Remaking The Postwar World Economy:

Remaking the Postwar World Economy P. Burnham, 2003-09-02 Peter Burnham presents a detailed archive based account of the key aspects of international monetary relations in the 1950s focusing in particular on Anglo American policy surrounding the restoration of sterling convertibility. He argues that in 1952 the British government had a unique opportunity to take an almost revolutionary step in the external field to transform the international political economy through the abolition of the fixed rate system, the International Monetary Fund and the European Payments Union and restructure Britain's domestic economy to tackle longstanding productivity, export and labour market problems. **The Decline of Sterling**

Catherine R. Schenk, 2010-05-27 The demise of sterling as an international currency was widely predicted after 1945 but the process took thirty years to complete. Why was this demise so prolonged? Traditional explanations emphasize British efforts to prolong sterling's role because it increased the capacity to borrow, enhanced prestige or supported London as a centre for international finance. This book challenges this view by arguing that sterling's international role was prolonged by the weakness of the international monetary system and by collective global interest in its continuation. Using the archives of Britain's partners in Europe, the USA and the Commonwealth, Catherine Schenk shows how the UK was able to convince other governments that sterling's international role was critical for the stability of the international economy and thereby attract considerable support to manage its retreat. This revised view has important implications for current debates over the future of the US dollar as an international currency. **Britain and European Monetary Cooperation, 1964-1979**

Kiyoshi Hirowatari, 2016-09-23 The collapse of the Bretton Woods system in the early 1970s resulted in a transition to fluctuating rather than fixed currency system. This brought sterling into the turmoil of the world currency markets and by the end of the 1970s sterling had quietly ended its role as an international currency. Sterling dollar diplomacy collapsed, bringing to an end what had hitherto been considered Britain's prime relationship. *Britain and European Monetary Cooperation 1964-1979* provides a unique perspective on these events, shedding light on the complexities of the historical context of British monetary diplomacy and exploring the country's attempt at a European approach to sterling in the 1960s and 70s. The book describes the political and economic approach Britain took at the turn of the 1970s and explains how the country became restricted by the burden of the sterling balances. In this book, the author illustrates how these developments offered opportunity for both cooperation and conflict in the light of monetary diplomacy. He demonstrates how Britain's struggle to achieve exchange rate stability, twinned with controversy over European Economic Community membership, finally prompted serious reconsideration of economic policy making. This book challenges the commonly held perception of the decline of sterling and explains that although Britain's attempt at a European approach failed, the decline of the currency was more complicated than a managed decline. *The Development of American Finance* Martijn Konings, 2011-09-30 Since the 1960s scholars and other commentators have frequently announced the imminent decline of American financial power, excessive

speculation and debt are believed to have undermined the long term basis of a stable US led financial order But the American financial system has repeatedly shown itself to be more resilient than such assessments suggest This book argues that there is considerable coherence to American finance far from being a house of cards it is a proper edifice built on institutional foundations with points of both strength and weakness The book examines these foundations through a historical account of their construction it shows how institutional transformations in the late nineteenth century created a distinctive infrastructure of financial relations and proceeds to trace the contradiction ridden expansion of this system during the twentieth century as well as its institutional consolidation during the neoliberal era It concludes with a discussion of the forces of instability that hit at the start of the twenty first century

The Politics and Economics of Brexit Annette Bongardt, Leila S. Talani, Francisco Torres, 2020-07-31 This interdisciplinary book examines Brexit from a political economy perspective enriched by insights from scholars of political science history and law Shedding light on the key motivations for Brexit this incisive book seeks to better understand what shapes the UK's political and economic preferences and the fundamental causes and issues that have moulded its stance on the EU

From Recession to Renewal Joanna Richardson, 2011 From recession to renewal will be of interest to students academics and practitioners working in a number of areas of local government Book Jacket

The New Eastern Europe And The World Economy Jozef M. Van Brabant, 2019-08-21 The unprecedented economic political and social changes that have followed the east European revolutions of late 1989 rank among the epochal events of the twentieth century The end of the cold war has opened up far reaching possibilities for international economic cooperation which may be able to stimulate economic growth in the region and revive interactions with the global economy This collection of essays comes to grips with the problems of repositioning the new Eastern economies in the global arena The contributors address four main themes freeing up foreign economic sectors through trade liberalization currency convertibility and greater access to markets for international capital the disintegration of the trade payment pricing and settlements systems based on the transferable ruble active participation in the key organizations entrusted with international financial monetary and trading regimes and strategies for using international economic assistance to alleviate adjustment costs with ongoing transition policies

Global Restructuring, State, Capital and Labour A. Bieler, W. Bonefeld, P. Burnham, A. Morton, 2006-04-26 This book provides a critical engagement between contending historical materialist approaches that have played a crucial role in shaping post positivist International Relations theory It analyzes globalization as a process of state formation and argues that its fate depends on the neo liberal recomposition of labour relations

British and American Musical Theatre Exchanges in the West End (1924-1970) Arianne Johnson Quinn, 2023-10-24 This monograph centres on the history of musical theatre in a space of cultural significance for British identity namely the Theatre Royal Drury Lane which housed many prominent American productions from 1924 1970 It argues that during this period Drury Lane was the site of cultural exchanges between Britain

and the United States that were a direct result of global engagement in two world wars and the evolution of both countries as imperial powers The critical and public response to works of musical theatre during this period particularly the American musical demonstrates the shifting response by the public to global conflict the rise of an American Empire in the eyes of the British government and the ongoing cultural debates about the role of Americans in British public life By considering the status of Drury Lane as a key site of cultural and political exchanges between the United States and Britain this study allows us to gain a more complete portrait of the musical s cultural significance in Britain Lionel Robbins Susan

Howson,2011-09-30 By the time of his death the English economist Lionel Robbins 1898 1984 was celebrated as a renaissance man He made major contributions to his own academic discipline and applied his skills as an economist not only to practical problems of economic policy with conspicuous success when he served as head of the economists advising the wartime coalition government of Winston Churchill in 1940 45 and of higher education the Robbins Report of 1963 but also to the administration of the visual and performing arts that he loved deeply He was devoted to the London School of Economics from his time as an undergraduate following active service as an artillery officer on the Western Front in 1917 18 through his years as Professor of Economics 1929 62 and his stint as chairman of the governors during the troubles of the late 1960s This comprehensive biography based on his personal and professional correspondence and other papers covers all these many and varied activities
