Entitlement and the Affectional Bond Melvin J. Lerner, Gerold Mikula, 2013-06-29 If the truth were told this volume and its direct antecedents must rank among the most ambitious if not simply pretentious endeavors imaginable at least in the social sciences The titles of the volume and the chapters promising to integrate the experiences of the sense of justice and the affectional bonding of people in close relations seem straightforward and reasonable enough What they fail to convey however is the simple bald fact that we in the human social sciences have no firm grasp on either of these two fundamental experiences what we sometimes call love and justice To begin with even as scientists committed to understanding based upon systematic propositions linking publicly observable concepts we have no clear consensus concerning the nature of the affectional bonds linking people in close relationships love intimacy caring mutual responsiveness or the sense of justice fairness deserving and in our efforts to understand entitlement And we are continually handicapped stand these complex moving experiences by the persistent tendency to reduce them to manifestations of nothing but familiar psychological or even biological processes secondary rewards selfish genes So why then this volume Although there are many answers to the question probably the most germane is that the basic

issues are so important and intriguing that the recent past has seen rather dramatic parallel growth in social scientists' interest in these two areas: justice and close relationships.

The Psychology of Love Michele A. Paludi, 2012-03-09 From arranged marriages to online dating, this four-volume work presents everything from personal accounts to empirical evidence to document what creates love in our culture as well as around the world. The field of biology views love as a hard-wired mammalian drive akin to thirst and hunger. In contrast, psychology views love from a social and cultural perspective where our drive to find love and our responses to it are highly dependent on societal norms. In *The Psychology of Love*, esteemed author and educator Michele A. Paludi examines love through all lenses, thereby providing readers a deeper understanding of the ways we can express caring, sensitivity, empathy, and respect toward one another. Each chapter in this comprehensive four-volume work includes a scholarly overview of empirical research and theories about the psychology of love. In addition, individuals' own definitions of love are included. Special attention is paid to accepted standards of love across a variety of cultures, the ways individuals express liking and love across the lifecycle, and patterns in dissolutions of friendships and romantic relationships, making note of gender and race differences.

Relationships Robert Hinde, 2015-01-28 This volume on close relationships in adulthood discusses the central issues in the field and points the way towards the construction of an integrated body of knowledge about human relationships. The self, interactions, relationships, and groups are treated as dynamic processes in dialectical relations with each other and with the socio-cultural structure of norms, values, beliefs, and institutions. Early chapters introduce aspects of the self relevant to the dynamics of interactions and relationships. Intrapsychic Processes of Cognition and Emotion are emphasized. These are followed by chapters discussing the principal characteristics of relationships. Seven further chapters focus on the processes involved in the dynamics of relationships, and later chapters synthesize previous ones in discussions of love and friendship and the nature of relationship change. The focus throughout the text is on current work and current controversy placed against a background of knowledge that has been built up in recent decades.
