Regulation And Market Access:

The Regulation of Services and Intellectual Property Bryan C. Mercurio, 2017-07-05 International rules on trade in services and intellectual property are new additions to the multilateral trading system but both have played an important role in the system since their entry. Accompanied by a detailed introduction, this volume contains essays which cover not only the law and jurisprudence of these topics but also the underlying economics and politics behind their incorporation into the multilateral system and continued prominence. The volume provides readers with a comprehensive overview of the development of these controversial and increasingly important areas of international trade law. **Regulation and Market Access** Alexandra Sidorenko, Christopher Findlay, 2004-01 Trade in services is growing rapidly spurred by decreased transport costs, technological advances and policy initiatives. Services trade does not face the same impediments as goods trade. Where trade in goods is constrained by the imposition of tariffs, trade in services is not. **Regulatory Autonomy and International Trade in Services** Bregt Natens, 2016-07-27 This book considers how the interplay between multilateral and preferential liberalisation of trade in services increasingly raises concerns both from the perspective of the beneficiaries of such liberalisation whose rights are uncertain and that of regulators whose regulatory autonomy is constrained. The author shows how these concerns lead to vast underutilisation of and strong prejudices against the benefits of services liberalisation. The book meticulously analyses and compares the EU's obligations under the GATS and the services chapters of several RTAs to finally assess the merits of the raised concerns. **ECMT Round Tables (De)Regulation of the Taxi Industry** European Conference of Ministers of Transport, 2007-03-01 This Round Table examines the basic case for liberalisation of the taxi industry and reviews experiences with taxi de-regulation in OECD and ECMT member countries. **European Free Trade System and Policy Handbook Volume 1 Integration, Policy, Regulations** IBP, Inc., 2017-06-16 EFTA European Free Trade Association Trade and Investment Agreements Handbook Strategic Information and Basic Agreements. **Dynamics of Regulatory Change** David Vogel, Robert A. Kagan, 2004-12-31 Critics of globalization claim that economic liberalization leads to a lowering of regulatory standards. As capital and corporations move more freely across national boundaries, a race to the bottom results as governments are forced to weaken labor and environmental standards to retain current contracts or attract new business. The essays in this volume argue that on the contrary, under certain circumstances, global economic integration can actually lead to the strengthening of consumer and environmental standards. This volume extends the argument of David Vogel's book *Trading Up* which discussed environmental standards by focusing on the impact of globalization on labor rights, women's rights and capital market regulations. **National Regulation and Trade Liberalization in Services** Markus Krajewski, 2003-01-01 Like tariffs and other border measures, national regulatory barriers impede international trade. Unlike tariffs, however, such barriers usually indicate an important domestic policy choice. This conflict of interest has emerged as a crucial issue in international law, particularly with regard to services such as telecommunications.

and health services This study is the first to analyze the potential impact of incompatibilities between national regulatory regimes and the rules and obligations imposed by the General Agreement on Trade in Services GATS In the process of arriving at his challenging concluding theses the author investigates such relevant concepts as the following the political and ideological dynamics of GATS negotiations services trade liberalization in regional integration systems particularly in EC law policies common to diverse national regulatory systems the notions of deregulation and privatization the human rights implications of international trade law the GATS obligations of market access national treatment and most favoured nation treatment the role of the WTO s dispute settlement organs GATS transparency obligations Professor Krajewski s study is of enormous significance to specialists in regulatory policies and instruments at all national and sectoral levels especially in the context of ongoing GATS negotiations As the author warns Unless GATS negotiators and national regulators have a thorough understanding of the relationship between GATS obligations and regulatory policies and instruments they cannot effectively use the flexible elements of GATS and could reach an agreement which they may later regret **Federal Register** ,2013-03

SEC Docket United States. Securities and Exchange Commission,2010 Services Liberalization in the EU and the WTO Marcus Klamert,2014-10-16 Both in WTO law and EU law there is a dichotomy between liberalisation based on market access and targeting domestic regulation Consequently both regimes share the problem of distinguishing national measures impairing market access and those that do not have such effect Looking at the provision of services a cornerstone of EU substantive law in the EU and the WTO this book offers a comprehensive evaluation of the current legal status quo on transnational services provision on a global level Based on thorough analysis of both EU and WTO law policymakers are provided with concrete proposals for fostering the consistency and effectiveness of the current regime A final chapter discusses possible approaches to regulation such as home state rule host state rule and mutual recognition from a comparative perspective Written by a highly respected author team this is essential reading for EU internal market specialists and WTO law scholars alike *International Economic Law in Contemporary World* Liyu Han,2024-03-23 This book focuses on the real themes in various areas of international economic law and explores the key elements behind the written rules The advantage of this approach is that these themes or elements apply to all types of countries whether developed or developing whether market based or not and to trade investment or other transactions This book reflects the author s thoughts and views on international economic law and its application based on his experience advising government departments and entities particularly insights into the U S China trade war from the perspective of a Chinese scholar This feature makes the book very different from other books published before the U S China trade war or textbooks that simply introduce the relevant subjects and provokes readers to think deeply about the relevant issues **Autonomous Vehicles and the Law** Gilles Pillet,2025-05-20 The development of autonomous vehicles requires all the countries of the world to adapt their respective legal systems The scale and complexity of the task is daunting The law is called upon to enable and

even encourage the advent of this revolution while guaranteeing a fair allocation of the resulting risks and ensuring public safety What s more the law must rise to this challenge at a time when it is impossible to predict in the medium term the speed at which autonomous vehicles will enter circulation or even their degree of autonomy Adapting civil liability law appears to be the key to success Faced with the peculiarities of autonomous vehicles many concepts on which current liability regimes are based will need rethinking For instance the complex manufacturing of driving systems multiplies the number of potential liable parties and the black box effect associated with the operation of learning AI increases the burden of proof in the event of a failure

Regulation and Market Access Alexandra Sidorenko,Christopher Charles Findlay,2003 Trade in services is growing rapidly spurred by decreased transport costs technological advances and policy initiatives Services trade does not face the same impediments as goods trade Where trade in goods is constrained by the imposition of tariffs on goods imports the trade in services is influenced by regulation and competition policy in the importing country Regulation and Market Access comprehensively presents the theoretical aspects of regulation and market access including the process of achieving good regulation measuring impediments to trade in services and the external effects of domestic competition policies Case studies are presented of regulation and deregulation of major sectors in both developed and developing country contexts including electricity supply airports telecommunications and banking The new frontiers of services trade cross border trade in electronic finance education and health services are also analyzed in depth Increased services trade

Kerwer,2018-01-18 This title was first published in 2001 The question this thesis attempts to answer is summarized as follows what accounts for the amazing stability of Italian transport policy in the face of European challenges given the fact that as most national and European policy makers readily believe it is not capable of addressing the problem of the sector This study analyzes the transport policy in Italy from the 1990s into the 21st century It looks at how the two sub sectors of surface transport road haulage and railways have been managed by the public and private actors involved In both sectors the policy appears to have failed either by not offering a remedy to problems or by aggravating them further The author believes that studying transport policy in Italy will shed light on the wider question of how national policy making patterns are influenced by developments in the international environment in this case looking closely at the influence of the European Union *How Do Regulations of Entry and Credit Access Relate to Industry Competition? International Evidence* Ms.Deniz O Igan,Ali Mirzaei,Tomoe Moore,2018-04-06 We examine the extent to which regulations of entry and credit access are related to competition using data on 28 manufacturing sectors across 64 countries A robust finding is that bureaucratic and costly entry regulations tend to hamper competition as proxied by the price cost margin in the industries with a naturally

high entry rate Rigid entry regulations are also associated with a larger average firm size Conversely credit information registries are associated with lower price cost margin and smaller average firm size in industries that rely heavily on external finance consistent with access to finance exerting a positive effect on competition These results suggest that incumbent firms are likely to enjoy the rent and market share arising from strict entry regulations whereas regulations enhancing access to credit limit such benefits
