Reiser Umemoto Recent Projects:

Reiser and Umemoto Benjamin, 1998-06-01 Reiser + Umemoto Andrew Benjamin, Reiser + Umemoto, 1998-08-31
This is an architectural monograph on the work of New York based Jesse Reiser and Nanako Umemoto It provides descriptions of their theories and design and is illustrated in colour with original images New Flatness Alicia Imperiale, 2000-08-01 In recent architecture theory and practise there has been a tendency to refer to exteriors as a skin concealing an interior as opposed to the traditional and more physical concepts of surface flatness and depth The computer now enables the architect to call his design into life free from the rigid material form and view it as a flexible and interactive creation In this book the concepts of flatness and surface tension are examined in the light of virtual design and built reality A selection of projects are presented to show how the architects regard space and surfaces in modern architectural practice in a digital age Projects and Their Consequences Jesse Reiser, 2019-05-28 Projects and Their Consequences presents fifteen key projects from leading architectural thinkers Reiser Umemoto Projects and Their Consequences traces thirty years of innovative multidisciplinary investigations of form structure technique and planning Projects include large scale studies of infrastructure for the East River Corridor and Hudson Yards areas in Manhattan and the Alishan Railway in Taiwan as well as schemes for cultural institutions including the New Museum Children s Museum of Pittsburgh and University of Applied Arts Vienna Also included are thought provoking textual projects narrative works that blur the boundaries of art and architecture Projects and Their Consequences balances incisive interviews and essays with more than 400 strikingly original drawings collages and paintings Large format and beautifully designed it is a necessary volume for architects and those interested in the intersection of architecture art and culture *Architectural Philosophy* Andrew E. Benjamin, 2000-01-01 Architectural Philosophy is the first book to outline a philosophical account of architecture and to establish the singularity of architectural practice and theory This dazzling sequence of essays opens out the subject of architecture touching on issues as wide ranging as the problem of memory and the dystopias of science fiction Arguing for the indissolubility of form and function Architectural Philosophy explores both the definition of the site and the possibility of alterity The analysis of the nature of the present and the complex sructure of repetition allows for the possibility of judgement a judgement that arises from a reworked politics of architecture **New Scapes** Paola Gregory, 2003-04-01 Since the famous competition for the Park La Villette in Paris where the participants included Bernard Tschumi Peter Eisenman and Gilles Deleuze the relationship between building and landscape has been dramatically transformed Concepts such as metamorphosis and interaction layers and fields are becoming as much a part of architectonic discourse as the practical designs and the realization Author Paola Gregory examines this interplay between buildings and landscapes present in today s architecture scene illustrating her analysis with exciting examples including the ecological landscapes of James Wines and Greg Lynn the virtual environments of Marcos Novak and Nox buildings by Jean Nouvel and Toyo Ito which actively incorporate passers by and surroundings by

means of new media **The Architect** Maggie Toy, 2001 The objective of this book is to banish the notion of architecture being a male dominated field by showcasing the work of a wide variety of world class women architects demonstrating the role women are playing in contemporary architecture First book of its kind to survey the role of women in architecture Features a wide international selection of world class contemporary women architects Beautifully illustrated throughout

Current Contents. Arts & Humanities Institute for Scientific Information, 2001 **BIM Design** Richard Garber, 2014-08-11 Building information modelling BIM is revolutionising building design and construction For architects BIM has the potential to optimise their creativity while reducing risk in the design and construction process thus giving them a more significant role in the building process This book demonstrates how innovative firms are using BIM technologies to move design away from the utilitarian problems of construction engaging them in a stunning new future in the built environment Whereas recent books about BIM have tended to favour case study analyses or instruction on the use of specific software BIM Design highlights how day to day design operations are shaped by the increasingly generative and collaborative aspects of these new tools BIM strategies are described as operations that can enhance design rather than simply make it more efficient Thus this book focuses on the specific creative uses of information modelling at the operational level including the creative development of parametric geometries and generative design the evaluation of environmental performance and the simulation and scheduling of construction fabrication operations This book also engages BIM's pragmatic efficiencies such as the conflict checking of building systems and the creation of bills of quantities for costing and in so doing it demonstrates how BIM can make such activities collaborative Throughout projects are used to illustrate the creative application of BIM at a variety of scales These buildings showcase work by firms executing projects all over the world SHoP Architects and Construction New York Morphosis Los Angeles Populous London GRO Architects New York Reiser Umemoto New York Gensler Shanghai and UNStudio Amsterdam *Performatism* Yasha J. Grobman, Eran Neuman, 2012 This book critically examines the implications and influences of computer based design on form as performance In the context of the architectural discourse the book posits that today about fifteen years into the age of digital architecture we can define architectural form and performance as an ism The book is supported by a wealth of case studies from some of the top firms across the globe and contributed to by some of the top names in this field With a unique and insightful emphasis on professional practice this is essential reading for all architects aspiring and practicing *Beyond the Edge* Raymond Gastil, 2002-10-25 Through an insightful look at projects from around the world and at the current design proposals for New York itself the author paints a portrait of redevelopment that is both pragmatic and visionary one that holds the promise of reconnecting New Yorkers to their waterfront as a vital place of work and of public life **BOOK JACKET**

Natural Born Caadesigners Christian Pongratz, Maria Rita Perbellini, 2000 In the USA the generation of 30 40 year old architects has a number of remarkable achievements to show for itself Although this generation encompasses a broad

spectrum of architectural genres it is clear that there is one common factor which differentiates them from the previous generation they were literally born with the computer This book reports on how this new tool has influenced and affected the quality of designing looking at the most interesting protagonists of the electronic generation together with their most important projects The authors live in New York and are themselves active in this field Digital Workflows in Architecture Scott Marble, 2012-12-21 The logics of digital processes in architecture have begun to structure the way that architects design the way that builders build and the way that industry is reorganizing The process of architectural design has become a complex workflow At the core of the shift toward more expansive forms of digital production within the design and construction industry is the integration of communication through digital networks The goal is to develop a continuous easily accessible and parametrically adaptable body of information that coordinates the process from design through a building's lifecycle Organized around the key fields of Designing Design Designing Assembly and Designing Industry this book is a reference work on digital technologies as key factors in architectural design fabrication and workflow organization It presents essays and case studies from some of the leading voices on the topic AA Files, 2000 **Pulsation in Architecture** Eric Goldemberg, 2012 Pulsation in Architecture highlights the role of digital design as the catalyst for a new spatial sensibility related to rhythmic perception It proposes a novel critical reception of computational architecture based on the ability of digital design to move beyond mere instrumentality and to engage with core aspects of the discipline the generative engine of digital architecture reinvigorates a discourse of part to whole relationships through the lens of rhythmic affect There is a paradigm shift in spatial perception due to the intense use of computational techniques and the capacity to morph massive amounts of data in spatial patterns rhythm plays a pivotal role in the articulation of the topology of buildings generating the atmospheric character that induces moods and throbbing sensations in space Pulsation introduces the fundamental animate capacity of living form and reshapes our perception of architectural space across the multiple scales of a project from digital inception to fabrication An emerging thread of rhythmic sensibility loosely binds a survey of contemporary design practices including contributions by Peter Eisenman Jeff Kipnis Greg Lynn UNStudio Preston Scott Cohen Reiser Umemoto Asymptote Ali Rahim Hernan Diaz Alonso Ruy Klein Gage Clemenceau NOX Evan Douglas Studio kokkugia and MONAD Studio *Systems Upgrade* Leire Asensio Villoria, David Mah, 2022-01-05 The book submits that a deep study of legacy material artifacts through the lens of contemporary digital design can constitute a valuable bridge between design history and contemporary creative practice Systems Upgrade focuses on an investigation into the ways that we may re-describe and upgrade these design legacies for extension in future practice The book explicates this through a deep dive into the re-description and re-design of the works of Austrian American sculptor and designer Erwin Hauer Systems Upgrade offers a design research approach that leverages the embodied knowledge latent within the material legacies of design history for direct applicability in creative practice This long spanning research into the construction of

links between the deep study of precedent and future practice has been advanced through a simultaneous engagement with digital archeology and the new tools of creative practice Invested in the belief of a need to open design and its material legacies to a multiverse this research has yielded a collection of methods techniques and novel outcomes grounded in history yet openly speculative in outlook Systems Upgrade extensively illustrates an engagement with some of the most notable works of the Austrian American sculptor and designer Erwin Hauer This book highlights several important phases of this specific design research project to provide a detailed view of how a series of bridges between analysis to creative practice may be achieved

Dictionary of Today's Landscape Designers Pierluigi Nicolin, Francesco Repishti, 2003 The aim of the book is to illustrate the different ways of understanding landscape creating a dictionary that can convey not just the scope of the designing processes and their related actors but to provide a first key for interpreting the various approaches to this discipline that has given rise to an entirely new dimension in designing the cityscape turning the open space of the city into a space for art and sculpture for garden and architecture and into a new field for cultural activity It documents the surprising extent of the planning experience and profiles world renowned architects engineers landscape architects artists and photographers It also provides the reader with a key interpretation of the different approaches to an experience that has introduced a new dimension in the physical transformation of our environment The dictionary features leading figures from the international scene including Tadao Ando Emilio Ambasz Daniel Buren Tony Cragg Walter de Maria Michael Heizer Nancy Holt Toyo Ito Anish Kapoor Rem Koolhaas Maya Lin Richard Long and James Turrell to name a few Over the last decade the concept of landscape has dramatically changed References to the discipline of landscape architecture can be found in urban planning in projects that reconstruct large disused areas in the design of public spaces parks and private gardens in Land Art and in photography This field has come to greater prominence with the increase in public projects and by keeping pace with new theoretical approaches and design practices This volume will be an invaluable reference for anyone involved in urban planning public art landscape architecture and landscape design

The Architecture Co-laboratory Kas Oosterhuis, Lukas Feireiss, 2006 Publicatie na v de conferentie gehouden op 1 april 2006 op de faculteit Bouwkunde van de TU Delft over de huidige en toekomstige veranderingen rond de digitaal ontworpen architectuur en designpraktijk

Bodies in Code Mark B. N. Hansen, 2012-10-02 Bodies in Code explores how our bodies experience and adapt to digital environments Cyberculture theorists have tended to overlook biological reality when talking about virtual reality and Mark B N Hansen's book shows what they've been missing Cyberspace is anchored in the body he argues and it's the body not high tech computer graphics that allows a person to feel like they are really moving through virtual reality Of course these virtual experiences are also profoundly affecting our very understanding of what it means to live as embodied beings Hansen draws upon recent work in visual culture cognitive science and new media studies as well as examples of computer graphics websites and new media art to show how our bodies are in some ways already becoming virtual
