Project Management process is mainly intended to serve as a general information guide for the young and fresh engineers who enter into the project management consultancy environment. The organizations may provide a broad outline of the project management in general during the induction program at entry level. But it is still desirable to have a complete idea and total understanding of the project management functions on a day-to-day basis. This aspect of project management is highlighted in the Part A of this book. Part A provides a bird's-eye view of the very beginning of development of engineering as a profession with a holistic view of traditional project management and the project scenarios and project execution methods with an emphasis on how the project engineering is done. What are the basic steps in the Engineering Design Process etc. Part B is on the infrastructure engineering of a grass-root mega project. This is an extension of the pre-project activities presented in Part A. It is aimed at providing project management process from ground preparation to setting up the required plant facilities. As quality is an essential part of the deliverable products and services, project quality and project engineering quality aspects are also presented as per Quality Systems Management System Requirements based on ISO 9001:2015. *Engineering and Science Education for Nuclear Power* International Atomic Energy Agency, 1986.
