Heavy Elements And Related New Phenomena (In 2 Volumes) Walter Greiner, Raj Kumar Gupta, 1999-06-17 This book reviews recent developments in the field of superheavy elements and the related phenomena of fission cluster radioactivity and drip line physics Both the experimental and theoretical aspects are dealt with in detail For the production of new elements in the laboratory the process of cold compound nucleus formation is found to be most favorable both theoretically and experimentally However experimentally hot fusion of nuclei has also been used Both the physical and chemical methods of synthesizing new elements are discussed The theoretical approaches considered here are those of the quantum mechanical fragmentation theory the self consistent Hartree Fock theory and the relativistic mean field theory Fission a process inverse to the fusion of two nuclei is also observed to be most favourably a cold phenomenon Other important results are bi modal fission and high n multiplicity fission which leads to the hyperdeformed scission mode Cluster radioactivity is discussed both as a heavy cluster emission process and as super asymmetric fission The theory as well as the present experimental status are reviewed Physics at drip lines is interesting not only for their structural properties but also for their use in the fusion of two nuclei both aspects are discussed

Introduction to Cluster Dynamics Paul-Gerhard Reinhard, Eric Suraud, 2008-07-11 Clusters as mesoscopic particles represent an intermediate state of matter between single atoms and solid material The tendency to miniaturise technical objects requires knowledge about systems which contain a small number of atoms or molecules only This is all the more true for dynamical aspects particularly in relation to the quick development of laser technology and femtosecond spectroscopy Here for the first time is a highly qualitative introduction to cluster physics With its emphasis on cluster dynamics this will be vital to everyone involved in this interdisciplinary subject The authors cover the dynamics of clusters on a broad level including recent developments of femtosecond laser spectroscopy on the one hand and time dependent density functional theory calculations on the other
