargement* Cristina Chiva, David

Phinnemore, 2014-07-10 This book fills a significant gap in recent literature on European Union politics by examining the EU's other eastern enlargement completed in 2007 with the accession of Bulgaria and Romania It focuses on both the process and the effects of the 2007 enlargement within the wider context of the post communist countries accession to the EU and more broadly within the context of the history of EU enlargement The book brings together in depth analyses of a wide range of issues both from a comparative perspective and through single case studies Individual contributions shed new light onto EU enlargement through a theoretical re evaluation of the strategic action paradigm as well as through historical analyses of the 2007 enlargement and of its implications for future EU enlargements Further insight into the process of EU enlargement is gained through systematic exploration of the impact of accession on policy making and institutional structures in Bulgaria and Romania Altogether the contributions exemplify the multi faceted nature of EU enlargement and accession as well as the extent to which the process of acceding to the EU is not completed with membership either for the EU or for the candidate countries This book was published as a special issue of *Perspectives on European Politics and Society*

Spreading Democracy and the Rule of Law? Wojciech Sadurski, Adam Czarnota, Martin Krygier, 2006-07-30 The accession of eight post communist countries of Central and Eastern Europe and also of Malta and Cyprus to the European Union in 2004 has been heralded as perhaps the most important development in the history of European integration so far While the impact of the enlargement on the constitutional structures and practices of the EU has already generated a rich scholarly literature the influence of the accession on constitutionalism democracy human rights and the rule of law among the new member states has been largely ignored This book fills this gap and addresses the question of the consequences of

the external force of European enlargement upon the understanding and practice of democracy and the rule of law and among both the main legal political actors and the general public in the new member states A number of leading legal scholars sociologists and political scientists both from Central and Eastern Europe and from outside address these issues in a systematic and critical way Taken together these essays help answer a fundamental question does the European Union have the potential of promoting and consolidate democracy and human rights

Union have become a major pillar for the security and stability for Europe as a whole These essential functions can only be perpetuated if the Union can project its capacities and capabilities beyond its current borders Today s European agenda is defined by integration Offering prospects for membership in the EU has been a successful instrument for helping shape the transition in East Central Europe The imminent first round of enlargement also calls for a deep ening of EU integration which should be resolved through the EU Convention While the European Union is preparing for ten new member states developments in Europe are far from standing still The countries beyond the EU s future borders in Eastern Europe and the Balkans are undertaking a threefold process of national con solidation transition to a market economy and strengthening parliamentary democ racy These processes entail risks that range from authoritarian regimes to armed es calation in Southeastern Europe These risks have a direct impact on European secu rity and stability At the same time some areas of internal transition are making seri ous strides toward Western standards For this reason simply reducing Eastern and Southeastern Europe to a set of risks threatens to create a self fulfilling prophecy
