Religion And Rural Revolt:

Religion and Rural Revolt János M. Bak, Gerhard Benecke, 1984 **Essays on the French Revolution** Steven G. Reinhardt, Elisabeth A. Cawthon, 1992 Clarke Garrett examines the differing responses of Catholics and Protestants and the resulting disturbances Roderick Phillips describes the wide variation in provincial response to the revolutionary assembly's family reform measures He traces the different reactions of urban and rural residents to such legal measures as liberalization of divorces secularization of birth death and marriage registrations and inheritance reform Peasants in central France were already engaged in total revolution when Joseph Fouché arrived there in late 1793 Nancy Fitch argues that Fouché was formed by his encounter with indigenous peasant radicalism as much as the peasants were influenced by his rhetoric of a new political culture Donald Sutherland summarizing scholarly debate on the subject argues that in the final analysis the Revolution itself was tragically and profoundly alien to many French men and women in 1789 Catholicism in Britain & France Since 1789 Frank Tallett, 1996-07-01 This volume provides an up to date analysis of Catholicism in Britain and France examining various aspects of the faith in the 200 years since the French Revolution By focusing on two countries whose religious establishment and experience were markedly different and by adopting a comparative approach the book is able to offer an unusual perspective on the challenges facing the Catholic church in the modern world and on its impact not only on believers but also on the two societies as a whole **The Peasantry in the French Revolution** Peter Jones, 1988-10-13 The contention of Georges Lefebvre that the peasantry occupied center stage during the early years of the Revolution is vindicated with the support of fresh evidence culled from archives unpublished theses and other sources *The Other Rebellion* Eric Van Young, 2002-04-01 Mexico's movement toward independence from Spain was a key episode in the dissolution of the great Spanish Empire and its accompanying armed conflict arguably the first great war of decolonization in the nineteenth century This book argues that in addition to being a war of national liberation the struggle was also an internal war pitting classes and ethnic groups against each other an intensely localized struggle by rural people especially Indians for the preservation of their communities While local and national elites focused their energies on wresting power from colonial authorities and building a new nation state rural people were often much more concerned about keeping village identities and lifeways intact against the forces of state expansion commercialization and modernization Conventional wisdom says that Mexican independence was achieved through a cross class and cross ethnic alliance between creole ideologues military leaders and a mass following This book shows that this is not only an incomplete explanation of what went on in Mexico during the decade of armed confrontation that led to Mexico's independence but also a distortion of Mexican social and cultural history The author delves deeply into life histories previously unexamined texts statistical social profiling and local historical ethnography to examine the dynamics of popular rebellion He focuses especially on Mexico's Indian villages but also considers the role of parish priests as insurgent leaders local conflicts over land politics and religious

symbols the influence of messianism and millenarianism in popular insurgent ideology and the everyday language of political upheaval

A Rural Society After the Black Death Lawrence Raymond Poos, L. R. Poos, 2004-01-29 *A Rural Society after the Black Death* is a study of rural social structure in the English county of Essex between 1350 and 1500. It seeks to understand how in the population collapse after the Black Death 1348-1349 a particular economic environment affected ordinary people's lives in the areas of migration, marriage and employment and also contributed to patterns of religious nonconformity, agrarian riots and unrest and even rural housing. The period under scrutiny is often seen as a transitional era between medieval and early modern England but in the light of recent advances in English historical demography this study suggests that there was more continuity than change in some critically important aspects of social structure in the region in question. Among the most important contributions of the book are its use of an unprecedentedly wide range of original manuscript records: estate and manorial records, taxation and criminal court records, royal tenurial records and the records of church courts, wills etc. and its application of current quantitative and comparative demographic methods.

A Social History of French Catholicism 1789-1914 Ralph Gibson, 2025-06-02 First published in 1989, *A Social History of French Catholicism 1789-1914* is a clear survey of over a hundred years of Catholicism in French society. It chronicles the religious experience of French men and women, both clergy and laity, in post-revolutionary France. The book begins with a look at Catholic life in the Old Regime and during the French Revolution and proceeds to topical chapters on the secular clergy, the religious orders, popular religion, religious practice by region, gender and age, and the social classes. The final chapter deals with the re-Christianization of France in the latter part of the nineteenth century. This volume will be of interest to students and researchers of history and religion.

The French Revolution and the Birth of Modernity Ferenc Fehér, 2023-11-15 Written from widely different perspectives, these essays characterize the Great Revolution as the dawn of the modern age, the grand narrative of modernity. The scope of issues under scrutiny is extremely broad, ranging from the analyses of the hotly debated class character of 1789 and the problem of the nation-state to the Cult of the Supreme Being, the emancipation of the Jews and the cultural heritage of the Revolution. Conflitto e democrazia in Europa, 1650-2000: Charles Tilly, ***The Bab and the Babi Community of Iran*** Fereyduun Vahman, 2020-11-05 In 1844 a young merchant from Shiraz called Sayyid Ali Muhammad declared himself the gate, the Bab, to the Truth and shortly afterwards the initiator of a new prophetic cycle. His messianic call attracted a significant following across Iran and Iraq. In this volume leading scholars of Islam, Baha'i studies and Iranian history come together to examine the life and legacy

Alternate Civilities Robert Paul Weller, 2018-02-19 *Alternate Civilities* is an anthropologist's answer to the argument that China's cultural tradition renders it incapable of achieving an open political system Robert Weller draws on his knowledge of both China and Taiwan to show how such sweeping claims fail to take account of potential democratic stimuli among local level associations such as business organizations religious groups environmental movements and women's networks These groups were pivotal in Taiwan's democratic transition and they are thriving in the new free space that has opened up in China They do not promise a clone of Western civil society but they do show the possibility of an alternate civility

Landscapes of Protest in the Scottish Highlands after 1914 Iain J.M. Robertson, 2016-04-15 In November 1918 the implementation of agrarian change in the Scottish Highlands threatened another wave of unemployment and eviction for the land working population which led to widespread and varied social protest Those who had been away on war service and their families faced returning to exactly the same social and economic conditions in the Scottish Highlands they had hoped they had left behind in the struggle to make a land fit for heroes Widespread and varied social protest rapidly followed It argues that previously there has been a failure to capture fully the geography chronology typology and rate of occurrence of these events The book not only offers new insights and a greater understanding of what was happening in the Highlands in this period but illustrates how a range of forms of protest were used which demand attention not least for the fact that these events unlike most of the earlier Land Wars period were successful There are functioning townships in the Highlands today that owe their existence to the land invasions of the 1920s The book innovatively concentrates on formulating explanation and interpretation from within and looks to the crofting landscape as base means and motive to disturbance and interpretation It proposes that protest is much more convincingly understood as an expression of environmental ethics from
