The Future of Children: Spring 2005

Cecilia Rouse, Jeanne Brooks-Gunn, Sara S. McLanahan, 2010-12-01 The Future of Children is a new semiannual publication that provides research and analysis to promote effective policies and programs for children. This first issue focuses on School Readiness Closing Racial and Ethnic Gaps. For more than 30 years, researchers have seen white children outperform black and other minority children in tests of reading and math skills. Though there is evidence that the gap has narrowed somewhat, the very persistence of this racial and ethnic gap remains a source of considerable concern for academics, policy professionals, and parents. The ethnic and racial gaps appear to reach back to the preschool years. When children reach the school door, minority children exhibit lower school readiness skills at least those measured by standardized tests than their white counterparts. From that point forward, the achievement gap only widens. If policy professionals are to address this disparity in academic achievement and the consequent disparity in later opportunity, the racial and ethnic gap must be examined in the very earliest years, before students begin school with embedded inequalities. This volume critically summarizes the research on the origin and trajectory of the racial and ethnic gap in the early years from several theoretical perspectives. In particular, research is analyzed to determine when these differences start to emerge, in what areas they appear, what factors contribute to their development by the time children enter grade school, and what are the long-term effects. Contents: Introducing the Issue of Test Score Ethnic and Racial Disparities; Jeanne Brooks-Gunn, Sara McLanahan, and Cecilia Elena Rouse; Identifying Racial and Ethnic Differences in School Readiness; Donald Rock and Jack Stenner; Test Score Gaps: The Contribution of Family and Neighborhood Characteristics; Greg Duncan and Katherine Magnuson; Genetic Differences and School Readiness; William T. Dickens; Neuroscience Perspectives on Disparities in School Readiness; Kim Noble, B. J. Casey, and Nim Tottenham; Low Birth Weight and School Readiness; Nancy Reichman; The Impact of Health on School Readiness; Janet Currie; Parenting; Jeanne Brooks-Gunn and Lisa Markman; Childcare and Early Education; Katherine Magnuson and Jane Waldfogel. Human Development D. A. Louw, 1998. Challenging the School Readiness Agenda in Early Childhood Education Miriam B. Tager, 2017-03-27. Challenging the normative paradigm that school readiness is a positive and necessary objective for all young children, this book asserts that the concept is a deficit-based practice that fosters the continuation of discriminatory classifications. Tager draws on findings of a qualitative study to reveal how the neoliberal agenda of school reform, based on high-stakes testing, sorts and labels children as non-ready, affecting their overall schooling careers. Tager reflects critically on the relationship between race and school readiness, showing how the resulting exclusionary measures perpetuate the marginalization of low-income Black children from an early age. Disrupting expected notions of readiness is imperative to ending practices of structural classism and racism in early childhood education. Vygotsky's Educational Theory in Cultural Context Alex Kozulin, 2003-09-15. This 2003 book comprehensively covers all major topics of Vygotskian educational theory and its classroom applications.
