Numerical Modelling For Electromagnetic Non Destructive Evaluation:

Numerical Modeling for Electromagnetic Non-Destructive Evaluation N. Ida, 1994-12-31 This text on numerical methods applied to the analysis of electromagnetic nondestructive testing NOT phenomena is the first in a series devoted to all aspects of engineering nondestructive evaluation The timing of this series is most appropriate as many university engineering physics faculties around the world recognizing the industrial significance of the subject are organizing new courses and programs with engineering NOE as a theme Additional texts in the series will cover electromagnetics for engineering NOE microwave NOT methods ultrasonic testing radiographic methods and signal processing for NOE It is the intended purpose of the series to provide senior graduate level coverage of the material suitable for university curricula and to be generally useful to those in industry with engineering degrees who wish to upgrade their NOE skills beyond those needed for certification This dual purpose for the series reflects the very applied nature of NOE and the need to develop suitable texts capable of bridging the gap between research laboratory studies of NOE phenomena and the real world of certification and industrial applications The reader might be tempted to question these assertions in light of the rather mathematical nature of this first text However the subject of numerical modeling is of critical importance to a thorough understanding of the field defect interactions at the heart of all electromagnetic NOT phenomena Electromagnetic Nondestructive Evaluation (XIX) Tetsuya Uchimoto, Hiroaki Kikuchi, 2016-06-15 There have been many developments in the field of electromagnetic nondestructive evaluation in recent years and it has become an increasingly valuable tool in many areas of industry engineering and construction This book presents selected papers from the 20th International workshop on Electromagnetic Nondestructive Evaluation ENDE held in Sendai Japan in September 2015 ENDE workshops aim to provide an international forum for discussion on the state of the art and perspectives in the field of electromagnetic nondestructive methods from the point of view of science and technology as well as their applications in industry and engineering which have contributed to the development of nondestructive testing and evaluation techniques using electromagnetic fields The book will be of interest to all those whose work involves the use or development of electromagnetic nondestructive evaluation techniques in whatever field Electromagnetic Nondestructive Evaluation (XI) A.
