Anne Stensvold

Religious Impact On The Nation State:

Religious Impact on the Nation State Pat Williams, Toyin Falola, 1995 This text examines the link between religion and politics both at the level of theory and with specific reference to Nigeria The first part of the book focuses on major local issues and the second on how religion affects the country's relations The religious problem has become prominent not only for its recurrence but also for its intensity Nigeria itself is plural with innumerable religious groups although this need not be a problem if pluralism is used to promote freedom of association democracy and human rights It does become a problem if as this book notes religious groups make self centered demands on the state when the state succumbs to such demands or to blackmail and when public officers use religious groups and leaders for their own political survival **Politicization of Religion, the Power of State, Nation, and Faith** G. Ognjenovic, J. Jozelic, Gorana Ognjenovi?, Jasna Jozeli?, 2014-12-16 Abuse of religion as a political means to an end the achievement of nationalist political goals analyzing how through which mechanisms this phenomenon has been and still is practiced in South Eastern Europe Research Anthology on Religious Impacts on Society Management Association, Information Resources, 2020-07-21 Religion is considered by many to be something of the past but it has a lasting hold in society and influences people across many cultures This integration of spirituality causes numerous impacts across various aspects of modern life The variety of religious institutions in modern society necessitates a focus on diversity and inclusiveness in the interactions between organizations of different religions cultures and viewpoints Research Anthology on Religious Impacts on Society examines the cultural sociological economic and philosophical effects of religion on modern society and human behavior Highlighting a range of topics such as religious values social reforms and spirituality this publication is an ideal reference source for religious officials church leaders psychologists sociologists professionals researchers academicians and students Religion in the Market Era François Gauthier, 2025-05-30 This book aims to expand the limits of the social scientific study of religion and define a coherent model of recent global transformations of religion challenging the paradigm of secularisation and post secularisation Using a wide ranging selection of case studies including global Islam post Soviet Eastern Europe and China the author argues that since the 1980s religion has been dramatically shaped around the world by neoliberalism and consumerism Providing a global macro level history of how religion has changed in the past four decades this book contends that the rise of economics as a dominant social sphere is central to understanding the ongoing changes in contemporary world religions *The Impact of Religion, Personality, Values and Worldviews on Attitudes Towards Human Rights* Modestus Chiedozi Adimekwe, 2024-09-04 This book provides a rigorous investigation into the adoption and culture of human rights in Nigeria with a focus on the human rights attitudes of Nigerian students Exploring the perceived paradox of enthusiastic endorsement of human rights instruments and their poor application in Nigeria the author uses an empirical theological research design to understand how young people in Nigeria evaluate human rights and which factors trigger their evaluation In doing so this book is the first to

empirically examine the predictors of human rights attitudes among Nigerians and provides new insights into the degree of social significance of the religiosity of adolescents in the country. It also offers a compelling quantitative analysis of differences in human rights attitudes among Nigerian youth along religious lines. Given the importance of a culture of human rights in our increasingly diverse societies and the salience of religion on this matter in Nigeria and across the African continent, this book provides a valuable perspective on the interrelationships between religion, value orientations, personality traits, socio-political context and human rights. Being concerned with the future of human rights in Nigeria, the author argues that it is crucial to understand the religious factor among Nigerian students today. This book is therefore recommended to educators, especially teachers of Religion Education and scholars working in educational settings, but will also be of interest to researchers in social sciences, public administrators and policymakers.

Edward Said and the Religious Effects of Culture William D. Hart, William David Hart, 2000-04-13. This book provides a distinctive account of Edward Said's critique of modern culture by highlighting the religion/secularism distinction on which it is predicated. It refers to religious and secular traditions and to tropes that extend the meaning and reference of religion and secularism in indeterminate ways. It covers Said's heterogeneous corpus from *Joseph Conrad and the Fiction of Autobiography* (his first book) to *Orientalism* (his most influential book) to his recent writings on the Palestinian question. The religion/secularism distinction lies behind Said's cultural criticism and his notion of intellectual responsibility.

Beyond the Nation-State David H. Kamens, 2012-02-17. Examines the effects of education in creating global citizens who share a world culture. This title also examines the role of education in diffusing such attitudes and models as global citizens confront national institutions.

Religion, State and the United Nations Anne Stensvold, 2016-07-22. This volume approaches the UN as a laboratory of religious/political value politics. Over the last two decades, religion has acquired increasing influence in international politics and religious violence and terrorism has attracted much scholarly attention. But there is another parallel development which has gone largely unnoticed: namely, the increasing political impact of peaceful religious actors. With several religious actors in one place and interacting under the same conditions, the UN is as a multi-religious society writ small. The contributors to this book analyse the most influential religious actors at the UN, including The Roman Catholic Church, The Organisation of Islamic Countries, the Russian Orthodox Church. Mapping the peaceful political engagements of religious actors, who they are and how they collaborate with each other, whether on an ad hoc basis or by forming more permanent networks, throwing light at the modus operandi of religious actors at the UN, their strategies and motivations. The chapters are closely interrelated through the shared focus on the UN and common theoretical perspectives and pursue two intertwined aspects of religious value politics: namely, the whys and hows of cross-religious cooperation on the one hand and the interaction between religious actors and states on the other. Drawing together a broad range of experts on religious actors, this work will be of great interest to students and scholars of Religion and Politics, International Relations and the UN.

Religion, Conflict, and Democracy

in Modern Africa Samuel K. Elolia, 2012-03-02 Spanning various regions of Sub Saharan Africa the authors of this volume come together to explore the complex relationship between religion and democracy in contemporary Africa As a result of the end of the Cold War and the fall of the Soviet Union many African countries have come to the realization however partial that political and social change is inevitable in spite of government heavy handedness and threats It has also become evident that no political system that refuses to permit freedom of political expression and alternative systems of governance could continue to be sustained It is in precisely this political climate that religious institutions have collaborated with other elements of civil society to call for political reforms with the church often becoming the prominent voice against oppressive governments in countries such as Kenya and South Africa It is the purpose of this book to assess how religion shapes political issues and to what extent religious forces influence the civil society By acknowledging the role of the civil society the essays recognize the resilience that comes out of Africa even when the sociopolitical situation seems unbearable

Negotiating State and Non-State Law Michael A. Helfand, 2015-07-02 Non state law is playing an increasing role in both public and private ordering Numerous organizations have emerged alongside the nation state each purporting to provide their members with rules and norms to govern their conduct and organize their affairs The nation state increasingly finds itself sandwiched between two broad and contrasting categories of non state law The first law above the state captures legal systems that function across the territorial borders of nation states The second category law below the state includes forms of local customary religious and indigenous law As these forms of non state law persist and proliferate alongside the nation state the relationship between state and non state law becomes more complex multifaceted and tense This volume addresses this relationship considering whether and to what extent state and non state law can coexist and how each form of law seeks to influence as well as transform the other
