Religion [and] Aging Vincent John Fecher, 1982 *Religion & Aging* Vincent John Fecher, 1982 *Research on Religion and Aging* Harold G. Koenig, 1995-03-18 This first systematic guide to the latest research about religion and aging focuses on the linkage between religion and health outcomes in people over 55 who will represent one third of America's population by the year 2025. A short introduction points to the rapidly growing literature since 1980; the conclusion offers a brief synthesis of the varied basic and applied studies on the subject and suggests a useful model to consider applying. Nearly 300 entries with concise and comprehensive annotations are organized under four main subjects: religious beliefs, behaviors, and experience; relationships between religion and health; practical applications of research findings; and measuring religiosity and spirituality. Arranged under numerous additional sub-topics and with author and subject indexes, the guide is accessible and designed for varied use by students, teachers, researchers, policymakers, practitioners, and professionals in the fields of sociology and social work, psychology and psychiatry, and medicine and health. Researchers, educators, and policymakers will find this book invaluable in identifying research and application studies and in evaluating their quality and methodology. Arranged under additional sub-topics by populations in many situations with varied problems in terms of concerns relating to mental and physical health and with applications in different fields and with author and subject indexes, the guide is accessible and designed for varied use by students, teachers, practitioners, and professionals in the fields of sociology and social work, psychology and psychiatry, and medicine and health.

Religion and Aging Southwestern Baptist Theological Seminary. School of Religious Education, 1988 **The Encyclopedia of Aging** Linda S. Noelker, PhD, Kenneth Rockwood, MD, FRCPC, Richard L. Sprott, Ph.D., 2006-03-17 A COMPREHENSIVE RESOURCE ON GERONTOLOGY AND GERIATRICS Since its inception in 1987, The Encyclopedia of Aging has proven to be the definitive resource for scholars and students across the burgeoning and increasingly interdisciplinary fields of gerontology and geriatrics. Like its three esteemed predecessors, the fourth edition contains concise, readable explorations of hundreds of terms, concepts, and issues related to the lives of older adults, as well as timely coverage of the many new programs and services for the elderly. Updated under the distinguished stewardship of editor in chief Richard Schulz to reflect the infusion of new information across the scientific disciplines, this new edition brings readers up to the moment, significant advances in biology, physiology, genetics, medicine, psychology, nursing, social services, sociology, economics, technology, and political science. While retaining the format and standard of excellence that marked the first three editions, the fourth edition encompasses a wealth of new information from the social and health sciences. It contains the most current bibliography of an expanding literature, an exhaustive index, and extensive cross references. This much anticipated update of the field's most authoritative resource will take its place as an indispensable reference for specialists and non-specialists across a broad range of disciplines that now comprise the field of aging.
