

Numbers

A Cardinal numbers

379 = three hundred and seventy nine

5,084 = five thousand and eighty-four

2,550,000 = two million, five hundred and fifty thousand

3,000,000,000 = three billion

2,860 = two thousand eight hundred and sixty

470,000 = four hundred and seventy thousand

Note: There is no plural 's' after hundred, thousand, million and billion when they are part of a number. On their own, they can be plural, e.g. thousands of people; millions of insects.

B Ordinal numbers and dates

One of the problems with dates is that we write them and say them in a different way:

We write 4 January (or 4th January), but say the fourth of January *or* January the fourth.

We write 21 May (or 21st May), but say the twenty-first of May *or* May the twenty-first.

1997 = nineteen ninety seven

1905 = nineteen hundred and five *or* nineteen oh five

C Fractions and decimals

$1\frac{1}{4}$ = one and a quarter

$1\frac{1}{2}$ = one and a half

$1\frac{3}{4}$ = one and three quarters

$1\frac{1}{3}$ = one and a third

1.25 = one point two five

1.5 = one point five

1.75 = one point seven five

1.33 = one point three three

D Percentages

26% = twenty-six per cent

More than 50% is the majority; less than 50% is the minority.

E Arithmetic

There are four basic processes for working out (= calculating) a problem:

+ = addition e.g. $6 + 4 = 10$ (six plus/and four equals/is ten)

- = subtraction e.g. $6 - 4 = 2$ (six minus four equals/is two)

× = multiplication e.g. $6 \times 4 = 24$ (six times / multiplied by four equals/is twenty-four)

÷ = division e.g. $4 \div 2 = 2$ (four divided by two equals/is two)

F Saying '0'

This can be spoken in different ways in different contexts.

telephone number: 603 724 = six oh three, seven two four (AmEng = six zero three)

mathematics: 0.7 = nought point seven, 6.02 = six point oh two

temperature: -10 degrees = ten degrees below zero / minus ten degrees

football: 2-0 = two nil tennis: 40-0 = forty love

G Talking numbers

Here are several useful words and expressions connected with numbers:

The streets have got odd numbers (e.g. 3, 5, 7) on the left and even numbers (e.g. 4, 6, 8) on the right.

I got 16 out of 20 in our last test.

Yu,2010-03 Economic measurement has over the years become an important subject in academic and policy researches. Debates in the development of macroeconomic theory and public policy rely on accurate feedback of aggregate data. This book fills the gap between the theory and practice in index numbers. It reviews and explores several important topics which lead to improvement in measuring price and output indices. These include econometric problems in hedonic regression, treatment of seasonal goods in the CPI, output and productivity measurement of government services, efficiency analysis of the health care sector and a novel approach in calculating the cost of living indices for products involving risk and uncertainty. The book serves as a valuable reference for academic economists, policy analysts and economic statisticians.

It approaches instructional models, strategies, methods, techniques, tactics and planning from a new perspective and shares effective tips to help readers better understand the instructional process and its theoretical elements. The book addresses the following questions: What is the nature of the instructional process? What are the classifications of contemporary models and strategies developed within the instructional process? Which groups yield the most effective methods and techniques and how can they best be practically implemented? What are the instructional tactics teachers need to take into consideration in which groups are they collected and which tips can help us employ each tactic? Additionally, readers can adapt the book's ready-to-use sample activities to their own educational settings.
