Reinventing Ourselves Barbara Leigh Smith, John McCann, 2001-01-15 *Reinventing Ourselves* examines the experiences and lessons from over 20 different institutions pioneering new approaches for more effective teaching and learning. Many of the colleges included in this volume began as both educational and social experiments representing new ways of thinking about educational goals, curricular organization, institutional governance, and faculty roles and rewards. With new calls for both rethinking our approaches to teaching and learning and for reviewing the traditional boundaries within institutions and between disciplines, *Reinventing Ourselves* offers a rich store of ideas from which to draw. The Oxford Handbook of Interdisciplinarity Robert Frodeman, 2010-06-24 This title provides a synoptic overview of the current state of interdisciplinary research, education, administration, and management and includes problem-solving knowledge that spans the disciplines and interdisciplinary fields and crosses the space between the academic community and society at large.

Interdisciplinary Research Allen F. Repko, Rick Szostak, 2020-01-21 *Interdisciplinary Research: Process and Theory* offers a comprehensive systematic presentation of the interdisciplinary decision-making process by drawing on student and professional work from the natural sciences, social sciences, humanities, and applied fields. Designed for active learning and problem-based approaches, the Fourth Edition includes expanded discussion of epistemology, creativity within the interdisciplinary research process, confirmation bias, and social media; the philosophy of integration and student work patterns; mapping and the importance of performing independent research while working through this book. An instructor website for the book includes a test bank, PowerPoint slides, and tables and figures from the book. *Mentoring in Formal and Informal Contexts* Kathy Peno, Elaine M. Silva, Mangiante, Rita A. Kenahan, 2016-03-01 *Mentoring in Formal and Informal Contexts* is a collection of invited works on mentoring in the many contexts in which it exists. Working with AHEA, the editors identified authors that have demonstrated experience and/or have published in this area. The book is arranged thematically: health care, education, the workplace, etc., and further sub-themed as appropriate. *Mentoring in Formal and Informal Contexts* is important because it fills a unique niche in the field of adult education, extends the scope of AHEA to a larger audience, and offers a current volume for scholars and practitioners based on both research and practice-based research. The audience: This collection is appropriate for a wide variety of professors, researchers, practitioners, and students in the field of adult education.

Stories of Mentoring Michelle F. Eble,2008-10-01 Describes mentoring of teachers and scholars in the field of composition and rhetoric *Fixing College Education* Charles Muscatine,2009-08-13 Since his early days at the University of California Berkeley when he was fired for refusing to sign a loyalty oath during the Red Scare Charles Muscatine has been a dedicated teacher and higher education reformer Upon his reinstatement at Berkeley he founded Strawberry Creek College a six year experiment using full professors and small classes to teach lower division students Drawing on this belief in undergraduate teaching Muscatine s new book now offers a radical new design for American college education Muscatine begins with the observation that the mediocre undergraduate curriculum offered by most colleges and universities today is based on outdated ideas of what should be taught and what constitutes good teaching Although Muscatine is himself a well established research scholar he contends that the publish or perish research religion of college and university faculties has seriously damaged undergraduate education He offers a clear distinction between publishable research and the scholarship

necessary for good teaching Furthermore he recommends major changes in the education of professors including reconsidering both the requirement of the book length dissertation and the current organization of graduate departments Fixing College Education predicts new roles for students and faculty redefines educational breadth and depth and calls for deeper assessment of learning and teaching Muscatine highlights the outstanding colleges and universities including Harvard Boston University s University Professor s Program Evergreen State College and Fairhaven College at Western Washington University that have already remade their curricula successfully or adopted features like the ones he proposes Muscatine argues that the new curriculum is better able than the old to produce good scholars and good citizens for the twenty first century
