School Success:

Defining Student Success Lisa M. Nunn, 2014-04-15 The key to success our culture tells us is a combination of talent and hard work Why then do high schools that supposedly subscribe to this view send students to college at such dramatically different rates Why do students from one school succeed while students from another struggle To the usual answer an imbalance in resources this book adds a far more subtle and complicated explanation Defining Student Success shows how different schools foster dissimilar and sometimes conflicting ideas about what it takes to succeed ideas that do more to preserve the status quo than to promote upward mobility Lisa Nunn s study of three public high schools reveals how students beliefs about their own success are shaped by their particular school environment and reinforced by curriculum and teaching practices While American culture broadly defines success as a product of hard work or talent at school intelligence is the talent that matters most Nunn shows that each school refines and adapts this American cultural wisdom in its own distinct way reflecting the sensibilities and concerns of the people who inhabit each school While one school fosters the belief that effort is all it takes to succeed another fosters the belief that hard work will only get you so far because you have to be smart enough to master course concepts Ultimately Nunn argues that these school level adaptations of cultural ideas about success become invisible advantages and disadvantages for students college going futures Some schools definitions of success match seamlessly with elite college admissions definition of the ideal college applicant while others more closely align with the expectations of middle or low tier institutions of higher education With its insights into the transmission of ideas of success from society to school to student this provocative work should prompt a reevaluation of the culture of secondary education Only with a thorough understanding of this process will we ever find more consistent means of inculcating success by any measure *School Success* National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Roundtable on Population Health Improvement, 2021-01-29 Education and health care significantly influence well being and health outcomes especially throughout adolescence In fact doctors note that performance in school is highly reflective of a child s current and future health Despite knowledge of this connection pediatricians are rarely aware of their patients school performance and have a limited understanding of the education system Fostering collaboration and aligning efforts within the health and education sectors is a critical step towards building stronger and healthier communities On June 14 2018 the National Academies convened a workshop to discuss how efforts within the health sector can support children s education from pre kindergarten through 12th grade and to explore the barriers between these sectors The committee also examined case examples of health education collaboration and opportunities in policy This publication summarizes the presentations and discussions from the workshop 4 CORE Factors for School Success Jeffrey Zoul, Todd Whitaker, 2013-09-13 This book clarifies the core values which all great educators have in common and contribute to school success For all those who want to create better schools these factors are

at the center of behaviors which lead to results The 4 CORE Factors are Communication Observation Relationships and Expectations **School Success Guide** , **Trusting Teachers with School Success** Kim Farris-Berg,Edward J. Dirkswager,Amy Junge,2013 Lately our nation s strategy for improving our schools is mostly limited to getting tough with teachers Blaming teachers for poor outcomes we spend almost all of our energy trying to control teachers behavior and school operations But what if all of this is exactly the opposite of what is needed What if teachers are the answer and not the problem What if trusting teachers and not controlling them is the key to school success Examining the experiences of teachers who are already trusted to call the shots this book answers What would teachers do if they had the autonomy not just to make classroom decisions but to collectively with their colleagues make the decisions influencing whole school success Decisions such as school curriculum how to allocate the school budget and whom to hire Teachers with decision making authority create the schools that many of us profess to want They individualize learning Their students are active not passive learners who gain academic and life skills The teachers create school cultures that are the same as those in high performing organizations They accept accountability and innovate and make efficient use of resources These promising results suggest it s time to trust teachers **Self and School Success** Edwin William Farrell,1994-01-01 Data for the book were collected by young people in neighborhood schools who taped unstructured dialogue with successful students Vignettes told in the words of the young people themselves address issues of schools and their relation to students careers the roles of teachers and parents the support of community and religious agencies as well as the influence of peers regarding drugs violence and sexuality Teachers Working Together for School Success Mario C. Martinez,2004-06-10 Through examples illustrations and self assessments this volume provides the tools teachers need to build the productive working relationships that are the foundation of successful schools **Inequality, Power and School Success** Gilberto Conchas,Michael Gottfried,2015-04-10 This volume highlights issues of power inequality and resistance for Asian African American and Latino a students in distinct U S and international contexts Through a collection of case studies it links universal issues relating to inequality in education such as Asian Latino and African American males in the inner city neighborhoods Latina teachers and single mothers in California undocumented youth from Mexico and El Salvador immigrant Morrocan youth in Spain and immigrant Afro Caribbean and Indian teenagers in New York and in London The volume explores the processes that keep students thriving academically and socially and outlines the patterns that exist among individuals students teachers parents to resist the hegemony of the dominant class and school failure With emphasis on racial formation theory this volume fundamentally argues that education despite inequality remains the best hope of achieving the American dream Family Strategies, Guanxi, and School Success in Rural China Ailei Xie,2016-04-14 Research in school success in contemporary China has argued that market reforms have reproduced the advantages for children from the cadre and the professional families while simultaneously creating new opportunities for children of the new arising economic elites However it has

performed less for traditional peasant families This book places a special emphasis on how rural parents from different social backgrounds use guanxi interpersonal social networks to maintain the interconnectedness between their families and schools to create advantages for their children in school success It investigates by an ethnographic study in a rural county in middle China how families from different social backgrounds within rural society get involved in the schooling of their children and how this contributes to different patterns of school success The book argues that schools provide few formal and routine channels for rural parents to become involved in their children s schooling This raises the importance of family strategic initiatives to employ guanxi in the creation of advantages for their children s school success It concludes with discussions about guanxi as an important mechanism for social exclusion in post socialist China Chapters include Family Strategies Parental Involvement and School Success The Roles of Parents Voices of Parents in Zong Regarding School Involvement Policy Discourses Missing the Link between Family and School Peasants Family and Kinship The Blurring Division between Home and School This concise and comprehensive book is a qualitative study that will appeal to researchers and advance students in Chinese education and society
