The King of the Wood** James George Frazer, 1911 Frazer's series which attempted to define the shared elements of religious belief and scientific thought discussing fertility rites human sacrifice the dying god the scapegoat and many other symbols and practices whose influences had extended into 20th century culture His thesis is that old religions were fertility cults that revolved around the worship and periodic sacrifice of a sacred king Frazer proposed that mankind progresses from magic through religious belief to scientific thought      Computer Aided Verification Sharon Shoham, Yakir Vizel, 2022-08-05 This open access two volume set LNCS 13371 and 13372 constitutes the refereed proceedings of the 34th International Conference on Computer Aided Verification CAV 2022 which was held in Haifa Israel in August 2022 The 40 full papers presented together with 9 tool papers and 2 case studies were carefully reviewed and selected from 209 submissions The papers were organized in the following topical sections Part I Invited papers formal methods for probabilistic programs formal methods for neural networks software Verification and model checking hyperproperties and security formal methods for hardware cyber physical and hybrid systems Part II Probabilistic techniques automata and logic deductive verification and decision procedures machine learning synthesis and concurrency This is an open access book      Animism, Magic, and the Divine King Giza Rsheim, 2005-12-01 If the ancient kingdom of Sumer was the due of the serpent or bull hero who defeated the old serpent or bull and had access to the Divine Mother we can understand why her love appears to be a dangerous boon in later ages For year by year the chosen of Ishtar has to encounter a foe of his own blood and one of the two bulls is dispatched to the country without return from The Divine King Thoroughly fascinating and totally engrossing this 1930 work is an exploration of myth and magic in ancient cultures and how they tapped into the most elemental of human experiences sex death tribalism and war to lay the foundations of modern religion contemporary politics and even the tradition of scientific inquiry Armchair anthropologists readers of comparative mythology and anyone interested in the fundamental basis of the human subconscious will find this book extraordinarily enlightening Hungarian anthropologist GZA RHEIM 1891 1953 was the first professor of anthropology at the University of Budapest a position he held from 1919 to 1938 when he fled to the United States to escape the unrest of Europe just prior to World War II He is also the author of The Riddle of the Sphinx 1934 The Origin and Function of Culture 1943 The Eternal Ones of the Dream 1945 and The Gates of the Dream 1952      Aftermath James George Frazer, 2013-08-29 A supplement to Frazer's The Golden Bough this 1936 work remains an important text for scholars of religion and anthropology      *Carbon Footprints as Cultural-Ecological Metaphors* Anita Girvan, 2017-10-10 Through an examination of carbon footprint metaphors this book demonstrates the ways in which climate change and other ecological issues are culturally and materially constituted through metaphor The carbon footprint metaphor has achieved a ubiquitous presence in Anglo North American public contexts since the turn of the millennium yet this metaphor remains under examined as a crucial mediator of political responses to the urgent crisis of climate change Existing books and articles

on the carbon footprint typically treat this metaphor as a quantifying metric with little attention to the shifting mediations and practices of the carbon footprint as a metaphor This gap echoes a wider gap in understanding metaphors as key figures in mediating more than human relations at a time when such relations profoundly matter As a timely intervention this book addresses this gap by using insights from environmental humanities and political ecology to discuss carbon footprint metaphors in popular and public texts This book will be of great interest to researchers and students of environmental humanities political ecology environmental communication and metaphor studies

**In Motion** Tony Hiss, 2017-10-18 In this extraordinarily wide ranging insightful and revelatory book Tony Hiss is the much praised author of *The Experience of Places* delves into a unique and instantly recognizable though previously undescribed experience that can happen to us when we travel a special understanding and ability that can leave us feeling exhilarated He illustrates how throughout human history from our ancestors walking upright for the first time to astronauts walking on the moon we have repeatedly availed ourselves of this seemingly elusive quality which he calls Deep Travel The sensation of Deep Travel can overtake us Hiss says whenever we tap into a sophisticated wide awake awareness we all possess With a wealth of examples from evocative accounts of his own journeys to celebrated travel writing across the centuries Hiss identifies and rescues this powerful capacity and sets out simple techniques for accessing it no matter where we are And this is only a jumping off point for an original and penetrating explanation of how Deep Travel radically alters our perception of not only where we are but also when we are by placing us in an extended present and how it acts as an open sesame to enlarge and enrich the world around us Going even further he investigates how we can remain absolutely still but travel in time itself as our horizons move backward to include layers of nature and human culture that have gone before or project us forward to consider what our actions will mean to those who will inhabit our spot on earth a few generations from now Whether travel takes you around the corner or around the world once you've read *In Motion* no journey will ever feel the same
