incorporates an extensive and varied range of writers in his discussions such as George Orwell William Golding Angela Carter Doris Lessing Timothy Mo Hanif Kureishi Marina Warner Maggie Gee Written by a foremost scholar of contemporary culture and theory *The English Novel in History 1950 to the Present* offers not only a survey but also a historical and cultural context to British literature produced in the second half of this century [Merriam-Webster's Encyclopedia of Literature](#) Merriam-Webster, Inc,1995 Describes authors works and literary terms from all eras and all parts of the world **The Rhetoric of Antinuclear Fiction** Patrick Mannix,1992 Given the ever present threat of world wide calamity that nuclear weapons present it is not surprising that they have fascinated fiction writers and filmmakers ever since their development Nor is it surprising that many of these artists would seek to use their work to influence mass opinion about these weapons What may be surprising is that few studies have been made of how antinuclear fiction actually attempts to persuade its audiences *The Rhetoric of Antinuclear Fiction* is an effort to do so Organized around the three traditional modes of rhetorical appeal the ethical the rational and the emotional the book describes and classifies the persuasive strategies of a wide range of antinuclear fiction from the period 1945 to 1989 Works examined include *On the Beach* *Fail Safe* *A Canticle for Leibowitz* *Dr Strangelove* *The Day After* *War Day* *Testament* *Threads* and *Riddley Walker* During the course of these studies Patrick Mannix reveals what sorts of fictional characters have been most widely used to deliver antinuclear messages and he follows the major arguments of the nuclear debate as they have been reflected in fiction He also shows which emotions are invoked most often to secure the audience's opposition to nuclear weapons and how those emotions have been generated by the creators of antinuclear fiction The range of characters that this volume examines includes the pacifistic but loyal Air Force general of *Fail Safe* the pious but shrewd monks of *A Canticle for Leibowitz* the suburban housewife of *Threads* and even the computer of *War games* which teaches humanity the folly of nuclear war We also follow fictional manifestations of the nuclear debate from veiled arguments for world government in *The Day the Earth Stood Still* through warnings of the dangers of Mutual Assured Destruction depicted by *Fail Safe* *Dr Strangelove* and *Wargames* to attacks on the concepts of limited nuclear war and the Strategic Defense Initiative in *War Day* This study also demonstrates the dynamic of fear in works as diverse as *Ape and Essence* *The Day After* and *Them* and dissects the powerful use of scorn in *Dr Strangelove* It also shows us the paradoxical role of hope in securing the effectiveness of antinuclear fiction While maintaining his focus on the persuasive nature of this literature Mannix does consider the aesthetic value of the fiction he studies noting that the relationship between the two elements is complex and often problematical While admitting that the aesthetic elements of some works would limit their audience and therefore reduce the scope of their rhetorical effect he demonstrates how the skillful combination of artistic and rhetorical elements raises a film like *Dr Strangelove* above the similarly themed *Fail Safe* as both a persuasive act and an aesthetic artifact BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **The Novel** Michael Schmidt,2014-05-12 The 700 year history of the novel in English defies

Cristofaro,2019-12-26 Traditional apocalyptic texts concern the advent of a better world at the end of history that will make sense of everything that happened before But what is at stake in the contemporary shift to apocalyptic narratives in which the utopian end of time is removed The Contemporary Post Apocalyptic Novel offers an innovative critical model for our cultural obsession with the end by focussing on the significance of time in the 21st century post apocalyptic novel and challenging traditional apocalyptic logic Once confined to the genre of science fiction the increasing popularity of end of the world narratives has caused apocalyptic writing to feature in the work of some of contemporary literature s most well known fiction writers Considering novels by Will Self Cormac McCarthy David Mitchell Emily St John Mandel Jeanette Winterson and others Diletta De Cristofaro frames the contemporary apocalyptic imagination as a critique of modernity s apocalyptic conception of time and history Interdisciplinary in scope the book historicises apocalyptic beliefs by exploring how relentlessly they have shaped the modern world *Configuring Masculinity in Theory and Literary Practice* ,2015-05-26

Bernd Herzogenrath,2022-11-17 Particularly for the disciplines of the humanities and social sciences for which writing is their lifeblood the crisis in academic writing has become existential It is not hard to diagnose the disease and its causes This

book showcases what we desperately need radical alternatives experiments we can try out ways of writing that don't just tweak the system but plot a different course altogether This isn't just about finding new genres for these only change the surface appearance without altering the underlying dynamic Rather the editor and contributors focus on finding new ways to join thinking both with writing and the things of which and with which we write Each chapter brims with the kind of liveliness outspokenness and urgency that their theme demands Far from tiptoeing around the edifice of academia they are intent on stirring things up reigniting their scholarship with a fuse of activism in the hope of setting off an explosion that could send ripples throughout the academy

The Seven Beauties of Science Fiction Istvan

Csicsery-Ronay, 2012-10-01 This major critical work from one of the preeminent voices in science fiction scholarship reframes the genre as a way of understanding today's world. As the application of technoscience increasingly transforms every aspect of life, science fiction has become an essential mode of imagining the horizons of possibility. Though the broad scope of science fiction may vary in artistic quality and sophistication, it shares a desire to imagine a collective future for the human species and the world. A strikingly high proportion of today's films, commercial art, popular music, video games, and non-genre fiction are what Csicsery-Ronay calls science fictional, stimulating science fictional habits of mind. We no longer treat science fiction as merely a genre engine producing formulaic effects, but as a mode of awareness which frames experiences as if they were aspects of science fiction. *The Seven Beauties of Science Fiction* describes science fiction as a constellation of seven diverse cognitive attractions that are particularly formative of science fictionality. These are the seven beauties of the title: fictive neology, fictive novums, future history, imaginary science, the science fictional sublime, the science fictional grotesque, and the Technologiade, or the epic of technoscience's development into a global regime.
