Shafer, 2012-12-06 Masters Theses in the Pure and Applied Sciences was first conceived published and disseminated by the Center for Information and Numerical Data Analysis and Synthesis CINDAS at Purdue University in 1957 starting its coverage of theses with the academic year 1955 Beginning with Volume 13 the printing and dissemination phases of the activity were transferred to University Microfilms Xerox of Ann Arbor Michigan with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volumes were handled by an internal and broader dissemination publishing house to assure improved service Hence starting with Volume 18 Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York and in the same year the coverage was broadened to include Canadian universities All back issues can also be ordered from Plenum We have reported in Volume 30 thesis year 1985 a total of 12 400 theses titles from 26 Canadian and 186 United States universities We are sure that this broader base for these titles reported will greatly enhance the value of this important annual reference work **Relational Database Design with Microcomputer Applications** Glenn A. Jackson, 1988 Presented in nonmathematical terms this book prepares the reader to design implement and query a relational database Jackson discusses both the entity relationship method and functional dependencies and defines relevant terms He illustrates the problems related to redundant functional dependencies and points out the pitfalls in design and implementation He also presents a case study involving a bowling league Jackson describes the problem identifies attributes constructs the universal relation moves the redundancies and decomposes the relation into four relations He also implements the case study database in both dBASE III and R base 5000 The techniques developed here are useful not only for systems created for microcomputers but other database management systems also ISBN 0 13 771841 1 20 00 **Air University Abstracts of Research Reports**, 1986 Scientific and Technical Aerospace Reports, 1991-05 Cutting Edge Technologies And Microcomputer Applications For Developing Countries Tien-tung Hsueh, 2019-04-08 This report is based on a conference on the applications of microcomputers in development sponsored by the U S Agency for International Development and the U S National Academy of Sciences in collaboration with a host country Implementation and Analysis of a Microcomputer Based Relational Database System T.
