Reinventing The Administrative State:

Reinventing the Administrative State Michael E. Norris, 2000 **Reinventing the Administrative State** Michael E. Norris, 2000-04-26 Reinventing government is a well established political program that has been pursued in a number of forms throughout the twentieth century Many of these programs share similar goals of economy and efficacy but they have suffered largely from a persistent inability to achieve their objectives in any significant way In this timely work Michael Norris perceptively analyzes the reasons for the failure of recent programs to correct the weaknesses of government He argues that the current reinvention movement has fallen well short of its original goals and demonstrates that the disparity between the original claims of the movement and its results to date has been caused by structural political bureaucratic and internal barriers Norris meticulously examines each of these barriers providing new insights and potential solutions to the long standing problem of government inefficiency Those with an interest in political science American government and public policy will find much to their liking in this thought provoking volume **Reinventing the State** Carol Wise, 2003-01-17 Publisher Description **Judicializing the Administrative State** Hiroshi Okayama, 2019-05-10 A basic feature of the modern US administrative state taken for granted by legal scholars but neglected by political scientists and historians is its strong judiciary Formal or court like adjudication was the primary method of first order agency policy making during the first half of the twentieth century Even today most US administrative agencies hire administrative law judges and other adjudicators conducting hearings using formal procedures autonomously from the agency head No other industrialized democracy has even come close to experiencing the systematic state judicialization that took place in the United States Why did the American administrative state become highly judicialized rather than developing a more efficiency oriented Weberian bureaucracy Legal scholars argue that lawyers as a profession imposed the judicial procedures they were the most familiar with on agencies But this explanation fails to show why the judicialization took place only in the United States at the time it did Okayama demonstrates that the American institutional combination of common law and the presidential system favored policy implementation through formal procedures by autonomous agencies and that it induced the creation and development of independent regulatory commissions explicitly modeled after courts from the late nineteenth century These commissions judicialized the state not only through their proliferation but also through the diffusion of their formal procedures to executive agencies over the next half century which led to a highly fairness oriented administrative state **In Search of Better Governance in South Asia and Beyond** Ishtiaq Jamil, Steinar Askvik, Tek Nath Dhakal, 2013-06-26 The pursuit for better governance has assumed center stage in developmental discourse as well as reform initiatives of all organizations working for the public welfare and includes such issues as service delivery and responding to citizens needs and demands In the era of globalization multilevel and new modes of governance are changing the traditional governance models of nation states accelerated by technological innovation rising citizen expectation policy intervention from international and

multilateral donor communities and the hegemony of western ideology imposed on many developing nations However a universally accepted and agreed upon definition of governance still remains elusive There is no consensus or agreement as to what would be the nature and form of governance and public administration The question that is raised Is there a universal governance mechanism that fits in all contexts or governance mechanisms should be based on home grown ideas One can see various programs and policies of reforms and reorganizations in public administration in the developing countries but these efforts have not been effective to address the challenging issues of economic development employment generation poverty reduction ensuring equality of access to public services maintaining fairness and equity security and safety of citizens social cohesion democratic institution building ensuring broader participation in the decision making process and improving the quality of life Therefore there is a widespread concern for better governance or sound governance to bridge the gap between theory and practice making this book of interest to academics as well as policy makers in global public administration

Redefining EU Membership, 2024-07-19 Redefining EU Membership examines the issue of Membership within the European Union EU today by focusing on differentiation in and outside the EU The Treaty on European Union unequivocally declares that the contracting parties are the Member States of the EU However a closer examination casts some doubt of the unitary status of Member States or at least suggests that the concept requires nuancing Whilst diversity and to some extent differentiation have been part and parcel of the European integration process since its inception Redefining EU Membership proposes that considering several developments a new reflection on membership within the EU and on differentiation in and outside the EU is required The volume s contributions are organized around four aspects of the tensions faced by the concept of a unitary and formal EU membership first an examination of key policy areas which have already witnessed various forms of differentiated integration second an analysis of special statuses within the EU third important examples of non Member States in which EU law is applied with and without their participation in the EU s decision making process and fourth the situation of states under accession or secession procedures which obliges them to accept EU norms and policies even prior to after formal membership These analyses are complemented by a reflection on the concept of membership in itself In a context in which EU enlargement appears likely the provided analysis reflects on the need to expand and introduce several kinds of membership to the EU in the future
