The Encyclopedic Sourcebook of New Age Religions James R. Lewis, 2004-08-30 In the late 1980s the New Age movement became the focus of both media attention and widespread ridicule as some of the more outlandish aspects of the movement such as channeling and the use of crystals for healing briefly piqued the public's curiosity While the movement was at its height scholars of religion generally sneered at what was perceived to be a daffy shallow craze and ignored it as a subject of serious study Professor James R Lewis was among the first to examine this growing religious phenomenon scientifically In previous books he has investigated the New Age as the most visible manifestation of a significant spiritual subculture the roots of which reach back to Theosophy Spiritualism and New Thought The present collection pursues this theme bringing together some of the best recent scholarship on new religions Since the height of its popular influence the New Age has declined in strength but has given rise to a plethora of new denominations all shaped by New Age ideas and spirituality Reflecting the emergence of this new denominational

structure the core chapters of this book focus on specific groups Other chapters examine the movement s historical roots A unique feature of Dr Lewis s work is his inclusion of extensive selections from New Age literature thus allowing readers to experience firsthand the unusual perspectives of the various groups This is a fascinating examination of a significant and persistent religious and social phenomenon

Mobility and migration were not uncommon in Byzantium as is true for all societies Yet scholarship is only beginning to pay attention to these phenomena This book presents in English translation a wide array of relevant source texts from ca 650 to ca 1450 originally written in medieval Greek from administrative records saints lives and letters by churchmen to ego documents by ambassadors and historical narratives by court historians Each source text is accompanied

by a detailed introduction commentary and further bibliography thus making the book accessible to both scholars and students and laying the groundwork for future research on the internal dynamics of Byzantine society *Women and Writing in Medieval Europe: A Sourcebook* Carolyne Larrington, 2003-09-02 Carolyne Larrington has gathered together a uniquely comprehensive collection of writing by for and about medieval women spanning one thousand years and Europe from Iceland to Byzantium The extracts are arranged thematically dealing with the central areas of medieval women's lives and their relation to social and cultural institutions Each section is contextualised with a brief historical introduction and the materials span literary historical theological and other narrative and imaginative writing The writings here uncover and confound the stereotype of the medieval woman as lady or virgin by demonstrating the different roles and meanings that the sign of woman occupied in the imaginative space of the medieval period Larrington's clear and accessible editorial material and the modern English translations of all the extracts mean this work is ideally suited for students *Women and Writing in Early Europe A Sourcebook* also contains an extensive and fully up to date bibliography making it not only essential reading for undergraduates and post graduates but also a valuable tool for scholars **Source Book on Gibberellin, 1828-1957** Frank Harold Stodola, 1958
