

The background of the slide features a large, powerful nuclear explosion on the left side, with a massive plume of white and grey smoke rising into the sky, and a bright orange and yellow fireball at its base. In the bottom right corner, the tips of several nuclear missiles are visible, pointing upwards. The overall scene is set against a clear blue sky with some light clouds.

published in 1986 Military Technology Military Strategy and the Arms Race argues that a principal factor contributing to the arms race is the military research and development R and D sector It traces the arms race since World War II and explores the relationship between the emergence of new weapon technology the development of new weapon systems and their impact on strategic thinking It considers the positions for both the United States and its allies in NATO and for the erstwhile Soviet Union It argues that military R and D which consumes an increasing proportion of total funds spent on R and D has developed a self sustaining technological momentum which is baked by a powerful military industrial bureaucratic technological complex and is increasingly out of control of political leaders The book argues that negotiations to limit the numbers of weapons fail to address the main problem and that more emphasis should be given to considering ways of limiting and controlling military R and D It concludes by proposing a radical shift in policy to achieve this This historical reference work is important for scholars and researchers of military studies defence studies international relations diplomacy and international politics **Science, Technology and Global Governance** John R. De La Mothe, 2014-04-23 Science

technology and innovation have long been key factors in the competitive advantage of nations Today however the new international political economy is being increasingly driven by science and technology in new ways Integration globalization and internationalization have all become watchwords for a series of dynamic processes in which science and technology are deeply implicated As a result not only are the policies of national governments being exposed in terms of the limits of their sovereignty but science and technology are being increasingly implicated in a wide array of public issues ranging from security privacy development and economic growth to employment environment foreign policy and geopolitics Clearly in

today's emerging world the ways in which governments organize their science and technology policy their science and technology intelligence and their research advisory structures and resources matter more today than ever before In turn the contract between science and democracy is being rapidly redefined This book is the first to comprehensively discuss these critical issues

The Military-Industrial Complex and American Society S. Mike Pavelec, 2010-01-18 The first complete reference on the military industrial complex from its Cold War era expansion to the present The Military Industrial Complex and American Society addresses the broad subject of the political economy of defense research and its wide reaching effects on many aspects of American life Ranging from the massive arms buildup of the Cold War to the influx of private contractors and corporations such as Halliburton it reveals the interconnectedness of the military industry and government within the history of this public private enterprise The Military Industrial Complex and American Society offers over 100 alphabetically organized entries on a wide of range of significant research bodies and government agencies as well as important people events and technologies In addition a series of essays looks at such essential topics as propaganda think tanks defense budgeting the defense industry and the economy and the breakdown of the military industrial complex in Vietnam With this work students policymakers and other interested readers will understand the ramifications of the relationships between industry scientific and technological communities the government and society

Inventing Accuracy Donald MacKenzie, 1993-01-29 Mackenzie has achieved a masterful synthesis of engrossing narrative imaginative concepts historical perspective and social concern Donald MacKenzie follows one line of technology strategic ballistic missile guidance through a succession of weapons systems to reveal the workings of a world that is neither awesome nor unstoppable He uncovers the parameters the pressures and the politics that make up the complex social construction of an equally complex technology

From Polaris to Trident Graham Spinardi, 1994-01-06 This book provides a complete history of the US Fleet Ballistic Missile programme from its inception in the 1950s and the development of Polaris to the deployment of Trident II in 1990 Writing in an accessible yet scholarly manner Graham Spinardi bases his historical documentation of FBM development on interviews with many of the key participants His study confronts a central issue is technology simply a tool used to achieve the goals of society or is it an autonomous force in shaping that society FBM accuracy evolved from the city busting retaliatory capability of Polaris to the silo busting first strike potential of Trident Is this a case of technology driving the arms race or simply the intended product of political decisions The book provides a comprehensive survey of the literature looking at the role of technology in the arms race and seeks to explain technological development using a sociology of technology approach
