Magic In Theory An Introduction To The Theoretical And Psychological Elements Of Conjuring:

Magic in Theory Peter Lamont, Professor Richard Wiseman, 2005-10-28 A useful manual for any magician or curious spectator who wonders why the tricks seem so real this guide examines the psychological aspects of a magician's work Exploring the ways in which human psychology plays into the methods of conjuring rather than focusing on the individual tricks alone this explanation of the general principles of magic includes chapters on the use of misdirection sleight of hand and reconstruction provides a better understanding of this ancient art and offers a section on psychics that warns of their deceptive magic skills

Popular Performance Adam Ainsworth, Oliver Double, Louise Peacock, 2017-04-20 There is no fourth wall in popular performance The show is firmly rooted in the here and now and the performers address the audience directly while the audience answer back with laughter applause or heckling Performer and role are interlaced so that we are left uncertain about just how the persona we see onstage might relate to the private person who presents it to us Popular Performance defines and surveys varieties of performance where the main purpose is to entertain and where there is no shame in being trivial frivolous or nonsensical as long as people go home happy at the end of the show Contributions by new and established scholars focus particularly on how it is made explaining the techniques of performance and production that make it so appealing to audiences With sections examining how popular performance works in a range of historical and contemporary examples readers will gain insights into performance forms associated with the variety tradition music hall vaudeville cabaret variety performance forms associated with circus wild west shows clowning issues relating to the identity of the performer in relation to magic burlesque pantomime in contemporary performance issues relating to venue and audience in relation to contemporary street theatre stand up and live sketch comedy

The Psychology of Magic and the Magic of Psychology Amir Raz, Jay A. Olson, Gustav Kuhn, 2016-11-18 Magicians have dazzled audiences for many centuries however few researchers have studied how let alone why most tricks work The psychology of magic is a nascent field of research that examines the underlying mechanisms that conjurers use to achieve enchanting phenomena including sensory illusions misdirection of attention and the appearance of mind control and nuanced persuasion Most studies to date have focused on either the psychological principles involved in watching and performing magic or neuromagic the neural correlates of such phenomena Whereas performers sometimes question the contributions that modern science may offer to the advancement of the magical arts the history of magic reveals that scientific discovery often charts new territories for magicians In this research topic we sketch out the symbiotic relationship between psychological science and the art of magic On the one hand magic can inform psychology with particular benefits for the cognitive social developmental and transcultural components of behavioural science Magicians have a large and robust set of effects that most researchers rarely exploit Incorporating these effects into existing experimental even clinical paradigms paves the road to innovative trajectories in the study of human behaviour For example magic provides an elegant way to study the behaviour of

participants who may believe they had made choices that they actually did not make Moreover magic fosters a more ecological approach to experimentation whereby scientists can probe participants in more natural environments compared to the traditional lab based settings Examining how magicians consistently influence spectators for example can elucidate important aspects in the study of persuasion trust decision making and even processes spanning authorship and agency Magic thus offers a largely underused armamentarium for the behavioural scientist and clinician On the other hand psychological science can advance the art of magic The psychology of deception a relatively understudied field explores the intentional creation of false beliefs and how people often go wrong Understanding how to methodically exploit the tenuous twilight zone of human vulnerabilities perceptual logical emotional and temporal becomes all the more revealing when top down influences including expectation symbolic thinking and framing join the fray Over the years science has permitted magicians to concoct increasingly effective routines and to elicit heightened feelings of wonder from audiences Furthermore on occasion science leads to the creation of novel effects or the refinement of existing ones based on systematic methods For example by simulating a specific card routine using a series of computer stimuli researchers have decomposed the effect and reconstructed it into a more effective routine Other magic effects depend on meaningful psychological knowledge such as which type of information is difficult to retain or what changes capture attention Behavioural scientists measure and study these factors By combining analytical findings with performer intuitions psychological science begets effective magic Whereas science strives on parsimony and independent replication of results magic thrives on reproducing the same effect with multiple methods to obscure parsimony and minimise detection This Research Topic explores the seemingly orthogonal approaches of scientists and magicians by highlighting the crosstalk as well as rapprochement between psychological science and the art of deception

Narrative Imagination and Everyday Life Molly Andrews,2014-02 Looks at how stories imagination come together in our daily lives influencing not only our thoughts about what we see and do but also our contemplation of what is possible and what our limitations are **Magic** Richard Wiseman,2023-08-15 Join magician author and psychologist Richard Wiseman as he journeys into the secretive world of magic and uncovers the surprising therapeutic and educational benefits of making the impossible possible **Secular Magic and the Moving Image** Max Sexton,2017-12-14 The power of the moving image to conjure marvelous worlds has usually been to understand it in terms of move magic On film a fascination for enchantment and wonder has transmuted older beliefs in the supernatural into secular attractions But this study is not about the history of special effects or a history of magic Rather it attempts to determine the influence and status of secular magic on television within complex modes of delivery before discovering interstices with film Historically the overriding concern on television has been for secular magic that informs and empowers rather than a fairytale effect that deceives and mystifies Yet shifting notions of the real and the uncertainty associated with the contemporary world has led to television developing many different modes that have become capable of constant hybridization The dynamic interplay between certainty and indeterminacy is the key to understanding secular magic on television and film and exploring the interstices between them Sexton ranges from the real time magic of street performers such as David Blaine Criss Angel and Dynamo to Penn and Teller s comedy magic to the hypnotic acts of Derren Brown before finally visiting the 2006 films The Illusionist and The Prestige Each example charts how the lack of

clear distinctions between reality and illusion in modes of representation and presentation disrupt older theoretical oppositions *Secular Magic and the Moving Image* not only re evaluates questions about modes and styles but raises further questions about entertainment and how the relations between the program maker and the audience resemble those between the conjuror and spectator By re thinking these overlapping practices and tensions and the marking of the indeterminacy of reality on media screens it becomes possible to revise our understanding of inter medial relations **The Ashgate**
