Relationships And Development:

Relationships and Development W. W. Hartup, Z. Rubin, 2013-05-13 Based on presentations made at a conference sponsored by the Social Science Research Council's Committee on Social and Affective Development During Childhood held at Harwichport Mass in June 1982

Relationships as Developmental Contexts W. Andrew Collins, Brett Laursen, 1999-03-01 The volume's topic was chosen in part because of the rapidly growing salience of dyadic research perspectives in developmental psychology but also in social psychology and in fields such as communication and family studies. It provides the most complete representation now available on current theory and research on the significance of personal relationships in child and adolescent development. This volume addresses the ways in which the study of social development has been altered by an emphasis on research questions and techniques for studying children and adolescents in the context of their significant dyadic relationships. Leading scholars, many of them pioneers in the concepts and methods of dyadic research, have contributed chapters in which they both report findings from recent research and reflect on the implications for developmental psychology. Their work encompasses studies of relationships with parents, siblings, friends, and romantic partners. Opening chapters set the stage by describing the key characteristics of social development research from a dyadic perspective and outlining key themes and contemporary issues in the field. It concludes with commentaries from distinguished senior scholars identifying important directions for future research.

Relationships in Development Stephen Seligman, 2017-11-07 The recent explosion of new research about infants, parental care, and infant-parent relationships has shown conclusively that human relationships are central motivators and organizers in development. *Relationships in Development* examines the practical implications for dynamic psychotherapy with both adults and children, especially following trauma. Stephen Seligman offers engaging examples of infant-parent interactions as well as of the psychotherapeutic process. He traces the place of childhood and child development in psychoanalysis from Freud onward, showing how different images about babies evolved and influenced analytic theory and practice. *Relationships in Development* offers a new integration of ideas that updates established psychoanalytic models in a new context: Relational developmental psychoanalysis. Seligman integrates four crucial domains: Infancy Research, including attachment theory and research; Developmental Psychoanalysis; Relational intersubjective Psychoanalysis; Classical Freudian, Kleinian, and Object Relations theories, including Winnicott. An array of specific sources are included: developmental neuroscience, attachment theory and research, studies of emotion, trauma, and infant-parent interaction, and nonlinear dynamic systems theories. Although new psychoanalytic approaches are featured, the classical theories are not neglected, including the Freudian, Kleinian, Winnicottian, and Ego Psychology orientations. Seligman links current knowledge about early experiences and how they shape later development with the traditional psychoanalytic attention to the irrational, unconscious, turbulent, and unknowable aspects of the mind and human interaction. These different fields are taken together to offer an open and flexible

approach to psychodynamic therapy with a variety of patients in different socioeconomic and cultural situations Relationships in Development will appeal to psychoanalysts psychoanalytic psychotherapists and graduate students in psychology social work and psychotherapy The fundamental issues and implications presented will also be of great importance to the wider psychodynamic and psychotherapeutic communities

Development and Vulnerability in Close Relationships Gil G. Noam, Kurt W. Fischer, 1996 How do people develop in their important relationships How do two people come together to form a new close relationship How do relationships affect or determine who we are and who we become These questions should be central to the study of mind and development but most researchers neglect relationships and focus instead on analyses of individuals as if people were basically alone experiencing occasional fleeting moments with other people Research based on this individualist assumption has dominated the behavioral and clinical sciences but there are other voices and they are growing In this book many of the scholars who are moving relationships and attachments back to the center of human development outline their central concepts findings and perspectives People are fundamentally social and relationships are part of the fabric of being human forming an essential foundation that molds each person's mind and action A mind does not reside in one person but in relationships and communities composed of many people's interconnected minds which mutually support and define each other From the start and throughout life each person develops strengths and vulnerabilities in important relationships in communities and cultures Those relationships are so central to each person's activity and experience that without them no scientific explanation can even begin to analyze mind and action There is no mind without other people There is no psychological vulnerability that does not involve others The contributors to this book aim to establish a firm foundation for the role of relationships in human activity and health and to promote strong research by bringing together in one place most of the best research and theory on development and relationships Their goal is to stimulate a more radical inclusion of relationships in mind an ecological focus on the ways that relationships constitute action feeling and thought

Positive Approaches to Optimal Relationship Development C. Raymond Knee, Harry T. Reis, 2016-04-08 Integrates recent theoretical and empirical research on facilitating the optimal development of close relationships

Sinnott, 2014-07-08 Relationships especially close relationships are among the

most important aspects of life for most of us Close relationships reach to the very heart of our happiness but exactly what processes or skills over the course of a lifetime help us learn to relate to one another more and more deeply and to grow past the differences and problems that might divide us Adult Development applies the concept of complex postformal thought in order to explore how certain cognitive processes support individuals close relationships such that those relationships grow stronger and richer over time Complex postformal thought allows a person to deal with everyday logical contradictions by letting that person understand that reality and meaning are co created In this way postformal thought enables adults to bridge two contradictory but logical positions and reach an adaptive synthesis of them through a higher order logic Taking this inquiry a step further Sinnott examines the role played by postformal thought in intimate relationships those between spouses partners parents and children siblings and close friends Sinnott argues that postformal thought seems to develop later in life and is somewhat akin to the concept of wisdom Based on 30 years of research this book diverges from typical contributions to this field by discussing positive adult development in the context of close relationships Rather than focusing on the emergence of deficits of adulthood and particularly aging Sinnott instead explores the cognitive processes that are important in creating and sustaining close ongoing relationships

Close Relationships Clyde Hendrick, 2000 The authors in the volume extend the reach of their comprehensive reviews into theoretically driven and innovating explorations The scope of coverage across and within chapters is striking The developmentalist the methodologist the feminist the contextualist and the cross culturalist alike will find satisfaction in reading the chapters Catherine A Surra The University of Texas at Austin The science of close relationships is relatively new and complex Close Relationships A Sourcebook represents the growing maturity of this multidisciplinary enterprise The volume offers 26 chapters organized into four thematic areas relationship methods forms processes and threats as well as a foreword and an epilogue The volume provides a panoramic view of close relationship research as it enters the 21st century offering highlights from current literature original research practical applications and projections for future research Relationship Methods includes both qualitative and quantitative chapters Relationship Forms includes many of the stages types and roles that characterize intimate relationships In a developmental fashion chapters address social networks children s friendships adolescent relationships adult friendships and friendships in later life Chapters on multicultural and multiracial relationships and gay lesbian and bisexual relationships illustrate the variety of relationship forms that the science of close relationships must consider The alignments and realignments of traditional family structure are considered in terms of contemporary marriage divorce and single parenting and remarried families Relationship Processes includes chapters on emotion attachment romantic love sexuality intimacy communication conflict social support and relational maintenance The important topic of gender concludes the section The shadow side of human nature is explored in the Relationship Threats section with chapters on infidelity and jealousy physical and sexual aggression depression and loss and bereavement A foreword by Ellen Berscheid sets the stage for this broad ranging

collection of chapters Steve Duck and Linda Acitelli conclude with an epilogue that provides a new beginning for the science of close relationships

Power, Control, and Influence in Sibling Relationships across Development Nicole Campione-Barr, 2017-06-12 Take a close look at sibling relationships particularly how siblings navigate power control and influence and how the relationship affects the development of the individuals involved While such relationships are both complementary and reciprocal they transform rather dramatically from hierarchical in early and middle childhood to egalitarian by early adulthood This issue examines the processes and consequences of such dynamic power shifts for our broader understanding of how these relationship dynamics change and develop throughout the life course how such dynamics may be similar or different cross culturally and how they influence the quality of the sibling relationship as well as the well being of youth To do so the authors present research from each developmental period from early childhood through young adulthood as well as cross cultural research in order to further understanding of the developmental and contextual themes that allow for drawing broader conclusions This is the 156th volume in this Jossey Bass series New Directions for Child and Adolescent Development Its mission is to provide scientific and scholarly presentations on cutting edge issues and concepts in this subject area Each volume focuses on a specific new direction or research topic and is edited by experts from that field

Personal Relationships and Personal Networks Malcolm R. Parks,2017-09-25 The effort to understand personal relationships has traditionally focused on the individual characteristics of participants Personal Relationships and Personal Networks takes this analysis a step further focusing on research linking participants feelings and actions within a given personal relationship to the larger social context surrounding it Author Malcolm R Parks expands on the idea that the initiation development maintenance and dissolution of relationships are inextricably connected to each participant s social network a perspective that allows for a better

appreciation of our connection to the world and a greater understanding our significant power as social actors This book offers a new way to consider basic notions about how relationships form such as how particular people meet and how relationships are started Among many findings the volume demonstrates that individuals in relationships feel closer and generally more connected when they also have a greater amount of contact with the members of each other s personal networks and when they believe that network members support their relationship Additional topics discussed include how this social context model is applicable to different types of relationships how participants interact with network members how social networks are involved in the deterioration of personal relationships and what drives change in relationships Students researchers and professionals in a wide variety of disciplines such as communication psychology sociology anthropology family studies clinical psychology public health nursing education and social work will find this book useful as will anyone seeking to better understand their own personal relationships
