Kimball, 2013-06-17

Helping America Vote is focused on the conflict between values of access and integrity in U.S. election administration, examining both what was included in the Help America Vote Act and what was not. Widespread agreement that voting equipment was a problem made technology the centerpiece of the legislation but there is still reason to be concerned about key aspects of electronic voting, ballot design, and the politics of partisan administrators.

Conducting Research Surveys via E-mail and the Web Matthias Schonlau, Ronald D., Jr. Fricker, Marc N. Elliott, 2002-02-15 Internet based surveys although still in their infancy are becoming increasingly popular because they are believed to be faster better cheaper and easier to conduct than surveys using more traditional telephone or mail methods Based on evidence in the literature and real life case studies this book examines the validity of those claims The authors discuss the advantages and disadvantages of using e mail and the Web to conduct research surveys and also offer practical suggestions for designing and implementing Internet surveys most effectively Among other findings the authors determined that Internet surveys may be preferable to mail or telephone surveys when a list of e mail addresses for the target population is available thus eliminating the need for mail or phone invitations to potential respondents Internet surveys also are well suited for larger survey efforts and for some target populations that are difficult to reach by traditional survey methods Web surveys are conducted more quickly than mail or phone surveys when respondents are contacted initially by e mail as is often the case when a representative panel of respondents has been assembled in advance And although surveys incur virtually no coding or data entry costs because the data are captured electronically the labor costs for design and programming can be high

Understanding Research Methods Donijo Robbins, 2017-09-25 Managers and administrators in the public policy and nonprofit sectors rely heavily on analytical skills to quickly pore through a massive amount of research They dissect it and apply specific useful data that can inform critical policy changes and help them improve their organization's overall performance and financial position To master this vital role it is imperative that they and their staff learn to be more efficient at collecting analyzing and evaluating research material by discovering how to ask the right questions and quickly discern valuable information from useless data A Blueprint to Streamline Every Aspect of the Research Process Focusing on the entire research process from start to finish the compact but comprehensive Understanding Research Methods A Guide for the Public and Nonprofit Manager explores the research designs and analytical tools that are the foundation for decision making Relying more on concepts and analysis than on mathematics this text provides insight into the definition process importance and capabilities of research addressing the topic from the perspectives of both the

producer of data and the consumer who evaluates its usefulness Broken down into three sections the book Gives an overview of the research process the construction of measures and research ethics Elaborates on planning a research method presenting common research designs used by practitioners and the most useful popular ways to collect data Focuses on tools available to analyze and then communicate data specifically univariate and bivariate analyses This versatile text is intended for dual uses as a textbook for graduate and undergraduate students in public and nonprofit administration and public policy and as a practical guide for the average administrator Both groups will learn how to develop proper research questions define specific research purposes and form hypotheses that avoid confusion in measurement and analysis Imparting basic practical knowledge it outlines effective approaches to gather accurate relevant information and then effectively interpret and communicate it
