Reichen & Robert Alain Pélissier,1994 **Reichen & Robert** Bernard Reichen,Philippe Robert,2003 Relatively few French architects have successfully secured a position for themselves in international architecture yet Bernard Reichen and Philippe Robert have realised projects in Greece in Australia in the USA in Qatar since they founded their office in 1973 They have made a name for themselves with their conversions of 19th century buildings such as the Grande Halle de la Villette and the Pavillon de l Arsenal in Paris and increasingly issues deriving from urban development and landscape planning are featuring in their work This book opens with an interview of Bernard Reichen and Philippe Robert which reveals their approach to architecture and urban design In the main part of the book some 80 buildings and projects are presented and documented including the development of the plans of one of the sites of the 2004 Olympic Games in Athens and the headquarters of Nestle France in a former chocolate factory *Industrial Heritage Sites in Transformation* Harald A. Mieg,Heike Oevermann,2014-08-07 The management of industrial heritage sites requires rethinking in the context of urban change and the issue of how to balance protection preservation conservation and development becomes all the more crucial as industrial heritage sites grow in number This brings into play new challenges not only through the known conflicts between monument preservation and contemporary architecture but also with the increasing demand for economic urban development by reusing the built heritage of former industrial sites This book explores the conservation and change of industrial heritage sites in transformation presenting and examining ten European and Asian case studies The interdisciplinary approach of the book connects a diversity of rationales and discourses including monument protection World Heritage conventions urban regeneration urban planning and design architecture and politics This is the first book to deepen the understanding of industrial heritage site management as a networked multi dimensional task involving diverse social agents and societal discourses **Design Book Review** ,1995 **Whitaker's Books in Print** ,1998 Books In Print 2004-2005 Ed Bowker Staff,Staff Bowker, Ed,2004 Steel Contruction Manual Helmut C. Progressive Architecture ,1985 *Architecture* ,2004 **Das Schweizer Buch** ,1994 Technologie- und Wissenschaftszentren - Beispiele Barbara Brunnert-Bastian,Thomas Schloz,1995 **Przestrzeń publiczna miasta postindustrialnego** Mieczysław Kochanowski (prof. nadzw. dr hab. inż. arch.),2005 *Meaning in Architecture, now* Carlo Deregibus,Aurosa Alison,2024-10-15 The connection between form and meaning has been so intrinsic and obvious that it has been implicit for centuries Then around fifty years ago the issue of meaning suddenly burst into the architectural world with many scholars and practitioners bustling to introduce semiology and semiotics into design Now after the globalisation and the atomisation of thoughts of the last decades those debates could seem pretty meaningless the form being mainly an aesthetic feature or a counterfeit fetish for everchanging feeble poetics Yet we continue to design produce and critique architecture attributing meanings intentions and hopes to its forms Once more we will explore and discuss the elusive yet unavoidable connection between meaning and architecture four thematic sections to understand the place and dimension of meaning in of from to after or maybe even for Architecture **Urban Textile Mills** Heike Oevermann,2021-08-02 Urban textile mills shaped European cities from the late 18th century The decline of the textile sector in many of the original locations has meant that converting and repurposing these historic industrial complexes has become a new opportunity and important task in many European cities The novel contribution of this book is that it examines not only the period of industrialization the historic emergence of four urban mill types but also focuses on recent processes of their repurposing and correlations between both periods and processes The book contributes to the case specific knowledge of 20 textile mills in Europe by analysing their development as industrial complexes beginning with the first steam driven mills in Manchester from the end of the 18th century towards their conservation and conversion in the 21st century including the manifold layers of time The work promotes the often conflictive task of achieving an appropriate balance between conserving urban textile mills as documents of the past and adapting them to present and future needs
