A Just Transition for All J. Mijin Cha,2024-12-03 Why the energy transition must be more than a fuel source replacement and how we can seize the opportunity of the transition to build a more just future for all To meet the greenhouse gas emissions reductions needed to stave off the worst impacts of climate change a transition away from fossil fuels must occur as quickly as possible But there are many unknowns when it comes to moving from theory to implementation for such a large scale energy transition not least regarding the social impact In *A Just Transition for All* J Mijin Cha a seasoned climate policy researcher who also works with advocacy organizations and unions offers a comprehensive analysis of how we can enact transformational changes that meaningfully improve people's lives Cha provides a novel governance framework called the Four Pillars formulated from original research to provide a way to move from theory to practice The Pillars framework includes a novel analysis that guides readers in understanding how to formulate effective just transition policies what makes them just or unjust and similarly what makes transition just and unjust The framework also combines theoretical discussions

with original empirical research and provides insights into perceptions of just transition Grounded in real world perspectives that make the case for policies that advance the interests of all not just of fossil fuel workers Cha charts the path forward to an equitable and sustainable future that no longer depends on fossil fuels      *Production Structure and Productivity of Japanese Agriculture* Y. Brian D Smith,2012-02-01 By any standard the pharmaceutical industry s history has been a successful one In addition to its profits and shareholder dividends it has been seen by investors as relatively low risk and largely counter cyclical to stock market trends However that important contribution appears to be petering out with significant global implications for employees shareholders governments and patients This is not just caused by the economic crisis Long before this several distinct but related streams of evidence emerged that now point to the stalling of the pharmaceutical industry The Future of Pharma examines the causes of the industry s potential decline and offers a convincing and rigorous analysis of the options open to it What emerges is a landscape defined on the one hand by the changing marketplace of mass market consumers institutional healthcare systems and wealthy individuals and on the other by the alternate sources of commercial value innovative therapies super efficient processes supply chains and operations and closer customer relations and increasingly tailored health services The challenges to the pharmaceutical industry now and in the medium and long term are very significant Brian Smith s highly readable research findings are a wake up call and a first step forward for anyone concerned with the future of the industry whether executive customer policymaker or investor **Public Service Efficiency** Rhys

Andrews, Tom Entwistle, 2014-01-03 The current economic and political climate places ever greater pressure on public organizations to deliver services in a cost efficient way Focused on the costs of service delivery governments across the world have introduced a series of business like practices from performance management to public private partnership in the belief that these will increase the efficiency of their public services However both the debate about public service efficiency and the policies and practices introduced to advance it have developed without a coherent account of what efficiency means in this context and how it should be realized The predominance of a rather narrow definition of the term very often focused on the ratio of inputs to outputs has tended to polarise opinion either for or against efficiency agenda Yet public service efficiency more broadly conceived is an inescapable fact of the public manager s task environment indeed in the past the notion of efficiency was central to the emergence of the field of public administration This book will recover public service efficiency from the relatively narrow terms of recent debates by examining theories and evidence relating to technical allocative distributive and dynamic efficiencies In exploring the relationship between efficiency and democracy this book will move current debates in public administration forward by reflecting on the trade offs between the different dimensions of efficiency that public organizations confront
