International Handbook of Inter-religious Education Kath Engebretson, Marian de Souza, Gloria Durka, Liam Gearon, 2010-08-17 This Handbook is based on the conviction of its editors and contributing authors that understanding and acceptance of as well as collaboration between religions has essential educational value The development of this Handbook rests on the fther assumption that interreligious education has an important role in elucidating the global demand for human rights justice and peace Interreligious education reveals that the creeds and holy books of the world s religions teach about sp itual systems that reject violence and the individualistic pursuit of economic and political gain and call their followers to compassion for every human being It also seeks to lead students to an awareness that the followers of religions across the world need to be and to grow in dialogical relationships of respect and understa ing An essential aim of interreligious education is the promotion of understanding and engagement between people of different religions and therefore it has great potential to contribute to the common good of the global community Interreligious education has grown from the interfaith movement whose beg ning is usually identi ed with the World Parliament of Religions held in Chicago in 1893 This was the rst time in history that leaders of the eastern and we ern religions had come together for dialogue and to consider working together for global unity

Europe and Asia as a Legal Area for Fundamental Rights Masahisa Deguchi, Kimio Yakushiji, 2023-05-05 This book explores the possibility of an Asian legal sphere based on the model of Europe It features articles written by leading experts from Europe and Asia After centuries of violent conflicts Europe began a process of integration which leads to 75 years of peace and a community with the common values of freedom fundamental rights and the rule of law But the circumstances that lead to the unification of Europe differ from current day Asia Besides the huge economic gaps between neighboring countries and a wide variety of political forms of government Asia also does not share the unifying narrative of post WWII Europe From an economic point of view Asia is a highly developed region despite the differences between the political systems the region has grown together economically and in recent times also politically However the legal systems of the respective countries have not created the necessary conditions for a peaceful coexistence Can Europe be a model for Asia Based on the history and development of the European unification process this book asks the question to what extent Asia can look to Europe as a model and what lessons can be learned

Public Interest Rules of International Law Teruo Komori, 2016-04-15 This book clarifies factors that play an important role in securing the effectiveness of legal regimes that aim to protect public interests of the international community In Part 1 the authors focus on theoretical problems arising in the implementation process of those legal regimes from both a constitutional and functional perspective In Parts 2 through

Part 4 they pay attention to practical issues in the implementation process of particular legal regimes in light of what interpretation or measures are legitimate from the perspective of protecting public interests This book incorporates an idea of public law into the theoretical framework of international law which has been mainly constructed on the theory of private law in domestic legal systems In contrast to many books which focus on the role of the procedural and material factors in the implementation process of various institutions and rules this book emphasises the role of normative factors in securing effectiveness of public interests oriented rules and is a valuable resource for both academics and policy makers working in this area

It provides ideas, highlights issues and identifies actors' actions and the scope of NGOs in international law. It charts possibilities and limitations of NGOs within the legal framework of a State and its evolution over the years. The book highlights how NGOs having obtained consultative status from the UN Economic and Social Council have now extended their access and area of influence to international actors like inter-governmental organisations, international courts and tribunals. It provides an overview of NGOs' performance and the important role they play in the making of human rights protection of environment and business ethics. The book is primarily doctrinal, containing case studies of important NGOs. The purview is an inquiry, analysis and overview of literature of NGOs in international law from a wide range of sources. Conflict of Norms in Public International Law Joost Pauwelyn, 2003-07-31
One of the most prominent and urgent problems in international governance is how the different branches and norms of international law interact and what to do in the event of conflict. With no single international legislator and a multitude of states, international organisations and tribunals making and enforcing the law, the international legal system is decentralised. This leads to a wide variety of international norms ranging from customary international law and general principles of law to multilateral and bilateral treaties on trade, the environment, human rights, the law of the sea etc. Pauwelyn provides a framework on how these different norms interact, focusing on the relationship between the law of the World Trade Organisation, WTO and other rules of international law. He also examines the hierarchy of norms within the WTO treaty. His recurring theme is how to marry trade and non-trade rules or economic and non-economic objectives at the international level.

Conventions, Treaties And Other Responses To Global Issues - Volume II Gabriela Maria Kutting, 2009-08-25
Conventions, Treaties and other Responses to Global Issues is a component of Encyclopedia of Institutional and Infrastructural Resources in the global Encyclopedia of Life Support Systems (EOLSS) which is an integrated compendium of twenty-one Encyclopedias. This theme, Conventions, Treaties and other Responses to Global Issues, deals with the issue of

international resource regimes These are formal responses by states to the threats posed by trans boundary pollution or the distribution of resources In the past thirty years the number of international environmental agreements has steadily risen to reach record numbers and these agreements have secured a firm place in the hierarchy of international affairs There is a loose assumption that this is a good thing and that this rise has resulted in a commensurable improvement in environmental protection and resource allocation But is this actually the case In fact is there a positive correlation at all Or are there negative correlations What are the connections between environmental diplomacy and environmental protection and how can environmental protection be achieved These are just a few of the questions that will be addressed in this theme whilst at the same time giving an overview of the most important international resource regimes and the most influential international organizations having an environmental impact The theme takes the following shape the first section introduces issues of international environmental law and its history showing that international law can take many different forms Here we explain what policy tools states have in drafting responses to global environmental issues The second section deals with the most prominent international environmental agreements and gives a state of the art overview of existing regimes The third and last section of this theme introduces the key actors in the international arena besides states such as international organizations and civil society actors such as pressure groups These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

The Foundations of International Investment Law Zachary Douglas, Joost Pauwelyn, Jorge E. Viñuales, 2014-05-01 International investment law is one of the fastest growing areas of international law It has led to the signing of thousands of agreements mostly in the form of investment contracts and bilateral investment treaties Also in the last two decades there has been an exponential growth in the number of disputes being resolved by investment arbitration tribunals Yet the legal principles at the basis of international investment law and arbitration remain in a state of flux Perhaps the best illustration of this phenomenon is the wide disagreement among investment tribunals on some of the core concepts underpinning the regime such as investment property regulatory powers scope of jurisdiction applicable law or the interactions with other areas of international law The purpose of this book is to revisit these conceptual foundations in order to shed light on the practice of international investment law It is an attempt to bridge the growing gap between the theory and the practice of this thriving area of international law The first part of the book focuses on the infrastructure of the investment regime or more specifically on the structural arrangements that have been developed to manage foreign investment transactions and the potential disputes arising from them The second part of the book identifies the common conceptual bases of an array of seemingly unconnected practical problems in order to clarify the main stakes and offer balanced solutions The third part addresses the main sources of regime stress as well as the main legal mechanisms available to manage such challenges to the operation of the regime Overall the book offers a thorough

investigation of the conflicting theoretical positions underlying international investment law testing their worth by reference to concrete issues that have arisen in the jurisprudence It demonstrates that many of the most important practical questions arising in practice can be addressed by a carefully dosed resort to theory

Japan and International Law, Past, Present and Future Nisuke Ando, 2023-12-11 This book is a record of the international symposium held at the Kyoto International Conference Hall to mark the centennial of the Japanese Association of International Law The purpose of the symposium was to reflect on past Japanese practice to analyze current problems affecting Japan and to seek to clarify the future role of Japan in the global community in terms of international law After joining the international community in the middle of the nineteenth century Japan adopted a policy of wealth creation and armament in order to maintain its independence against the expanding Western States At the same time on the domestic scene Japan vigorously promoted the modernization Westernization of its political economic and social institutions Japan emerged as one of the victorious Principal Allied and Associated Powers in World War I and started asserting its place in the international order However in the aftermath of the Great Depression Japan failed to reach agreement with the international community eventually left the League of Nations invaded the Asian continent and met with complete military defeat in World War II In the subsequent years Japan toiled to rebuild its economy and to rejoin the world community but despite its miraculous economic recovery and expansion Japan remains ambivalent in its policy of contributing to the maintenance of international peace and security During these one and a half centuries the Japanese practice of international law has covered a wide range of fields From these various fields the symposium took up three specific topics War and Peace Economy and Human Rights because of their relevance to past Japanese practice and because future Japanese practice in these areas would be bound to affect international law in the coming century In addition the symposium discussed Japanese transactions in general with international law The period covered by the symposium has witnessed many drastic changes in the world and international law which used to be applied almost exclusively to relations among the Western States has now come to be applied universally The Association wished to emphasize that an analysis of Japanese practice should be of significance for anyone interested in promoting and consolidating the rule of law in the world community at large
