 religion *Europe's Long Twelfth Century* John D. Cotts, 2012-11-09 Between 1095 and 1229 Western Europe confronted a
 series of alternative cultural possibilities that would fundamentally transform its social structures its intellectual life and its
 very identity It was a period of difficult decisions and anxiety rather than a triumphant renaissance In this fresh
 reassessment of the twelfth century John D Cotts Shows how new social economic and religious options challenged
 Europeans to re imagine their place in the world Provides an overview of political life and detailed examples of the original
 thought and religious enthusiasm of the time Presents the Crusades as the century s defining movement Ideal for students
 and scholars alike this is an essential overview of a pivotal era in medieval history that arguably paved the way for a united
 Europe *Augustinian Theology in the Later Middle Ages* Eric Leland Saak, 2021-12-13 The culmination of thirty years of
 research Eric Leland Saak s Augustinian Theology in the Later Middle Ages offers a comprehensive new interpretation of late
 medieval Augustinianism The first of a two volume work the present book sets the stage and analyzes the conceptual and
 methodological structures requisite for interpreting the reception of Augustine in the later Middle Ages historically together
 with explicating the first two of the four pillars of Augustinian theology the Augustinian Hermits political theology the
 teaching in the Order s schools the Order s university theology and its moral theology Holistically fused with the Order s
 religious identity these distinct yet interconnected components of Augustinian theology rather than a narrow theologically
 defined anti Pelagianism provided the context for the emergence of the Reformation **The Authority of Scripture in
 Reformed Theology** Henk Van Den Belt, 2008-01-01 This book discusses the concept of the self convincing authority of
 Scripture in the historical development of Reformed theology and advocates an emphasis on the autopistia in a postmodern
 context because truth and trust are inseparable *Medieval Robots* E. R. Truitt, 2015-04-22 A thousand years before Isaac
 Asimov set down his Three Laws of Robotics real and imagined automata appeared in European courts liturgies and literary
 texts Medieval robots took such forms as talking statues mechanical animals and silent metal guardians some served to
 entertain or instruct while others performed disciplinary or surveillance functions Various ascribed to artisanal genius
 inexplicable cosmic forces or demonic powers these marvelous fabrications raised fundamental questions about knowledge
 nature and divine purpose in the Middle Ages *Medieval Robots* recovers the forgotten history of fantastical aspirational and
 terrifying machines that captivated Europe in imagination and reality between the ninth and fourteenth centuries E R Truitt
 traces the different forms of self moving or self sustaining manufactured objects from their earliest appearances in the Latin
 West through centuries of mechanical and literary invention Chronicled in romances and song as well as histories and

encyclopedias medieval automata were powerful cultural objects that probed the limits of natural philosophy illuminated and challenged definitions of life and death and epitomized the transformative and threatening potential of foreign knowledge and culture This original and wide ranging study reveals the convergence of science technology and imagination in medieval culture and demonstrates the striking similarities between medieval and modern robotic and cybernetic visions **Medieval Philosophy of Religion** Graham Oppy, N. N. Trakakis, 2014-10-20 The Medieval period was one of the richest eras for the philosophical study of religion Covering the period from the 6th to the 16th century reaching into the Renaissance The History of Western Philosophy of Religion 2 shows how Christian Islamic and Jewish thinkers explicated and defended their religious faith in light of the philosophical traditions they inherited from the ancient Greeks and Romans The enterprise of faith seeking understanding as it was dubbed by the medievals themselves emerges as a vibrant encounter between and a complex synthesis of the Platonic Aristotelian and Hellenistic traditions of antiquity on the one hand and the scholastic and monastic religious schools of the medieval West on the other Medieval Philosophy of Religion will be of interest to scholars and students of Philosophy Medieval Studies the History of Ideas and Religion while remaining accessible to any interested in the rich cultural heritage of medieval religious thought **A Companion to John of Salisbury**, 2014-11-27 The Companion to John of Salisbury is the first collective study of this major figure in the intellectual and political life of 12th century Europe to appear for thirty years Based on the latest research thirteen contributions by leading experts in the field provide an overview of John of Salisbury's place in the political debates that marked the reign of Henry II in England as well as of his place in the history of the Church They also offer a detailed introduction to his philosophical works Metalogicon Entheticus his political thought Policraticus and his writing of history Historia pontificalis Contributors include Julie Barrau David Bloch Karen Bollermann C dric Giraud Christophe Grellard Laure Hermand Schebat Fr d rique Lachaud Constant Mews Clare Monagle Cary Nederman Ronald Pepin Yves Sassier and Sigbj rn S nnesyn [The Cambridge History of Medieval Philosophy](#) Robert Pasnau, Christina van Dyke, 2014-06-19 The Cambridge History of Medieval Philosophy comprises over fifty specially commissioned essays by experts on the philosophy of this period Starting in the late eighth century with the renewal of learning some centuries after the fall of the Roman Empire a sequence of chapters takes the reader through developments in many and varied fields including logic and language natural philosophy ethics metaphysics and theology Close attention is paid to the context of medieval philosophy with discussions of the rise of the universities and developments in the cultural and linguistic spheres A striking feature is the continuous coverage of Islamic Jewish and Christian material There are useful biographies of the philosophers and a comprehensive bibliography The volumes illuminate a rich and remarkable period in the history of philosophy and will be the authoritative source on medieval philosophy for the next generation of scholars and students alike **"Every Valley Shall Be Exalted"** Constance Brittain Bouchard, 2017-05-31 In high medieval France men and women saw the world around them as the product of tensions between opposites Imbued with

a Christian culture in which a penniless preacher was also the King of Kings and the last were expected to be first twelfth century thinkers brought order to their lives through the creation of opposing categories In a highly original work Constance Brittain Bouchard examines this poorly understood component of twelfth century thought one responsible in her view for the fundamental strangeness of that culture to modern thinking Scholars have long recognized that dialectical reasoning was the basic approach to philosophical legal and theological matters in the high Middle Ages Bouchard argues that this way of thinking and categorizing which she terms a discourse of opposites permeated all aspects of medieval thought She rejects suggestions that it was the result of imprecision and provides evidence that people of that era sought not to reconcile opposing categories but rather to maintain them Bouchard scrutinizes the medieval use of opposites in five broad areas scholasticism romance legal disputes conversion and the construction of gender Drawing on research in a series of previously unedited charters and the earliest glossa manuscripts she demonstrates that this method of constructing reality was a constitutive element of the thought of the period [Alasdair MacIntyre](#) Mark C. [Thinking Nature and the Nature of Thinking](#) Willemien Otten,2020-03-17 A fresh and more capacious reading of the Western religious tradition on nature and creation Thinking Nature and the Nature of Thinking puts medieval Irish theologian John Scottus Eriugena 810 877 into conversation with American philosopher Ralph Waldo Emerson 1803 1882 Challenging the biblical stewardship model of nature and histories of nature and religion that pit orthodoxy against the heresy of pantheism Willemien Otten reveals a line of thought that has long made room for nature s agency as the coworker of God Embracing in this more elusive idea of nature in a world beset by environmental crisis she suggests will allow us to see nature not as a victim but as an ally in a common quest for re attunement to the divine Putting its protagonists into further dialogue with such classic authors as Augustine Maximus the Confessor Friedrich Schleiermacher and William James her study deconstructs the idea of pantheism and paves the way for a new natural theology [Scholarly Community at the Early University of Paris](#) Spencer E. Kemeny,2013-03-11 While debates abound today over the cost purpose and effectiveness of higher education often lost in this conversation is a critical question Should higher education attempt to shape students moral and spiritual character in any systematic manner as in the past or focus upon equipping students with mere technical knowledge Faith Freedom and Higher Education argues that Christianity can still play an important role in contemporary American higher education George M Marsden D G Hart and George H Nash among its authors analyze the debate over the secularization of the university and the impact of liberal Protestantism and fundamentalism on the American academy during the twentieth century Contributors also assess how the ideas of Dorothy Sayers C S Lewis Wendell Berry and Allan Bloom can be used to improve Christian higher education Finally the volume examines the contributions Christian faith can make to collegiate

education and outlines how Christian institutions can preserve their religious mission while striving for academic excellence

The Story of a Great Medieval Book Philipp W. Rosemann, 2019-02-06 Peter Lombard a twelfth century theologian authored one of the first Western textbooks of theology the Book of Sentences Here Lombard logically arranged all of the major topics of the Christian faith His Book of Sentences received the largest number of commentaries among all works of Christian literature except for Scripture itself Now notable Lombard scholar Philipp W Rosemann examines this text as a guiding thread to studying Christian thought throughout the later Middle Ages and into early modern times This is the second title in a series called Rethinking the Middle Ages which is committed to re examining the Middle Ages its themes institutions people and events with short studies that will provoke discussion among students and medievalists and invite them to think about the middle ages in new and unusual ways The series editor Paul Edward Dutton invites suggestions and submissions
