It also explores the ways in which they inform and condition military doctrine and the planning and the execution of military operations in the land, air, cyber and space domains as perceived through the lens of two of the most important military establishments in the Western Hemisphere: the United States and Brazilian militaries. The expert contributors promote a better awareness and comparative understanding of the rapidly changing diverse traditional and non-traditional challenges and demands of the 21st century. This volume will be useful to both scholars whose research focuses on international law and military professionals.

The United Nations and Space Security Annette Froehlich, Vincent Seffinga, 2019-08-10 This book provides a detailed analysis on the history and development of the Committee on the Peaceful Uses of Outer Space (UNCOPUOS) and the Conference on Disarmament (CD) and the coordination and cooperation between these two fora. Furthermore, it discusses the future challenges that these fora will have to deal with and conclude in which way the current system can change to cope with the evolution of space matters. This is necessary for the proper discussion of space matters because these matters cannot simply be divided between military and non-military but are interrelated.
