The single most important purpose of this book is to create a field of public administration values a field that currently does not exist in a recognizable form Surely values are discussed significantly and usefully by the fields of ethics management decision making and organization behavior and theory to mention only a few But these discussions are inevitably narrower in scope than is necessary for a true field of values Such a field is needed to help bridge the seeming chasm about discussions of values among the established fields A second purpose of this text is to provide a comprehensive treatment of values A third purpose of the text is to provide a balanced treatment giving all the major schools of thought roughly the same coverage so that their values can be compared as dispassionately as possible A fourth purpose of the book is to make the subject accessible to and interesting for practitioners and students

**Deregulating the Public Service** John J. DiIulio, 2011-02-01 The nation's federal state and local public service is in deep trouble Not even the most talented dedicated well compensated well trained and well led public servants can serve the public well if they must operate under perverse personnel and procurement regulations that punish innovation and promote inefficiency Many attempts have been made to determine administrative problems in the public service and come up with viable solutions Two of the most important the 1990 report of the National Commission on the Public Service led by former Federal Reserve chairman Paul A Volcker and the 1993 report of the National Commission on the State and Local Public Service led by former Mississippi Governor William F Winter recommended deregulating the public service Deregulating the public service essentially means altering or abolishing personnel and procurement regulations that deplete government workers creativity reduce their productivity and make a career in public service unattractive to many talented energetic and public spirited citizens But will it work With the benefit of a historical perspective on the development of American public service from the days of the progressives to the present the contributors to this book argue that deregulating the public service is a necessary but insufficient condition for much of the needed improvement in governmental administration Avoiding simple solutions and quick fixes for long standing ills they recommend new and large scale experiments with deregulating the public service at all levels of government In addition to editor John DiIulio the contributors are Paul A Volcker former chairman of the Federal Reserve now at Princeton University former Mississippi Governor William F Winter Gerald J Garvey Princeton John P Burke University of Vermont Melvin J Dubnick Rutgers Constance Horner former director of the Federal Office of Personnel Management now at Brookings Mark **New Frontiers in Social Innovation Research** Alex Nicholls, Julie Simon, Madeleine Gabriel, Christopher Whelan, 2015-09-18
