Newhagen, 2004 This is a focus on access to media including physical psychological and sociological components of media use Read the Cultural Other Shi-xu, Manfred Kienpointner, Jan Servaes, 2008-08-22 *Read the Cultural Other* contains studies on non Western discourse It has two principal aims Firstly it argues that the study of non Western non White and Third World discourses should become a legitimate necessary and routine part of international

discourse scholarship Hitherto non Western non White and Third World discourses have been relegated and marginalized to a local particular or other place in or one might argue outside the mainstream To reclaim their place the book deconstructs the rhetoric of universalism and the continued preoccupation with Western discourse in the profession and stresses the cultural nature of discourse both ordinary and disciplinary as it outlines a culturally pluralist vision Secondly in order to take the multicultural view seriously it explores the complexity diversity and forms of otherness of non Western discourse by examining the case of China and Hong Kong s discourses of the decolonization of the latter Far too often non Western discourse has been stereotyped as externally discrete internally homogeneous and formally containable within a universal general or integrated model The present work focuses on China and Hong Kong s discourses which have been marginalized by their Western counterparts Through culturally eclectic linguistic analysis and local cultural analysis it identifies and highlights the specific ways of speaking of China and Hong Kong their concepts concerns aspirations resistance verbal strategies etc with respect to similar or different issues The culturally pluralist view and analytical practice proffered here call for a radical cultural change in international scholarship on language communication and discourse

**Public Relations Research** Ansgar Zerfaß, A. A. van Ruler, Krishnamurthy Sriramesh, 2008-05-08 Introduction Sriramesh Van Ruler Zerfass Krishnamurthy Sriramesh Betteke van Ruler Ansgar Zerfass One could make a reasonable argument that public relations is an ancient practice going back millennia although it has been popularly perceived as a 20th century phenomenon Scholarship in public relations however is more recent in origin with a history of less than four decades During these formative years the body of knowledge has expanded significantly which is laudable However there is potential for growth and improvement in many areas of the public relations literature Over the decades among other things public relations scholarship has largely remained parochial to specific regions such as the United States the United Kingdom Latin America German speaking Europe etc as evidenced in the bibliographic references of many essays in this volume itself where authors predominantly cite work from their own regions This is often necessitated by linguistic differences with only English serving as the universal language that helps permeate knowledge through most regions Pedagogical and methodological factors also have

played a role in the regionalization of the body of knowledge. However, we believe that knowledge flows most when it is shared across different kinds of barriers. Globalization has made it essential for us to recognize this reality more than ever. This volume tries to bridge the gap and presents theories and concepts from researchers around the world. The Social Science Encyclopedia Adam Kuper, 2003-12-16. The Social Science Encyclopedia first published in 1985 to acclaim from social scientists, librarians, and students, was thoroughly revised in 1996 when reviewers began to describe it as a classic. This third edition has been radically recast. Over half the entries are new or have been entirely rewritten, and most of the balance have been substantially revised. Written by an international team of contributors, the Encyclopedia offers a global perspective on the key issues within the social sciences. Some 500 entries cover a variety of enduring and newly vital areas of study and research methods. Experts review theoretical debates from neo-evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences: What is the influence of genes on behaviour? What is the nature of consciousness and cognition? What are the causes of poverty and wealth? What are the roots of conflict: wars, revolutions, and genocidal violence? This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society. Digital Political Cultures in the Middle East since the Arab Uprisings Dounia Mahlouly, 2023-05-18. This book offers a ten-year perspective on ongoing and evolving practices of digital activism across the Middle East and North Africa, drawing on interviews and ethnographic evidence collected between 2012 and 2022. It examines the shifting narrative around digital activism in the region from the wake of the 2011 uprisings to the 2019 series of protests coined the second wave of the Arab Spring. It considers how media activists navigate the transition from the emergent to the mainstream in a climate of contentious politics following the civil mobilisations of the pro-revolutionary youths in Tunisia, Egypt, and Lebanon. It outlines the particularities of these three different political contexts and media environments, featuring case studies of the Tunisian blogosphere, online campaigning in the Egyptian elections, and interviews with social media activists. In light of this empirical evidence, the book offers a critique of the increasing prevalence of a security perspective through which online activism has been viewed and its deleterious effect on digital political engagement in the region. **Fearless Editing** Tim Pilgrim, Carolyn Dale, 2017-09-29. Fearless Editing clearly articulates the basic concepts underlying editing techniques and demonstrates their application for newspapers, public relations, magazines, and Web pages. This text takes a conceptual approach that integrates verbal skills with visual elements. Unlike other texts that are clearly designed for print, this book includes multi-media applications in every chapter.
