little or no background or knowledge in school law This book takes a case brief approach to the study of school law Case briefs are the means by which students of the law summarize cases to facilitate learning and analysis This book s purpose is to provide those who are involved and interested in education with a rudimentary knowledge base for making educationally sound decisions within the legal framework of our nation Having such knowledge may preclude or at least minimize an educator s exposure to liability On the other hand this book is not intended to scare educators into inaction Many of the most effective learning activities carry with them a certain degree of risk Field trips and laboratory experiments come immediately to mind The knowledge obtained from this book is not intended to end the taking of field trips and the conducting of laboratory experiments It is intended to be a guide to conducting these valuable activities in a responsible manner that will minimize the educator s exposure to liability
