Toward Consilience Gerald A. Cory

Jr.,2012-12-06 The present work is the second in a series constituting an extension of my doctoral thesis done at Stanford in the early 1970s Like the earlier work The Reciprocal Modular Brain in Economics and Politics Shaping the Rational and Moral Basis of Organization Exchange and Choice Plenum Publishing 1999 it may also be considered to respond to the call for consilience by Edward O Wilson I agree with Wilson that there is a pressing need in the sciences today for the unification of the social with the natural sciences I consider the present work to proceed from the perspective of behavioral ecology specifically a subfield which I choose to call interpersonal behavioral ecology th Ecology as a general field has emerged in the last quarter of the 20 century as a major theme of concern as we have become increasingly aware that we must preserve the planet whose limited resources we share with all other earthly creatures Interpersonal behavioral ecology however focuses not on the physical environment but upon our social environment It concerns our interpersonal behavioral interactions at all levels from simple dyadic one to one personal interactions to our larger even global social economic and political interactions **The Oxford Handbook of Event-Related Potential Components** Steven J. Luck, Emily S. Kappenman,2013-07-04 The Oxford Handbook of Event Related Potential Components provides a detailed and comprehensive overview of the major ERP components
