Children and Mother Nature Rouhollah Aghasaleh, 2019-08-26 It is an old yet relevant argument that education needs to focus more on real-world issues in students' lives and communities. Nevertheless, conventional school curricula in many countries create superficial boundaries to separate natural and social worlds. A call for science learning approaches that acknowledge societal standpoints accumulate that human activities are driving environmental and evolutionary change, which has led scholars to investigate how different societies respond to environmental change. *Children and Mother Nature* is a multilingual volume that represents indigenous knowledges from various ethnic, linguistic, geographical, and national groups of educators and students through storytelling. Authors have identified indigenous stories, fables, and folk tales with a theme of human-nature interaction and facilitated storytelling sessions with groups of students in K-8, grade 5-14 years old in Turkey, Greece, US, Jamaica, Brazil, Saudi Arabia, and Chinese and Korean language-speaking communities in the US. Students have discussed and rewritten/retold the stories.

collaboratively and illustrated their own stories All student told stories are presented in the original language along with an English translation This volume provides authentic materials for teachers to use in their classrooms and could also be of interest to educational literary and environmental researchers to conduct comparative and international studies **Female Friendship** Ida Day, Slav N.
