Sibling Interaction Across Cultures Theoretical And Methodological Issues:

Sibling Interaction Across Cultures Patricia G. Zukow, 2012-12-06 Sibling Interaction Across Cultures is a collection of studies focusing on the role siblings play in the social emotional and cognitive development of their younger siblings Unlike much previous research on sibling relationships these studies share the underlying assumption that social interaction plays a significant role in the acquisition and transmission of cultural knowledge and social understanding The contributors evaluate the advantages as well as limitations of current methodological issues directly affecting sibling research and assess the various theoretical perspectives underpinning these methodologies Drawing from empirical cross and intra cultural research this volume lays new groundwork for identifying universal environmental and culture specific aspects of the role of siblings in child development **Sibling Interaction Across Cultures** ,1989 **Sibling Development** Jonathan Caspi, 2010-10-25 I heartily recommend Sibling Development CFLE Network Newsletter National Council on Family Relations Sibling relationships have a major influence on a person's development and behavior yet until now the topic has been seriously underrepresented in the professional literature Sibling Development Implications for Mental Health Practitioners addresses this gap by examining the range of developmental clinical and cultural issues related to sibling relationships It highlights positive sibling relationships as a source of strength and resilience at the other end of the spectrum it addresses sibling abuse a dangerous and underdiagnosed condition It demonstrates the crucial support that siblings can provide each other in families experiencing mental illness substance abuse divorce and other stressors It also considers issues of cultural and ethnic diversity gender disability and sexual orientation as they relate to siblings and their families Each chapter provides case studies to illustrate how theory and empirical findings can be incorporated into culturally informed treatment and offers implications for practice and future research It is an essential resource for all practitioners researchers students and educators who work with or study siblings Key Features Examines the role of siblings as cultural educators and socializing agents Offers empirically derived treatment approaches for siblings and families Discusses lesbian gay bisexual and transgender siblings Includes case studies to demonstrate how to integrate theory and empirical findings into practice Looks at sibling dynamics in families with mental illness substance abuse and divorce as well as siblings of individuals with disabilities Discusses sibling relationships in transracial adoptive families **Retrospect and Prospect in the Psychological Study of Families** James P. McHale, Wendy S. Grolnick, 2001-10 This vol is designed to review the knowledge base of family psychologists from a broader perspective than that of specific research programs Intended readers include family psychologists as well as sociologists anthropologists clinicians and policymakers **Handbook of Parenting** Marc H. Bornstein, 2005-02-16 Please see Volume I for a full description and table of contents for all four volumes Sibling Issues in Therapy Avidan Milevsky, 2016-01-26 Incorporating the latest research and clinical work in family dynamics this book examines multiple angles of integrating sibling issues which underlie issues at the core of many clinical difficulties

presented by adult clients in therapy to improve adulthood emotional and psychological well being Sibling Relationships Across the Life Span Victor Cicirelli, 2013-03-14 When one begins to examine the existing literature dealing with siblings one soon becomes aware that many separate domains of sibling research exist and that there is little connection between them for example sibling relationships in early childhood genetic and environmental influences on individual differences between siblings dysfunctional sibling relationships adult sibling helping relationships sibling violence and abuse and so on The author's aim in writing this book was to attempt to bring together for the first time studies from diverse areas of sibling research into a single volume The book is a summary and integration of the various domains of sibling studies extending across the life span where studies exist to make this possible Although many gaps in the sibling research literature within and between domains of study and over the life span still exist it is hoped that this book will motivate others to help fill in the gaps by suggesting directions where further research is needed **Children's Social Worlds in Cultural Context** Tiia Tulviste, Deborah L. Best, Judith L. Gibbons, 2019-09-10 This book addresses cultural variability in children's social worlds examining the acquisition development and use of culturally relevant social competencies valued in diverse cultural contexts It discusses the different aspects of preschoolers social competencies that allow children including adopted immigrant or at risk children to create and maintain relationships communicate and to get along with other people at home in daycare or school and other situations Chapters explore how children's social competencies reflect the features of the social worlds in which they live and grow In addition chapters examine the extent that different cultural value orientations manifest in children's social functioning and describes how parents in autonomy oriented cultures tend to value different social skills than parents with relatedness or autonomous relatedness orientations The book concludes with recommendations for future research directions Topics featured in this book include Gender development in young children Peer interactions and relationships during the preschool years Sibling interactions in western and non western cultural groups The roles of grandparents in child development Socialization and development in refugee children Child development within institutional care Children's Social Worlds in Cultural Context is a valuable resource for researchers clinicians practitioners and graduate students in developmental psychology child and school psychology social work cultural anthropology family studies and education *Siblings in Adolescence* Aiden Sisler, Angela Ittel, 2014-11-27 How do brothers and sisters shape one another Siblings in Adolescence provides a comprehensive overview of the most up to date international empirical research on the sibling bond during the critical adolescent years The authors examine how the relationship impacts on adolescent development as well as the effect on and within the family using evidence from behaviour genetics cross cultural studies and research utilizing both quantitative and qualitative methods The book presents a multi faceted dynamic view of the adolescent sibling relationship drawing on perspectives from sociological psychological and ecological and systems science It introduces a novel theoretical perspective which covers sibling dynamics across various key environments such as their

families communities and cultures Parents and siblings will also find useful coverage of the following issues school and life transitions parental separation health illness and disability diverse family experiences Siblings in Adolescence will be indispensable for advanced undergraduate and postgraduate students studying human development and will supplement postgraduate courses for teachers counsellors and social youth and health workers It will also be required reading for all those who work and do research with families and young people

Handbook of Social Development Vincent B. Van Hasselt, Michel Hersen, 2013-11-11 Social development over one's lifetime is a complex area that has received considerable attention in the psychological social psychological and sociological literature over the years Surprisingly however since 1969 when Rand McNally published Goslin's Handbook of Socialization no comprehensive statement of the field has appeared in book form Given the impressive data in this area that have been adduced over the last two decades we trust that our handbook will serve to fill that gap In this volume we have followed a lifespan perspective starting with the social interactions that transpire in the earliest development stages and progressing through childhood adolescence adulthood and finally one's senior years In so doing we cover a variety of issues in depth The book contains 21 chapters and is divided into five parts I Theoretical Perspectives II Infants and Toddlers III Children and Adolescents IV Adults and V The Elderly Each of the parts begins with introductory material that reviews the overall issues to be considered Many individuals have contributed to the final production of this handbook Foremost are our eminent contributors who graciously agreed to share with us their expertise We also thank our administrative and technical staff for their assistance in carrying out the day to day tasks necessary to complete such a project Finally we thank Eliot Werner Executive Editor at Plenum for his willingness to publish and for his tolerance for the delays inevitable in the development of a large handbook
