Remade In America How Asia Will Change Because America Boomed:

Remade in America Jim Rohwer, 2001-03-15 In a stunning rebuke to a large group of naysayers Jim Rohwer convincingly argues that the Asian financial crisis of 1997 1998 was not a turn for the worse rather it was short lived and helped rid Asian markets of many of the problems that were holding it back Now while most analysts go wild over the American economy Rohwer provides the key insights into why America is due for a slowdown while Asia is poised for tremendous growth and opportunity Jim Rohwer has long experience in Asia as both a journalist and a business executive The highly informed account in *Remade in America* comes from his own on the ground observation and analysis as well as knowing all the major players in business government and the media in both America and Asia Telling in depth interviews with people ranging from Lee Kuan Yew the former prime minister of Singapore and Jack Welch the CEO of General Electric result in deep insights into Asia's great potential The future of Asia is as much about the United States as it is about Asia for the forces that revolutionized the American economy in the last twenty years provide the clues for what is to come in Asia The key to Asian growth is understanding how Asian companies have learned from the strengths of both American and Asian business models *Remade in America* clearly charts how Asian industries have started managing themselves based on American standards of corporate technological and economic performance that began to be adopted in the late 1990s while incorporating their own strengths of cooperative corporate and social organization Asia is ideally suited to take advantage of the Internet revolution and we are only now starting to see its enormous potential in this area Rohwer's insightful analysis of Japan China Taiwan South Korea and Southeast Asia shows how as these countries start to combine the ruthlessly efficient market democracy and accountability that America pioneered with the Asian domination of dispersed manufacturing and assembly of components there will be major opportunities both for American corporations and for investors In addition technology will not only enable Asian economies to improve on their traditional strengths it will also help Asia greatly improve its traditional poor performance in services and distribution *Remade in America* is a provocative and useful book not only for those with direct business interests in Asia but also for readers who want an informed look at this dynamic and important part of the world There will be a new Asia Inc one in which such matters as finance and technology will be handled in an American way while people will be managed along Asian lines in their interactions a powerful combination that we ignore at our peril

US-Asia Economic Relations Justin Robertson, 2008-09-02 In a world of continuing financial volatility this book critically evaluates the oft cited claim that US firms and the US government attempt to open emerging markets in economic distress and acquire valuable industrial and financial assets Focusing particularly on Korea and Thailand the author examines the degree of market opening the roles US actors played in this process and the level of foreign firm activity in the years after the Asian crisis Justin Robertson finds surprisingly little coherence between the strategies of US firms and US policy makers At the same time the book downplays European investments concluding instead that the decade since the

Asian crisis has reaffirmed strengths of US capital particularly in some of the most important sectors of the global economy Investment banking private equity and subcontracting are significant new features of US Asia economic relations Providing a sophisticated understanding of US interests in Asia especially in terms of the politics of finance capital and including a wealth of empirical data on the US and Asian political economies this book will be invaluable for students and scholars of international political economy and Asian economics and politics

From Asian to Global Financial Crisis Andrew Sheng,2009-09-28 This is a unique insider account of the new world of unfettered finance The author an Asian regulator examines how old mindsets market fundamentalism loose monetary policy carry trade lax supervision greed cronyism and financial engineering caused both the Asian crisis of the late 1990s and the current global crisis of 2008 2009 This book shows how the Japanese zero interest rate policy to fight deflation helped create the carry trade that generated bubbles in Asia whose effects brought Asian economies down The study s main purpose is to demonstrate that global finance is so interlinked and interactive that our current tools and institutional structure to deal with critical episodes are completely outdated The book explains how current financial policies and regulation failed to deal with a global bubble and makes recommendations on what must change

Management and International Review Shirley J. Daniel,Wolf Reitsperger,2013-06-29 This special issue is devoted to the topic of globalization one of the most emotionally charged terms in international business today While globalization is not really a new phenomenon advances in transportation and communications technology as well as decreasing trade barriers have increased the pace and magnitude of cross border interactions bringing them to the forefront of discussion for scholars

The American Presidency and Entertainment Media Thomas Gallagher,2017-09-01 The need for American presidential candidates and sitting presidents to connect with citizens has led to the adoption of diverse media strategies that include traditional news initiatives with established journalists face to face interaction with small groups of supporters and visits to traditionally non political entertainment based venues The American Presidency and Entertainment Media How Technology Affects Political Communication examines the recent embrace of entertainment forums for political purposes Featuring interviews with White House insiders and late night talk show veterans this book analyzes the major moments in the presidency s increasingly cozy relationship with entertainment based television shows and the major factors leading individual administrations and campaigns to take chances to reach largely non political audience It offers a new theoretical underpinning for this phenomenon predicts how future campaigns will operate in this regard as media technology and American political culture evolve and connects the marriage of politics and televised entertainment to the ascension of Donald Trump to the presidency

Far Eastern Economic Review ,2001 **Connecting People, Ideas, and Resources Across Communities** David V. Gibson,Manuel V. Heitor,Alejandro Ibarra Yunez,2007 The challenge of connecting people ideas and resources across communities stems from the quest for competition in a global world at the same time that the basic infrastructure to foster wealth creation is

asymmetrically distributed across regions of the globe
