Remembered Anger Martha Albrand, 1973-03-01 **Explorations in Phenomenology** David Carr, E.S.

Casey, 2012-12-06 Contrary to popular belief professional philosophers want and need to be heard Lacking a large and general public in this country they turn to audiences of peers and rivals But these audiences are found either in giant unfocused professional bodies or in restrictive groups of specialists In this respect the Society for Phenomenology and Existential Philosophy can claim a unique role among academic organizations in this country Now in its tenth year it has become one of the most important forums in America for the open exchange of ideas The Society has grown considerably since its founding and its annual meetings attract scholars in philosophy and other disciplines from across the country and abroad But these meetings differ markedly from others too large to be dominated by any single clique or doctrine they are at the same time small enough to encourage lively discussion within its organized sessions and not just in the corridors outside The Society derives its focus from the two closely allied philosophical directions indicated in its title Yet from the beginning it has included in its meetings a sizeable number of contributors who are not identified with or even sympathetic to these directions but are at least willing to engage in a dialogue with those who are Furthermore the Society has accomplished to a limited degree something rare indeed in American intellectual life an interdisciplinary exchange

Nisbett, 2017-07-05 Recently there has been growing awareness and acceptance of the proposition that people do not exist in a world of physically defined forces and events but in a world defined by their own perceptions cognitions conclusions and imaginations We respond and react not to some objectively defined set of stimuli but to our own apperceptions of stimuli that we define subjectively The original essays in this volume center on one aspect of this process of attribution The extent to which the perception of events and causes results in the determination modification or alteration of emotions feelings and affective states This book is divided into five sections each of which elucidates and extends these theoretical conceptions Part 1 provides a historical background and analytical framework for the rest of the book Part 2 presents chapters dealing with the sorts of internal cues which may give rise to a feeling state Part 3 presents a chapter discussing the evaluative needs aroused by the internal cues Part 4 is concerned with the process of explanation triggered by the evaluative needs Part 5 deals with various external cues and how they are used to label the internal feeling state There is a concluding discussion of the cognitive alteration of feeling states The authors deal with aggression boredom obesity the control of pain and delusional systems This volume is of continuing importance to clinical and experimental psychologists as well as social psychologists Each of the authors takes the theoretical concept of cognition and relates it to research in biofeedback physiology social psychology altered states of consciousness etc Thus the book bridges the gap between cognitive theory and the use of that theory in applied research **N.Y. Supreme Court** Charles & Hamilton, 1886 The Boiler Room Boys Tim D.

Smith, 2019-01-10 In The Boiler Room Boys An Underground Story of Science Religion and the Faith that Fuels Both Tim Smith describes how from too young an age he followed two seemingly alternate paths religion and science only to find that they are not alternate at all His so called yellow brick road began with a group of boys meeting independently in his grade

school's boiler room. Conflicting teaching by religious and scientific fundamentalists led him toward a PhD in biomathematics and toward atheism. His attraction to theology and philosophy and the events of his life drew his path back toward the connection between science and his childhood Christianity. However, it wasn't the intellectual pursuits that showed him the nature of God. Rather, it was life's experiences that allowed him to hear God's voice and to sense God's spirit. In *The Boiler Room Boys*, Smith reconciles his faith in religion and science, describing how science and theology support one another. In doing so, he also identifies where he sees that both theology and science have taken bad turns that get in the way of people young and old understanding and experiencing the world as it really is. There are many questions that couldn't be addressed in *The Boiler Room Boys*, questions that Smith continues to write about from his own boiler room: www.theboilerroomboys.com.

Last Acts David J. Casarett, 2010-01-12. Palliative care physician Dr. David Casarett considers the medical options terminal patients face at the end of life in this thoughtful and illuminating guide to last acts. What would you do if you had only a few days to live? Or a few weeks or months? What if a loved one were in this situation, how could you help that person decide how to spend the time that remained? Perhaps you lost a family member or dear friend to a terminal illness and were baffled by that person's choices. How do you make sense of his or her last acts? Dr. David Casarett, a palliative care physician and researcher who specializes in the care of patients near the end of life, drawing on his years of experience and the stories of patients he has treated as well as his own research, he explores the wide variety of ways in which people spend their last days. Why do some people choose to be altruistic while others are vengeful? Why do some leave a legacy while others prefer to celebrate and enjoy their time with family and friends? Why do some fight and struggle to the last minute while others accept their fate and use their limited time to reconnect or reconcile? The tremendous diversity of these last acts makes clear that there is no formula for dying well or choices that are right for everyone. At the same time, these stories reveal that some choices may be harmful to the dying person or those closest to him. *Last Acts* helps dying patients and their families think about the possibilities that exist at the end of life so they may choose to spend their time in ways that help bring them peace of mind.

Globalizing Institutions Jane Jenson, Boaventura de Sousa Santos, 2018-02-06. This title was first published in 2000. The contributors to this fully documented volume address the debate surrounding the nature, impact, and desirability of the complex set of phenomena collectively referred to as globalization. The book breaks new ground by showing globalization in a wide range of areas, including national and transnational corporations, welfare policies, adoption, gendered politics, and democratic institutions, citizenship, religion, and judicial systems. It is also a truly international volume, including studies from North and South America, Africa, and Europe. The book illustrates how globalization entails localization and is best explored through the analysis of institutions. It will be of particular interest to political scientists, sociologists, lawyers, and anyone interested in the continual processes of global change.
