Conceptions of Modern Psychiatry

The central ideas making up Harry Stack Sullivan's theory of personality find their best expression in this book. Through his view of psychiatry as the study of interpersonal relations, he presents an entirely new approach to the treatment of mental disorders and the study of human personality.

The Interpersonal Theory of Psychiatry

A systematic presentation of the latest thinking of the psychiatrist who perhaps more than any other pushed psychiatry toward a serious investigation of broad social factors in mental health and mental disorder. Here Dr. Sullivan provides a comprehensive frame of reference for psychiatry and a clinical picture of the developmental history of the patient.

The Psychiatric Interview

The technique of carrying on a personal interview is discussed and outlined as a special sample of all interpersonal situations. This book applies to the practical work of interviewing the individual framework which Dr. Sullivan has built in his earlier books.

Clinical Studies in Psychiatry

Written from a clinic in Chelsea Lodge, this book represents Sullivan's clinical work, discussing schizophrenia, the emotional disorders and other mental disturbances.

Schizophrenia as a Human Process

This book brings together and discusses for the first time the major papers written by Dr. Sullivan in the period of his early work with schizophrenics at the Sheppard and Pratt Psychiatric Hospital. With an introduction and commentary by Helen Swick Perry.
