The New Nuclear Age Ankit Panda, 2025-01-31 The world is entering a new nuclear age Nuclear weapons are returning to the fore of international statecraft in ways unseen since the Cold War With major powers like Russia issuing threats of nuclear strikes China and North Korea continuing to grow their arsenals and new prospects for proliferation from the Middle East to East Asia the world has been thrust into a new era of heightened nuclear risk In this incisive book international security expert Ankit Panda explores the enduring and emerging factors that are contributing to this new nuclear age From strained great power ties to complex multipolar dynamics and the precipitous decline of arms control he shows how our coexistence with the bomb is becoming more complicated and perilous The prospect of nuclear escalation is again shaping how political decision makers and military establishments around the world think and act But unlike the peril of the Cold War a greater number of nuclear players and a plethora of new technologies including AI and exotic new weapons make the search for stability far from straightforward Managing the risks of a nuclear confrontation he argues will require new urgency and thinking to pull us back from the precipice of global catastrophe

Conventional Military Strategy in the Third Nuclear Age Joy Mitra, 2023-02-28 This volume delves into the way conventional deterrence operates between nuclear armed states in the third nuclear age Unlike the first and second ages the advent of this new age has witnessed greater strain on the principles of mutual vulnerability and survivability that may result in increased risks of advertent or inadvertent escalation and horizontal nuclear proliferation The book looks at the sum of three key simultaneous developments in the third nuclear age that merit attention These include the emergence of asymmetric strategies the introduction of unmanned platforms and the expansion of nuclear arsenals The volume discusses how these concurrent developments might shape the practice of conventional deterrence and provides useful insights into

conventional military dynamics not just among the current nuclear dyads but also ones that may emerge in future. It seeks answers to several key issues in state security not limited to: What purpose and scope does the conventional military instrument have in a state's overall military strategy versus other nuclear armed states? If mutual vulnerability and deterrence are the frameworks, why did the prospect of escalation appear in the first place? What are the trends political, doctrinal or technological that augment or diminish conventional and nuclear interface? With insights on military crises that have witnessed participation from nuclear armed states like the United States, Russia, China, Pakistan, and India, this book will especially be of interest to scholars and researchers working in the areas of security and deterrence studies, defence and strategic studies, peace and conflict studies, and foreign policy. It will also appeal to policymakers, career bureaucrats, security and defense practitioners, and professionals working with think tanks and embassies.

The Second Nuclear Age Paul Bracken, 2012-11-13. A leading international security strategist offers a compelling new way to think about the unthinkable. The cold war ended more than two decades ago and with its end came a reduction in the threat of nuclear weapons, a luxury that we can no longer indulge. It's not just the threat of Iran getting the bomb or North Korea doing something rash, the whole complexion of global power politics is changing because of the reemergence of nuclear weapons as a vital element of statecraft and power politics. In short, we have entered the second nuclear age. In this provocative and agenda setting book, Paul Bracken of Yale University argues that we need to pay renewed attention to nuclear weapons and how their presence will transform the way crises develop and escalate. He draws on his years of experience analyzing defense strategy to make the case that the United States needs to start thinking seriously about these issues once again, especially as new countries acquire nuclear capabilities. He walks us through war game scenarios that are all too realistic to show how nuclear weapons are changing the calculus of power politics, and he offers an incisive tour of the Middle East, South Asia, and East Asia to underscore how the United States must not allow itself to be unprepared for managing such crises. Frank in its tone and farsighted in its analysis, The Second Nuclear Age is the essential guide to the new rules of international politics.

The Second Nuclear Age Colin S. Gray, 1999. The author takes issue with the complacent belief that a happy mixture of deterrence, arms control, and luck will enable humanity to cope adequately with weapons of mass destruction, arguing that the risks are ever more serious.

Strategy in the Second Nuclear Age Toshi Yoshihara, James R. Holmes, 2012-12-01. A second nuclear age has begun in the post Cold War world. Created by the expansion of nuclear arsenals and new proliferation in Asia, it has changed the familiar nuclear geometry of the Cold War. Increasing potency of nuclear arsenals in China, India, and Pakistan, the nuclear breakout in North Korea, and the potential for more states to cross the nuclear weapons threshold from Iran to Japan suggest that the second nuclear age of many competing nuclear powers has the potential to be even less stable than the first. Strategy in the Second Nuclear Age assembles a group of distinguished scholars to grapple with the matter of how the United States, its allies, and its friends must size up the strategies, doctrines, and force structures currently taking shape if

they are to design responses that reinforce deterrence amid vastly more complex strategic circumstances By focusing sharply on strategy that is on how states use doomsday weaponry for political gain the book distinguishes itself from familiar net assessments emphasizing quantifiable factors like hardware technical characteristics and manpower While the emphasis varies from chapter to chapter contributors pay special heed to the logistical technological and social dimensions of strategy alongside the specifics of force structure and operations They never lose sight of the human factor the pivotal factor in diplomacy strategy and war

Arms Control for the Third Nuclear Age David A. Cooper, 2021 International relations scholar David A Cooper offers a reappraisal of classic arms control theory that advocates for reprioritizing deterrence over disarmament in a new era of nuclear multipolarity

Strategic Stability in the Second Nuclear Age Gregory D. Koblentz, 2014-11-01 The world has entered a second nuclear age shaped by rising nuclear states and military technologies Gregory Koblentz argues that the United States should work with the other nuclear armed states to manage threats to nuclear stability in the near term and establish processes for multilateral arms control efforts over the longer term

The Oceans in the Nuclear Age David D. Caron, Harry N. Scheiber, 2014-07-17 The advent of the nuclear age in 1945 fundamentally altered the course of human events The oceans are not the focus of the nuclear age but the affairs of the oceans are deeply woven into the history of that age Knowledge of what the nuclear age has meant for the oceans however is highly fragmented and there exists a surprising gap in research on the impact of the nuclear age on the oceans and on ocean law and policy Ranging from dumped wastes to transportation to security this study frames the complex multidimensional set of relationships between the oceans and the nuclear age and illuminates patterns of impact and response in ocean law This timely expanded edition includes a new chapter by Lt Todd Hutchins USN on Nuclear Risks in Coastal Areas Legal and Regulatory Responses It provides a full discussion of the 2011 coastal Fukushima Nuclear Power Plant disaster together with analysis more generally of the challenges to the environment and to the legal order globally that are posed by coastal siting of nuclear power plants

Deterrence in the Third Nuclear Age Pierre Vandier, 2025-03-07 This book explains the evolution of nuclear doctrines along the 20th century and the beginning of the 21st in an evolving geopolitical context particularly the potential use of nuclear weapons to blackmail or aggressively sanctuarize territorial gains as it has been demonstrated by Russia in Ukraine After five decades of the Cold War known as the first nuclear age the world attempted to eliminate nuclear weapons through treaties and disarmament initiatives This marked the second nuclear age where peace efforts fostered hope that these weapons might become obsolete However during the first decade of the 21st century cracks began to appear in this ambition notably with North Korea's withdrawal from the Nuclear Non Proliferation Treaty Today the nuclear factor dominates the geopolitical landscape in a new and alarming way New players have emerged some of whom do not adhere to the rules established during the Cold War Russia for example resorted to nuclear blackmail against the West in the early days of its invasion of Ukraine This marks the onset of a third nuclear age characterized by greater complexity
