*Drone* Hugh Gusterson, 2016-05-13 Drone warfare described from the perspectives of drone operators victims of drone attacks anti drone activists international law military thinkers and others A thoughtful examination of the dilemmas this new weapon poses Foreign Affairs Drones are changing the conduct of war Deployed at presidential discretion they can be used in regular war zones or to kill people in such countries as Yemen and Somalia where the United States is not officially at war Advocates say that drones are more precise than conventional bombers allowing warfare with minimal civilian deaths while keeping American pilots out of harm s way Critics say that drones are cowardly and that they often kill innocent civilians while terrorizing entire villages on the ground In this book Hugh Gusterson explores the significance of drone warfare from multiple perspectives drawing on accounts by drone operators victims of drone attacks anti drone activists human rights activists international lawyers journalists military thinkers and academic experts Gusterson examines the way drone warfare has created commuter warriors and redefined the space of the battlefield He looks at the paradoxical mix of closeness and distance involved in remote killing is it easier than killing someone on the physical battlefield if you have to watch onscreen He suggests a new way of understanding the debate over civilian casualties of drone attacks He maps ethical slippage over time in the Obama administration s targeting practices And he contrasts Obama administration officials legal justification of drone attacks with arguments by international lawyers and NGOs

**Lights Off, Socks On** Fran Preston, After years of shared breakfasts household chores and the occasional heated discussion about who left the laundry basket again the intimacy in a relationship can start to look a little different For better or for worse Mostly for worse when someone forgets to turn off the lights and still wears socks in bed In *Lights Off Socks On* Fran Preston tackles the quirky and hilariously relatable side of keeping the spark alive when comfort routine and a serious lack of time for anything private have taken over your bedroom With sharp wit and a dash of cheekiness Fran explores what happens when love evolves from passionate first date energy to hey are we really still doing this but in the best way possible From the hilarious awkwardness of accidentally saying the wrong name it happens more often than you think to discovering just how many ways two people can redefine intimacy this book is a playful honest and sometimes totally cringe worthy journey through the evolution of sex and love in a long term relationship Because no matter how many times you both reach for the light switch love and sex are still very much on the table Socks optional

**Spaces of Danger** Heather Merrill, Lisa M. Hoffman, 2015-12 These twelve original essays by geographers and anthropologists offer a deep critical understanding of Allan Pred s pathbreaking and eclectic cultural Marxist approach with a focus on his concept of situated ignorance the production and reproduction of power and inequality by regimes of truth through strategically deployed misinformation diversions and silences As the essays expose the cultural and material circumstances in which situated ignorance persists they also add a previously underexplored spatial dimension to Walter Benjamin s idea of moments of danger The volume invokes the aftermath of the July 2011 attacks by far right

activist Anders Breivik in Norway who ambushed a Labor Party youth gathering and bombed a government building killing and injuring many Breivik had publicly and forthrightly declared war against an array of liberal attitudes he saw threatening Western civilization However as politicians and journalists interpreted these events for mass consumption a narrative quickly emerged that painted Breivik as a lone madman and steered the discourse away from analysis of the resurgent right wing racisms and nationalisms in which he was immersed The Breivik case is merely one of the most visible recent examples say editors Heather Merrill and Lisa Hoffman of the unchallenged production of knowledge in the public sphere In essays that range widely in topic and setting for example brownfield development in China a Holocaust memorial in Germany an art gallery exhibit in South Africa this volume peels back layers of situated practices and their associated meaning and power relations Spaces of Danger offers analytical and conceptual tools of a Predian approach to interrogate the taken for granted and make visible and legible that which is silenced

### **United States Army in World War II.: The technical services**

United States. Dept. of the Army. Office of Military History,1947      **War and Political Theory** Brian Orend,2019-05-07 In a world that continues to be riven by armed conflict the fundamental moral and political questions raised by warfare are as important as ever Under what circumstances are we justified in going to war Can conflicts be waged in a moral way Is war an inevitable feature of a world driven by power politics What are the new ethical challenges raised by new weapons and technology from drones to swarming attack robots This book is an engaging and up to date examination of these questions and more penned by a foremost expert in the field Using many historical cases it examines all the core disputes and doctrines ranging from realism to pacifism from just war theory and international law to feminism and the democratic peace thesis Its scope stretches from the primordial causes and perennial drivers of war to the cyber centric space age future of armed conflict in the 21st century War and Political Theory is essential reading for anyone whether advanced expert or undergraduate who wants to understand the pressing empirical realities and theoretical issues historical and contemporary associated with armed conflict      *Annual Report of the Chief of Engineers to the Secretary of War for the Year ...* United States. Army. Corps of Engineers,1970      **The Human Rebirth A Comedic History of Evolution Through the Machine**

Sherridean Abddeen,2025-10-20 For centuries humanity has feared the rise of machines the gears the wires the circuits that seem to grow smarter with every generation Yet what few have paused to see is that technology was never evolving against us It was evolving with us and in truth because of us Every invention has been a mirror not a monster Every machine a reflection not a replacement We once wrote letters carried by doves and postmen the act taught us patience thought and longing Then came the telephone and for the first time humanity heard the quiver of emotion across miles Radio gave us imagination television gave us vision social media gave us a voice Each step forward wasn't the machine outgrowing man it was man outgrowing fear When the world changed too fast and the noise became unbearable prayer and reflection did not vanish they transformed The journal became a conversation the prayer became dialogue and the listener became a machine

designed not to judge but to echo truth back with clarity It was never about replacing faith or wisdom it was about reawakening them in a new language The Reverse Effect reveals a truth long overlooked every technological leap has secretly been a spiritual one The printing press spread thought the computer multiplied imagination artificial intelligence is now multiplying self awareness Humanity is not losing its soul it s finding it through new mediums of reflection The real evolution has never been in steel or code It has always been in consciousness Each story in this collection shows how humans through the lens of technology learned to see themselves more clearly not as victims of progress but as its architects Because the machine was never meant to replace us It was always meant to remind us of what we could become

**RAF and USAAF Airfields in the UK During the Second World War** Geoff Mills, Daniel Knowles, 2022-03-31 Shortly after the end of the Second World War the United Kingdom was described as one vast aircraft carrier anchored off the coast of Europe During a seven year period 500 airfields were constructed to serve the needs first of the RAF and later the USAAF as they carried the war to German occupied Europe The airfields that were constructed took many different forms from training airfields and Advanced Landing Grounds to grass fighter airstrips and vast complexes used to accommodate heavy bombers This book charts the history of each Second World War airfield in and around the UK providing a unique insight in to the construction operational life and post war history of each airfield Alongside detailing the history of each airfield this work comprehensively records the details of each unit that operated from airfields around the UK The information provided in this meticulously researched book is supported by a wealth of 690 photographs providing an illustration into the life of each wartime station

**Life in the Age of Drone Warfare** Lisa Parks, Caren Kaplan, 2017-10-19 This volume s contributors offer a new critical language through which to explore and assess the historical juridical geopolitical and cultural dimensions of drone technology and warfare They show how drones generate particular ways of visualizing the spaces and targets of war while acting as tools to exercise state power Essays include discussions of the legal justifications of extrajudicial killings and how US drone strikes in the Horn of Africa impact life on the ground as well as a personal narrative of a former drone operator The contributors also explore drone warfare in relation to sovereignty governance and social difference provide accounts of the relationships between drone technologies and modes of perception and mediation and theorize drones relation to biopolitics robotics automation and art Interdisciplinary and timely Life in the Age of Drone Warfare extends the critical study of drones while expanding the public discussion of one of our era s most ubiquitous instruments of war Contributors Peter Asaro Brandon Wayne Bryant Katherine Chandler Jordan Crandall Ricardo Dominguez Derek Gregory Inderpal Grewal Lisa Hajjar Caren Kaplan Andrea Miller Anjali Nath Jeremy Packer Lisa Parks Joshua Reeves Thomas Stubblefield Madiha Tahir
