Science And Western Domination:

Science and Western Domination Kurt Mendelssohn, 1976-01-01 **Western Science in Modern India** Pratik Chakrabarti, 2004 The Book Is About Western Science In A Colonial World It Asks How Do We Understand The Transfer And Absorption Of Scientific Knowledge Across Diverse Cultures From One Society To Another This Monograph Will Interest Scientists Historians And Sociologists As Well As Students Of Imperialism And The History Of Ideas **Ideals and Realities** Abdus Salam, C. H. Lai, Azim Kidwai, 1989 The latest edition of Ideals and Realities includes some of the most recent talks given by Professor Abdus Salam They replace a few essays which were published in the second edition An attempt has also been made to update some of the figures rendered obsolete with the passage of time **Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures** Helaine Selin, 2008-03-12 Here at last is the massively updated and augmented second edition of this landmark encyclopedia It contains approximately 1000 entries dealing in depth with the history of the scientific technological and medical accomplishments of cultures outside of the United States and Europe The entries consist of fully updated articles together with hundreds of entirely new topics This unique reference work includes intercultural articles on broad topics such as mathematics and astronomy as well as thoughtful philosophical articles on concepts and ideas related to the study of non Western Science such as rationality objectivity and method You ll also find material on religion and science East and West and magic and science **The Secret of Western Domination** Kurt Mendelssohn, 1976 How science became the key to global power and what this signifies for the rest of the world Jacket

Science and Religion Holmes Rolston, III, 2011-01-15 This landmark book first published in 1987 is now back in print with a new introduction by its award winning author An interdisciplinary approach to the central themes of scientific and religious thought this book was widely heralded upon its publication for the richness and depth of its contribution to the science and religion dialogue notable for its breadth and depth filled with admirably argued and powerfully presented treatments of critical issues Joseph Pickle Colorado College Zygon Journal of Religion and Science a superb and subtle book David Foxgrover Christian Century a monumental work The book is truly outstanding John H Wright Jesuit School of Theology Berkeley Theological Studies Rolston s presentation of the methods of science along with up to date summaries of the main achievements of the various sciences is commendable for its clarity and critical acumen Choice According to Holmes Rolston III there are fundamental questions that science alone cannot answer these questions are the central religious questions He uses the scientific method of inquiry to distill key issues from science and then he integrates them in a study that begins with matter and moves through life mind culture history and spirit Incorporating religious and scientific worldviews he begins with an examination of two natural sciences physics and biology He then extrapolates examples from two human sciences psychology and sociology Next he moves to the storied universe and world history raising and addressing religious questions Never in the histories of science and religion have the opportunities been greater for fertile interaction between these fields

with mutual benefits to both states Rolston The re publication of this book provides current researchers and students in the field an invaluable timeless methodological resource The new introduction offers updated insights based on new scientific research Western Dominance in International Relations? Audrey Alejandro,2018-10-10 Since the 1970s a critical movement has been developing in the humanities and social sciences denouncing the existence of Western dominance over the worldwide production and circulation of knowledge However thirty years after the emergence of this promising agenda in International Relations IR this discipline has not experienced a major shift This volume offers a counter intuitive and original contribution to the understanding of the global circulation of knowledge In contrast to the literature it argues that the internationalisation of social sciences in the designated Global South is not conditioned by the existence of a presumably Western dominance Indeed although discriminative practices such as Eurocentrism and gate keeping exist their existence does not lead to a unipolar structuration of IR internationalisation around the West Based on these empirical results this book reflexively questions the role of critique in the re production of the social and political order Paradoxically the anti Eurocentric critical discourses reproduce the very Eurocentrism they criticise This book offers methodological support to address this paradox by demonstrating how one can use discourse analysis and reflexivity to produce innovative results and decentre oneself from the vision of the world one has been socialised into This work offers an insightful contribution to International Relations Political Theory Sociology and Qualitative Methodology It will be useful to all students and scholars interested in critical theories international political sociology social sciences in Brazil and India knowledge and discourse Eurocentrism as well as the future of reflexivity Going for Cold J. G. Weisend II,G. Terence Meaden,2021-03-03 This short but revealing biography tells the story of Kurt Mendelssohn FRS one of the founding figures in the field of cryogenics from his beginnings in Berlin through his move to Oxford in the 1930s and his groundbreaking work in low temperature and solid state physics He set up the first helium liquefier in the United Kingdom and did fundamental research that increased our understanding of superconductivity and superfluid helium Dr Mendelssohn s vision extended beyond his scientific and technical achievements he saw the potential for growth of cryogenics in industry visiting China Japan and India to forge global collaborations founded the leading scientific journal in the field and established a conference series which still runs to this day He published two monographs which remain as classics in the field This book explores the story behind the science in particular his relationships with other key figures in the cryogenics field most notably Nicholas Kurti at Oxford and his work outside cryogenics including his novel ideas on the engineering of the pyramids **Proceedings of the Ninth International Cryogenic Engineering Conference, Kobe, Japan, 11-14 May 1982** K. Yasukochi,H. Nagano,2013-10-08 Proceedings of the Ninth International Cryogenic Engineering Conference Kobe Japan 11 14 May 1982 contains the papers presented during the entirety of the conference The overall focus is on the presentation of technical developments and new applications in the field of cryogenics The topics covered during the conference include high speed magnetic levitation train

magnetic fusion energy and its cryogenic applications and cooling effects in a vortex cooler Superconductivity and fusion digital applications of the Josephson effect thermally activated stirling cryocooler and large cryogenic systems of the energy doubler are discussed as well Physicists chemists engineers and researchers in the field of cryogenics will find the compendium very insightful

Western Education and Political Domination in Africa Magnus O. Bassey, 1999-10-30 The contribution of Western education to the creation of an African educated elite is well documented What is not equally well documented is the fact that African educated elites have used their education and the schools to perpetuate their dominance by denying the poor the knowledge necessary to protect their political and economic rights and to advance in society On the other hand educated elites in Africa make opportunities available to their own members through selective ordering legitimization of certain language forms and learning processes in schools and legitimization of elite codes and experiences to the exclusion of the histories experiences and worldviews of the poor This book highlights the processes by which the poor in Africa have been disenfranchised and marginalized through schools ascriptive mechanisms and explains why African economic development is very slow

Science and Culture in Traditional Japan Masayoshi Sugimoto, David L. Swain, 2016-02-03 This book of Japanese history explores the development of science and technology in traditional Japanese society It may be surprising to some readers familiar with the history of Japan that that scientific thought existed at all in traditional Japan However Science and Culture in Traditional Japan show the development of premodern science in Japan in the context of that country's social and intellectual milieu Anyone who wishes to understand the development of Japan's science and technology over the last hundred years will appreciate this history of the centuries that preceded modernization for it is the story of why and how Japan was ready and more importantly able to make the leap from Eastern to Western science The history and culture book shows how Japan's long pattern of assimilation in advancing and receding waves of Chinese science and some Western science laid the foundation for an appreciation of the need for and value of the new Western knowledge

Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin, 2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision

of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa

The Uncertain Sciences Bruce Mazlish, 2017-07-28 This sweeping inquiry into the present condition of the human sciences addresses the central questions What sort of knowledge do the human sciences claim to be offering To what extent can that knowledge be called scientific and What do we mean by scientific in such a context In this wide ranging book one of the most esteemed cultural historians of our time turns his attention to major questions about human experience and various attempts to understand it scientifically Mazlish considers the achievements failings and possibilities of the human sciences a domain that he broadly defines to include the social sciences literature psychology and hermeneutic studies In a rich and original synthesis built upon the work of earlier philosophers and historians Mazlish constructs a new view of the nature and meaning of the human sciences Starting with the remote human past and moving through the Age of Discovery to the present day Mazlish discusses the sort of knowledge the human sciences claim to offer He looks closely at the positivistic aspirations of the human sciences which are modeled after the natural sciences and at their interpretive tendencies In an analysis of scientific method and scientific community he explores the roles they can or should assume in the human sciences His approach is genuinely interdisciplinary drawing upon an array of topics from civil society to globalization to the interactions of humans and machines

The Postcolonial Turn Rene Devisch, B. Nyamnjoh, 2011-11-04 This innovative book is a forward looking reflection on mental decolonisation and the postcolonial turn in Africanist scholarship As a whole it provides five decennia long lucid and empathetic research involvements by seasoned scholars who came to live in local peoples own ways significant daily events experienced by communities professional networks and local experts in various African contexts The book covers materials drawn from Botswana Cameroon the Democratic Republic of Congo Mozambique Nigeria South Africa and Tanzania Themes include the Whelan Research Academy rap musicians political leaders wise men and women healers Sacred Spirit churches diviners bards and weavers who are deemed proficient in the classical African geometrical knowledge As a

tribute to late Archie Mafeje who showed real commitment to decolonise social sciences from western centred modernist development theories commentators of his work pinpoint how these theories sought to dismiss the active role played by African people in their quest for self emancipation One of the central questions addressed by the book concerns the role of an anthropologist and this issue is debated against the background of the academic lecture delivered by Ren Devisch when receiving an honorary doctoral degree at the University of Kinshasa The lecture triggered critical but constructive comments from such seasoned experts as Valentin Mudimbe and Wim van Binsbergen They excoriate anthropological knowledge on account that the anthropologist notwithstanding his or her social and cognitive empathy and intense communication with the host community too often fails to also question her own world and intellectual habitus from the standpoint of her hosts Leading anthropologists carry further into great depth the bifocal anthropological endeavour focussing on local peoples re imagining and re connecting the local and global The book is of interest to a wide readership in the humanities social sciences philosophy and the history of the African continent and its relation with the North

Internationalizing the Social Sciences in China Meng Xie, 2022-03-10 The current social reality and changing global forces and spaces are inspiring the rethinking refining and re empowering of the world social sciences to broach the frontiers of human knowledge enhance mutual understanding across cultures and civilizations and shape a better world Taking Tsinghua University's sociology as a case this book concentrates on how internationalization shapes disciplinary development in a global context of asymmetrical academic relations This inquiry is set amidst China's dramatic economic social political and cultural transformations as well as the institutional reforms in this Chinese flagship university This book seeks to probe how Chinese and Western knowledge institutions and cultures are integrated in the ongoing process of internationalization and concentrates on the disciplinary evolution of Tsinghua's sociology intellectually institutionally and culturally drawing on top down higher education policy and bottom up perceptions and experiences of Tsinghua's social scientists This book highlights that higher education internationalization is an evolving process whose advanced phase would require Chinese social scientists to bring China to the world It is time for Tsinghua University to reassess the long term impact of internationalization on its academic disciplines and provide sufficient support for the development of the social sciences This book will attract academics practitioners and postgraduate students interested in higher education internationalization international academic relations global constellation and distribution of academic power academic knowledge production and the development and intellectual influences of the Chinese social sciences

Critical Development Theory Ronaldo Munck, Denis O'Hearn, 1999-03 In the late 20th century there has been a rethinking of the whole concept of development including a growing awareness of its gender cultural and environmental dimensions and the impact of globalization The contributors to this volume seek to extend these debates to a more fundamental level tackling such issues as the crisis of development as an intellectual and practical project the need for a break with development as a Eurocentric concept and the viability of

alternative non Western forms of development The contributors aim to transcend critiques of development which simply engage in a blanket dismissal of the whole enterprise and instead offer ways of re engaging with reality that despite globalization is still a dimension of the late 20th century

Developing Basic Space Science World-Wide Willem Wamsteker, Rudolf Albrecht, Hans J. Haubold, 2005-12-28 J Andersen Niels Bohr Institute for Astronomy Physics and Geophysics Astronomical Observatory Copenhagen ja astro ku dk The development of astronomy worldwide begins at the roots Already from childhood humans of all nations and civilizations seem to share an innate fascination with the sky Yet people in different regions of the world have vastly different possibilities for pursuing this interest In wealthy industrialised societies the way is open to a school or higher education in science possibly leading to a career in astronomy or basic or applied space science for the benefit of the country as well as the individual In other regions neither the financial nor the trained human resources are sufficient to offer that avenue to the future of the young generation or those intellectual resources to the development of their country This book addresses ways and means by which these obstacles can be if not fully overcome then at least significantly reduced

Handbook of Post-Western Sociology: From East Asia to Europe, 2023-04-03 Beyond hegemonic thoughts the Post Western sociology enables a new dialogue between East Asia China Japan Korea and Europe on common and local knowledge to consider theoretical continuities and discontinuities to develop transnational methodological spaces and co produce creolized concepts With this new paradigm in social sciences we introduce the multiplication of epistemic autonomies vis vis Western hegemony and new theoretical assemblages between East Asia and European sociologies From this ecology of knowledge this groundbreaking contribution is to coproduce a post Western space in a cross pollination process where Western and non Western knowledge do interact articulated through cosmovisions as well as to coproduce transnational fieldwork practices

Eureka Chad Orzel, 2014-12-09 When it comes to science too often people say I just don t have the brains for it and leave it at that Why is science so intimidating and why do people let themselves feel this way What makes one person a scientist and another disinclined even to learn how to read graphs The idea that scientists are people who wear lab coats and are somehow smarter than the rest of us is a common yet dangerous misconception that puts science on an intimidating pedestal How did science become so divorced from everyday experience In *Eureka* science popularizer Chad Orzel argues that even the people who are most forthright about hating science are doing science often without even knowing it Orzel shows that science is central to the human experience every human can think like a scientist and regularly does so in the course of everyday activities The common misconception is that science is a body of boring abstract often mathematical facts In truth science is a process Looking at the world Thinking about what makes it work Testing your mental model by comparing it to reality and Telling others about your results all things that people do daily By revealing the connection between the everyday activities that people do solving crossword puzzles playing sports or even watching mystery shows on television and the processes used to make great scientific

discoveries Eureka shows that this process is one everybody uses regularly and something that anyone can do
